(57) **CLAIM**

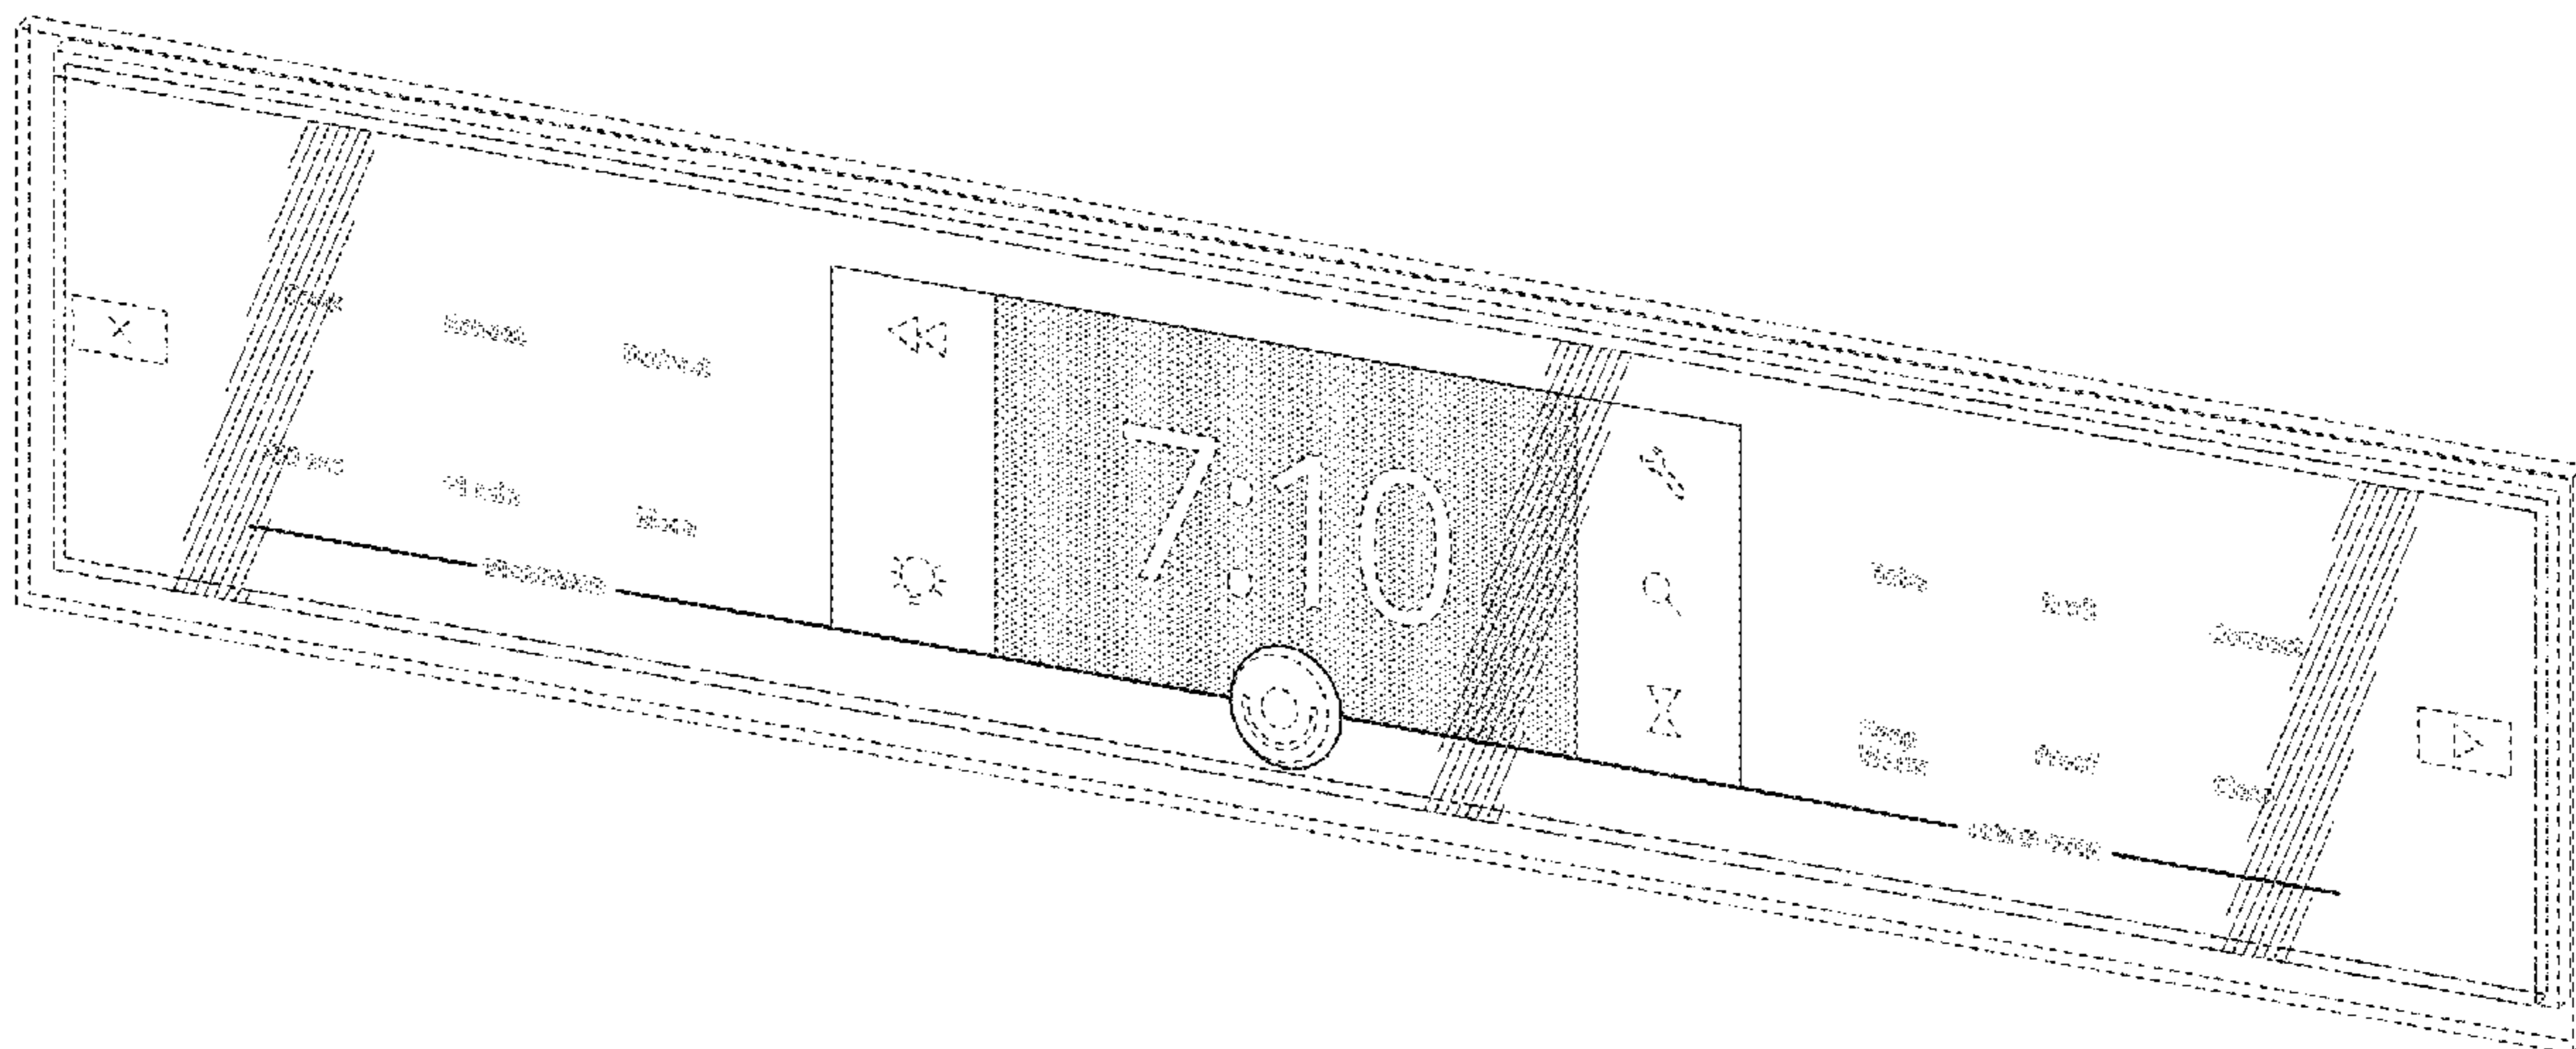

The ornamental design for a display panel for appliance with partial graphical user interface portion, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a display panel for appliance with partial graphical user interface portion according to a first embodiment of our design;
FIG. 2 is a front view thereof, a back view thereof showing no portion of the claimed design;
FIG. 3 is a top view thereof, a bottom view being identical thereto;
FIG. 4 is a right side view thereof, a left side view being a mirror image thereof;
FIG. 5 is a front perspective view of a display panel for appliance with partial graphical user interface portion according to a second embodiment of our design;
FIG. 6 is a front view thereof, a back view thereof showing no portion of the claimed design;
FIG. 7 is a top view thereof, a bottom view being identical thereto; and,
FIG. 8 is a right side view thereof, a left side view being a mirror image thereof.

The even-length broken lines in the drawings illustrate portions of the display panel with partial graphical user interface portion which form no part of the claimed design. The pairs of closely adjacent, spaced jagged broken lines indicate a symbolic break in the length of the display panel for appliance with partial graphical user interface portion. The appearance of any portion of the article between the break lines forms no part of the claimed design. The dash-dot lines define the bounds of the claim and form no part thereof. The stipple fill indicates a contrast in materials. The diagonal line shading indicates transparency.

1 Claim, 6 Drawing Sheets
