(57) **CLAIM**

We claim the ornamental design for a wafer carrier with a 31-pocket configuration, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a wafer carrier with a 31-pocket configuration according to the new design of the first embodiment.

FIG. 2 is a top plan view of a wafer carrier with a 31-pocket configuration according to the new design thereof.

FIG. 3 is a right side view of a wafer carrier with a 31-pocket configuration according to the new design, with the left side, front, and rear views being the same as the right side view thereof.

FIG. 4 is a bottom plan view of a wafer carrier with a 31-pocket configuration according to the new design thereof.

FIG. 5 is a perspective view of a wafer carrier with a 31-pocket configuration according to the new design of the second embodiment.

FIG. 6 is a right side view of a wafer carrier with a 31-pocket configuration according to the new design, with the left side, front, and rear views being the same as the right side view thereof.

FIG. 7 is a bottom plan view of a wafer carrier with a 31-pocket configuration according to the new design thereof; and,

FIG. 8 is a detail view of a portion of the wafer carrier with a 31-pocket configuration shown in FIG. 1 according to the new design showing a single pocket from a perspective view of the first embodiment.

The broken lines, where present, in FIGS. 1, 2, 3, 4, and 8, illustrate portions of the wafer carrier with a 31-pocket configuration that represent environment of the claimed design and form no part of the claimed design. The broken lines of FIG. 1 that define the area corresponding to the enlarged portion shown in FIG. 8 form no part of the claimed design. The broken lines in FIG. 8 that represent the edge of the enlarged portion of the design form no part of the claimed design.
