(57) **CLAIM**

The ornamental design for a case convertible into a baby carrier, as shown and described.

DESCRIPTION

FIG. 1 is a front top perspective view of the case convertible into a baby carrier in a closed condition;
FIG. 2 is a front bottom perspective view of the case convertible into a baby carrier in a closed condition;
FIG. 3 is a front top perspective view of the case convertible into a baby carrier in an open condition;
FIG. 4 is a rear bottom perspective view of the case convertible into a baby carrier in an open condition;
FIG. 5 front elevational view of the case convertible into a baby carrier in a closed condition;
FIG. 6 is a rear elevational view of the case convertible into a baby carrier in a closed condition;
FIG. 7 is a right side elevational view of the case convertible into a baby carrier in a closed condition;
FIG. 8 is a left side elevational view of the case convertible into a baby carrier in a closed condition;
FIG. 9 is a top plan view of the case convertible into a baby carrier in a closed condition;
FIG. 10 is a bottom plan view of the case convertible into a baby carrier in a closed condition;
FIG. 11 is a front elevational view of the case convertible into a baby carrier in an open condition;
FIG. 12 is a rear elevational view of the case convertible into a baby carrier in an open condition;
FIG. 13 is a right side elevational view of the case convertible into a baby carrier in an open condition;
FIG. 14 is a left side elevational view of the case convertible into a baby carrier in an open condition;
FIG. 15 is a top plan view of the case convertible into a baby carrier in an open condition; and,
FIG. 16 is a bottom plan view of the case convertible into a baby carrier in an open condition.

(Continued)

The wire frame line showing in light line weight is to depict surface contour of the case convertible into a baby carrier.
