(57) **CLAIM**

The ornamental design for a cover with magnetized side screens for an electronic device fitted with a flat display, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of the cover of the invention in an open condition with the top screen fully extended and

side screens partially extended. The broken lines illustrate a laptop attached to the claimed invention and form no part of the claimed design.

FIG. 2 is a perspective view thereof, shown in an open condition with the top screen and side screens fully extended. The broken lines illustrate a laptop attached to the claimed invention and form no part of the claimed design. FIG. 3 is a top view on a reduced scale thereof, shown in an open condition prior to being attached to a device. The top screen and side screens are folded onto the upper portion of the cover.

FIG. 4 is a bottom view on a reduced scale thereof, shown in an open condition. The top screen and side screens are folded onto the upper portion of the cover.

FIG. 5 is a top view on a reduced scale thereof, shown in an open condition prior to being attached to a device. Top and side screens are open and strips of the side screen are in the closed condition.

FIG. 6 is a top view on a reduced scale thereof, shown in an open condition prior to being attached to a device. Top and side screens are open and strips of the side screen are in the open condition.

FIG. 7 is a left side view on a reduced scale thereof, shown in an open condition with strips of the top screen and side screens assembled and side screen partially extended. The left side view is a mirror image thereto.

FIG. 8 is a left side view on a reduced scale thereof, shown in an open condition with strips of the top screen and side screens assembled and side screen fully extended. The right side view is a mirror image thereto.

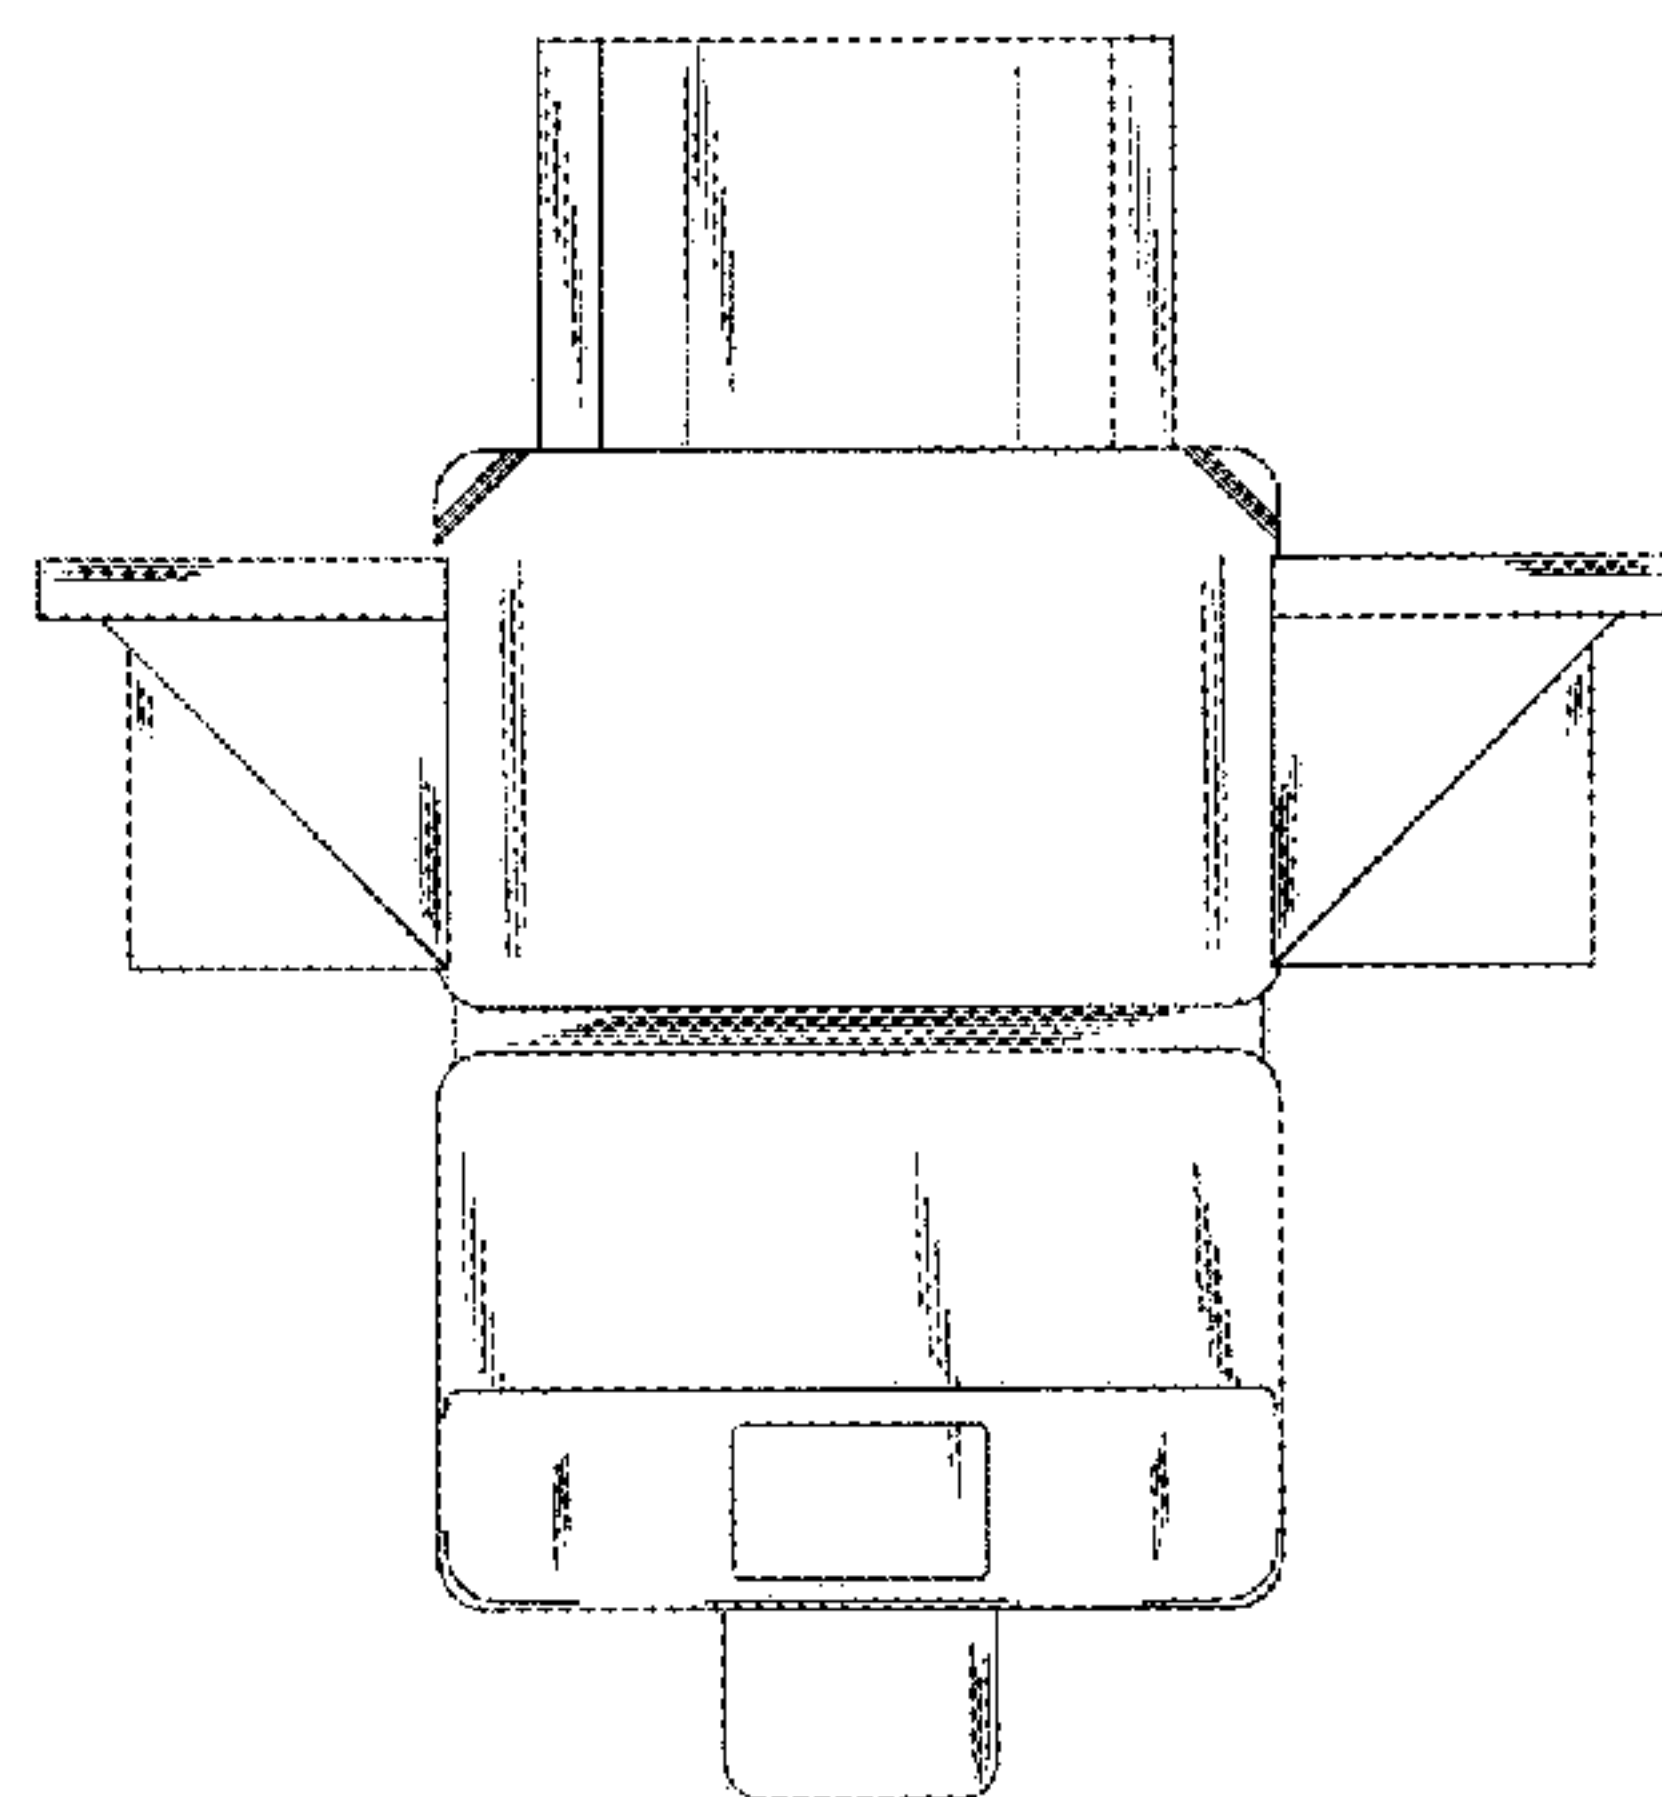

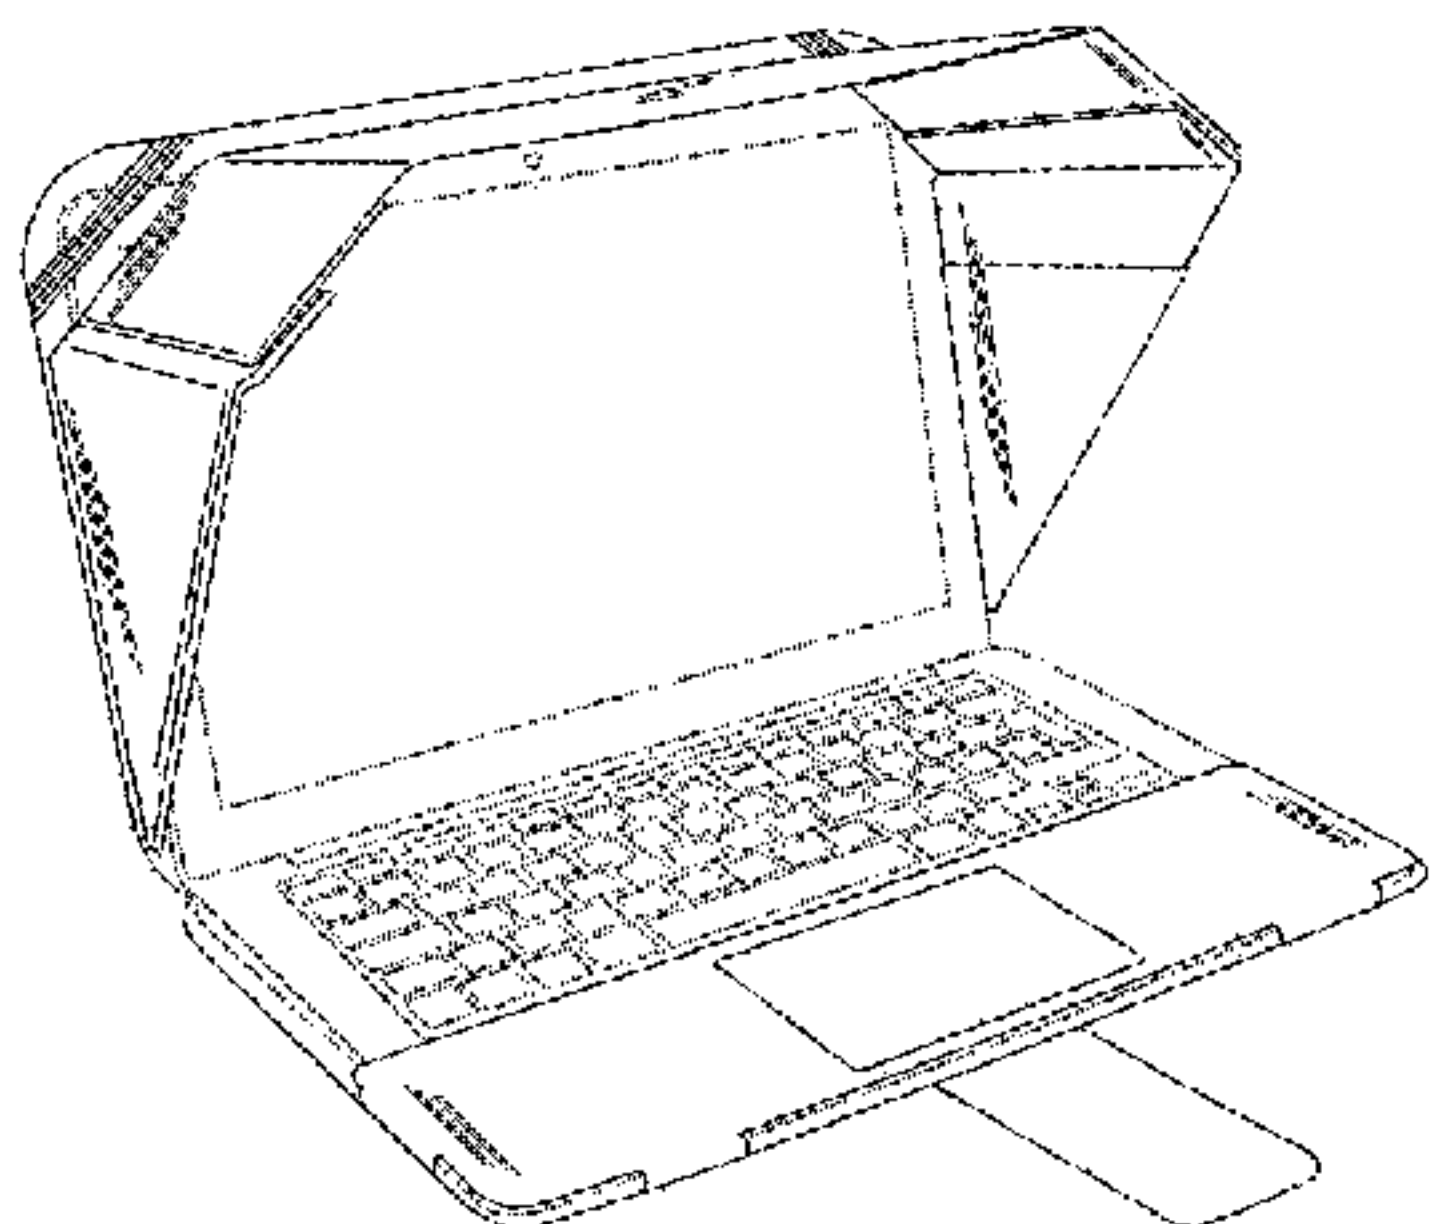

FIG. 9 is a left side view on a reduced scale thereof, shown in a closed condition, right side view being a mirror image thereto.

FIG. 10 is a front view on a reduced scale thereof, shown in the closed condition; and,

FIG. 11 is a back view on a reduced scale thereof, shown in the closed condition.

The claimed cover is for electronic devices fitted with a flat display including laptops, tablets, mobile phones, portable DVD displays etc. The cover protects the device as well as the user from undesirable optical challenges, e.g., glare from

(Continued)

sunlight or where light conditions make it challenging to view the display satisfactorily.
