(57) **CLAIM**

The ornamental design for a display screen portion with a graphical user interface component, as shown and described.

DESCRIPTION

The FIGURE is a front view of a display screen portion with a graphical user interface component showing our invention. The gray regions and stippling in the drawings indicate contrasts of appearance. The elongated line, broken in part, which extends along a lower margin of the card, is part of the claimed design.

The broken lines showing of a portion of a display screen of a communications terminal illustrate environment and form no part of the claimed design. The text shown in finer-incremented broken lines illustrate features that form no part of the claimed design, and are intended to illustrate an optional, environmental information which can be omitted, with the underlying surface being continuous and uninterrupted from its immediately surrounding area.

1 Claim, 1 Drawing Sheet
