(57) **CLAIM**

The ornamental design for a tire, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire showing our new design, it being understood that the pattern repeats uniformly throughout the circumference of the tread; FIG. 2 is a front elevational view thereof; FIG. 3 is a right side elevational view thereof; FIG. 4 is a left side elevational view thereof; and, FIG. 5 is an enlarged fragmentary front elevational view thereof.

In the drawings, the broken lines showing of the notches and tie bars within the lateral grooves and notches, sidewall, inner bead and the peripheral boundary between the tire tread and the sidewall depict environmental subject matter and form no part of the claimed design.

1 Claim, 5 Drawing Sheets
