(57) **CLAIM**

The ornamental design for a valve component for a breastmilk collection system and the like, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of a valve component for a breastmilk collection system according the present invention;
FIG. 2 is a top view of the valve component for a breastmilk collection system illustrated in FIG. 1;
FIG. 3 is a bottom view of the valve component for a breastmilk collection system illustrated in FIG. 1;
FIG. 3A is a cross-sectional view of the valve component for a breastmilk collection system illustrated in FIG. 1, taken along lines 3A-3A of FIG. 3; and,
FIG. 4 is a front view of the valve component for a breastmilk collection system illustrated in FIG. 1, a rear view being identical.
