(57)CLAIM

The ornamental design for a portion of a display screen with a changeable graphical user interface component, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a portion of a display screen with a changeable graphical user interface component showing a first image in a sequence that comprises a first embodiment of our invention;

FIG. 2 is a front view of a second image included in the sequence of the first embodiment;

FIG. 3 is a front view of a third image included in the sequence of the first embodiment;

FIG. 4 is a front view of a fourth image included in the sequence of the first embodiment;

FIG. 5 is a front view of a portion of a display screen with a changeable graphical user interface component showing a first image in a sequence that comprises a second embodiment our invention;

FIG. 6 is a front view of a second image included in the sequence of the second embodiment;

FIG. 7 is a front view of a third image included in the sequence of the second embodiment; and,

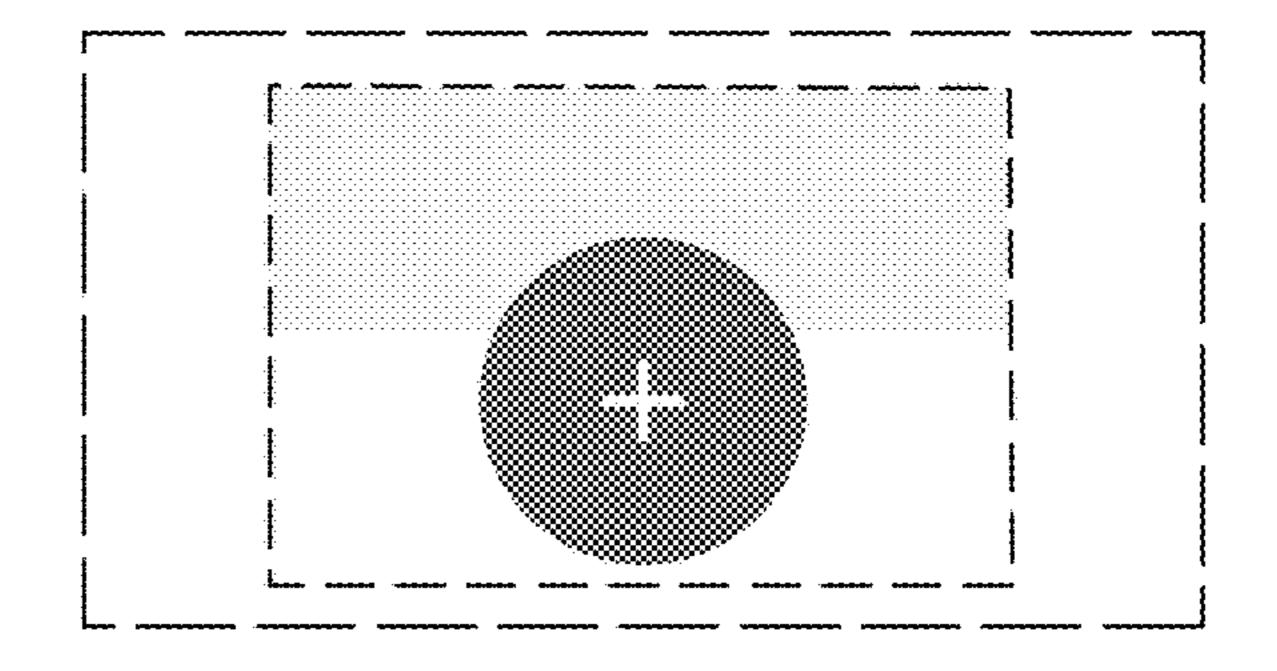

FIG. 8 is a front view of a fourth image included in the sequence of the second embodiment.

The gray shading in the drawings indicates a contrast of appearance.

The longer-incremented broken lines showing a portion of a display screen illustrate environment and form no part of the claimed design. The finer-incremented broken lines show a boundary of the claimed design and form no part of the claimed design.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.
