(57) **CLAIM**

The ornamental design for a multimedia processing terminal, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the multimedia processing terminal in accordance with the present invention; FIG. 2 is a front side view of the embodiment of the multimedia processing terminal depicted in FIG. 1; FIG. 3 is a back side view of the embodiment of the multimedia processing terminal depicted in FIG. 1; FIG. 4 is a left side view of the embodiment of the multimedia processing terminal depicted in FIG. 1; FIG. 5 is a right side view of the embodiment of the multimedia processing terminal depicted in FIG. 1; FIG. 6 is a top side view of the embodiment of the multimedia processing terminal depicted in FIG. 1; and, FIG. 7 is a bottom side view of the embodiment of the multimedia processing terminal depicted in FIG. 1. The jagged break line seen at the end of the cord portion of the article indicate a symbolic break in its length, the appearance of any portion of the article beyond the break line forms no part of the claimed design. The broken lines showing internal structure depict parts of the multimedia processing terminal that form no part of the claim. The broken lines and the surfaces shown between the broken and solid lines forms no part of the claim.

1 Claim, 7 Drawing Sheets
