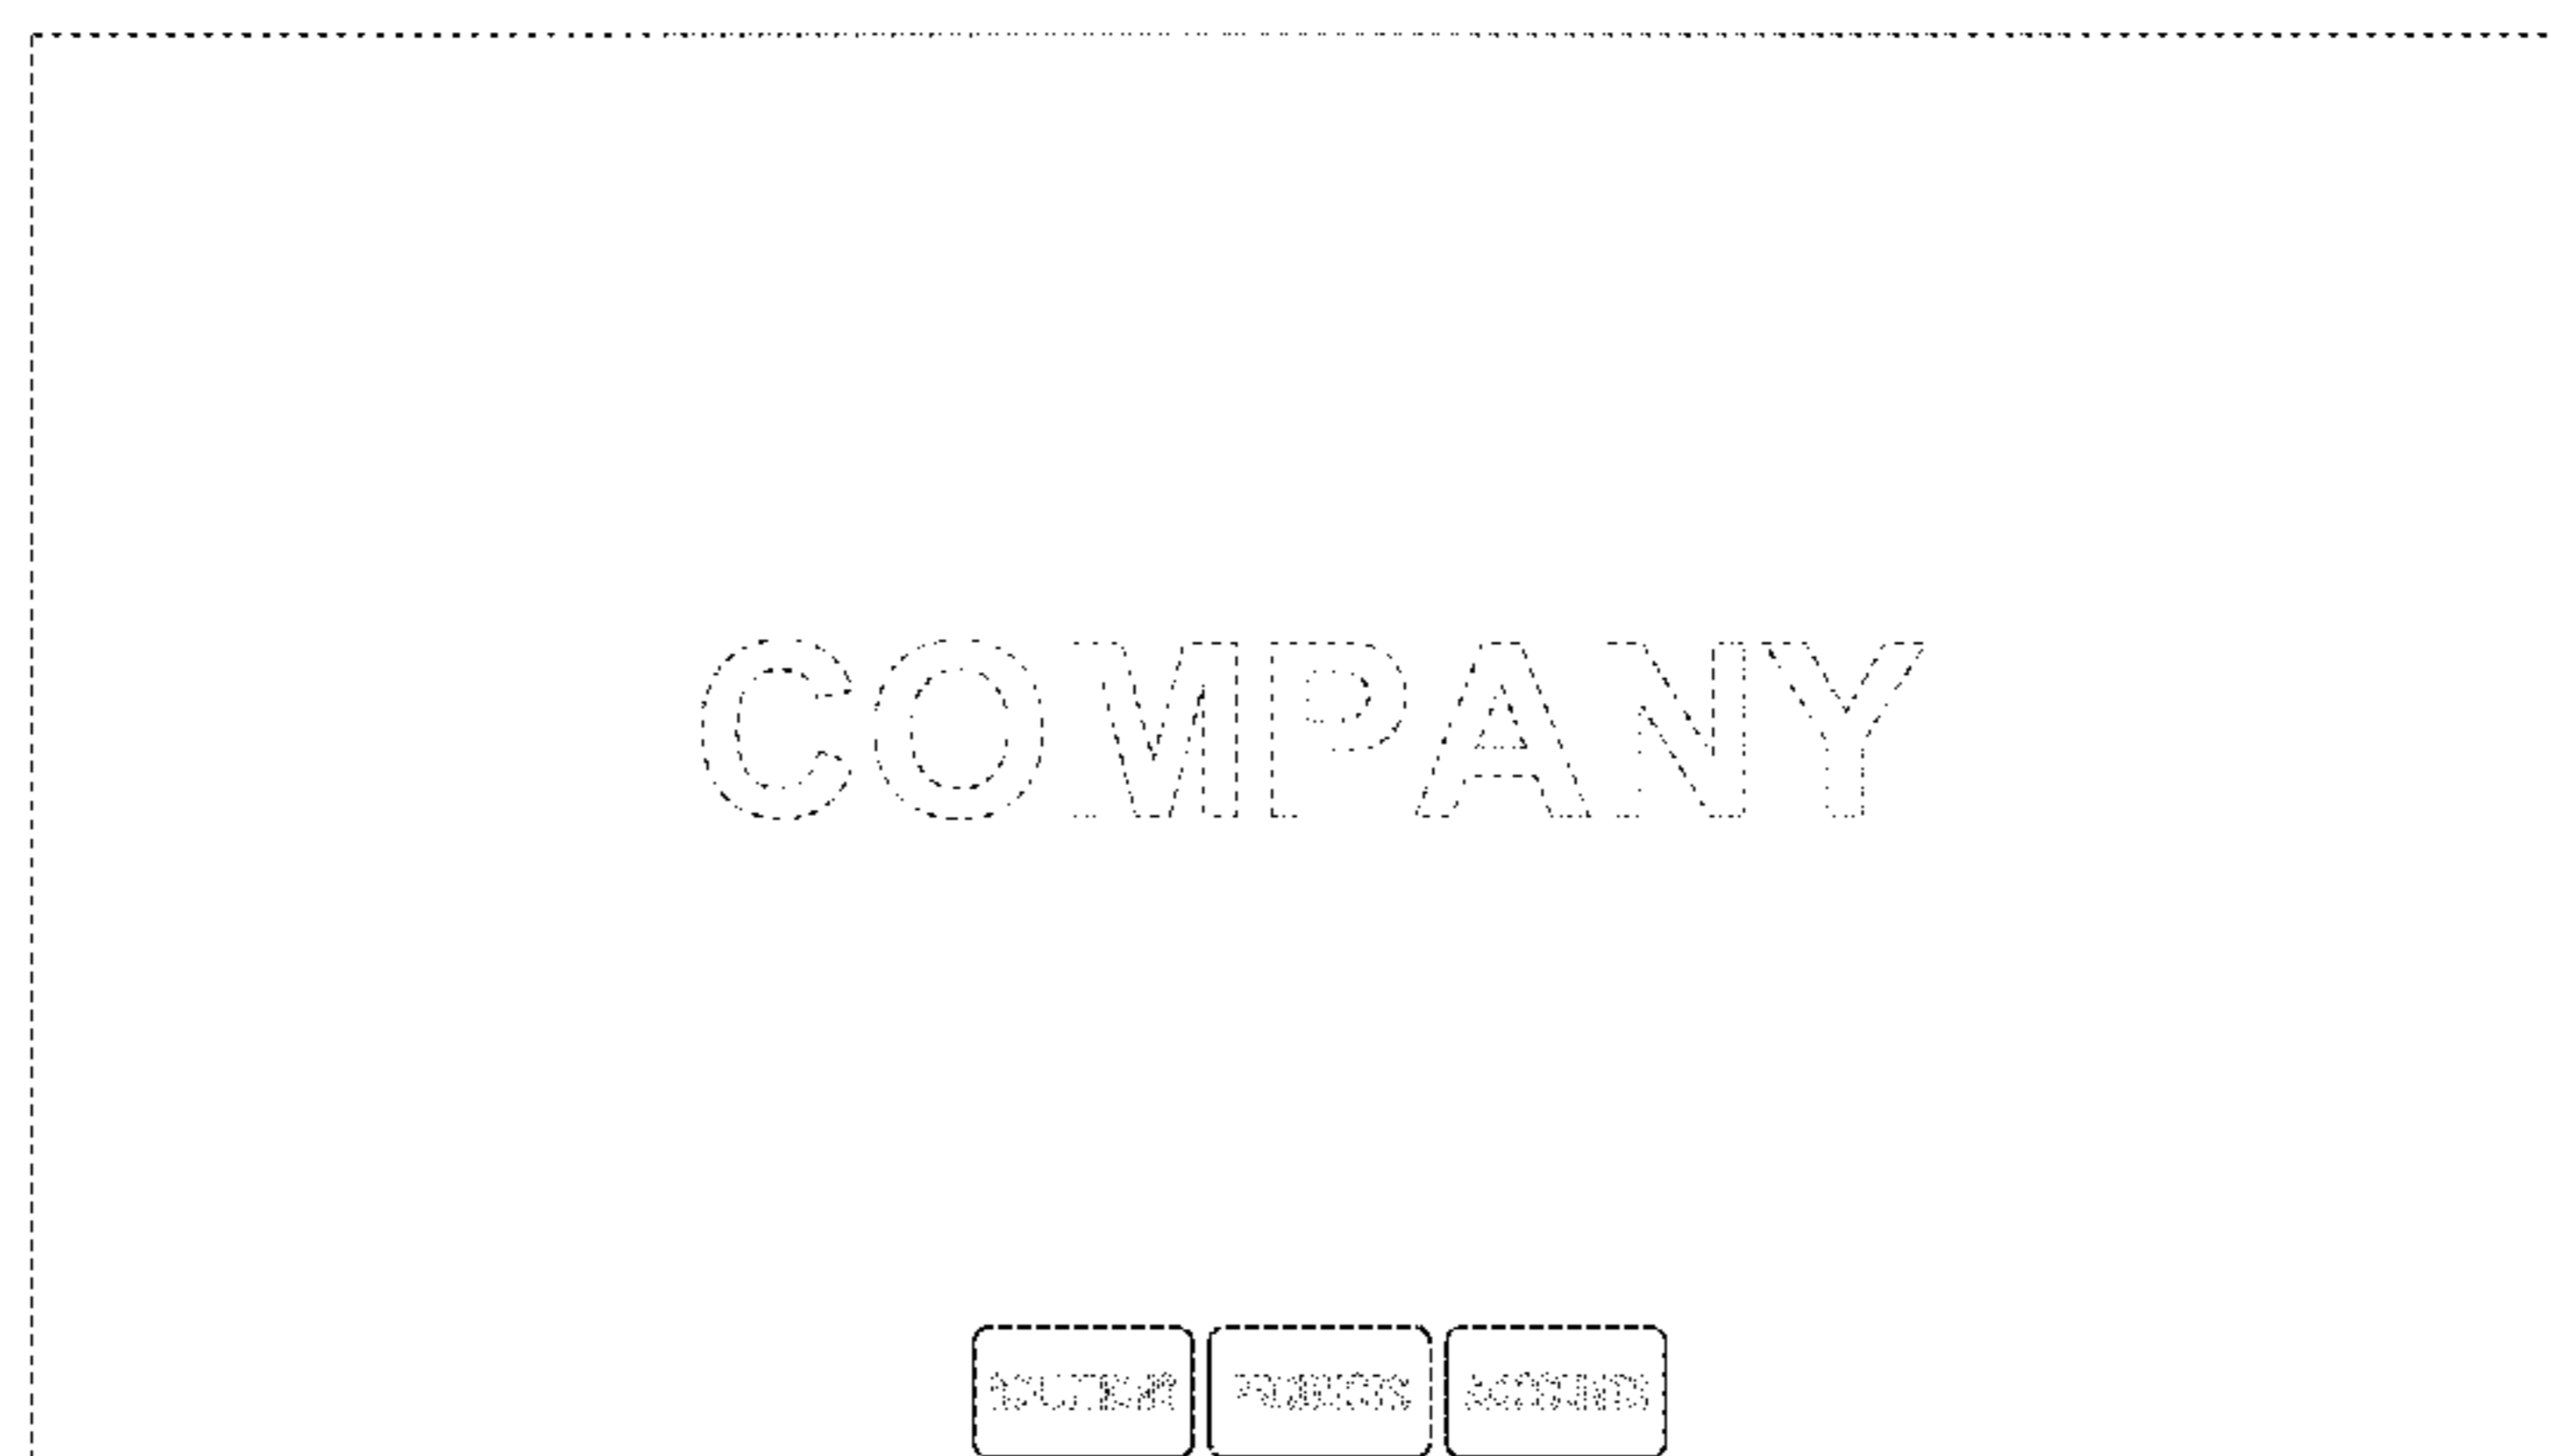

FIG. 8 is another front view of the display screen of an electronic device with graphical user interface in accordance with our design.

FIG. 9 is another front view of the display screen of an electronic device with graphical user interface in accordance with our design; and,

FIG. 10 is another front view of the display screen of an electronic device with graphical user interface in accordance with our design.

The broken line showing portions of the electronic device illustrates unclaimed environment and forms no part of the claimed design. The broken line showing portions of the graphical user interface illustrate unclaimed portions of the graphical user interface. The outer rectangular broken line in each drawing represents a display screen of an electronic device.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 to 10, as described above. This process in which one image transitions to another image forms no part of the claimed design.
