(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface for image-printing, order-receiving terminal, as shown and described.

DESCRIPTION

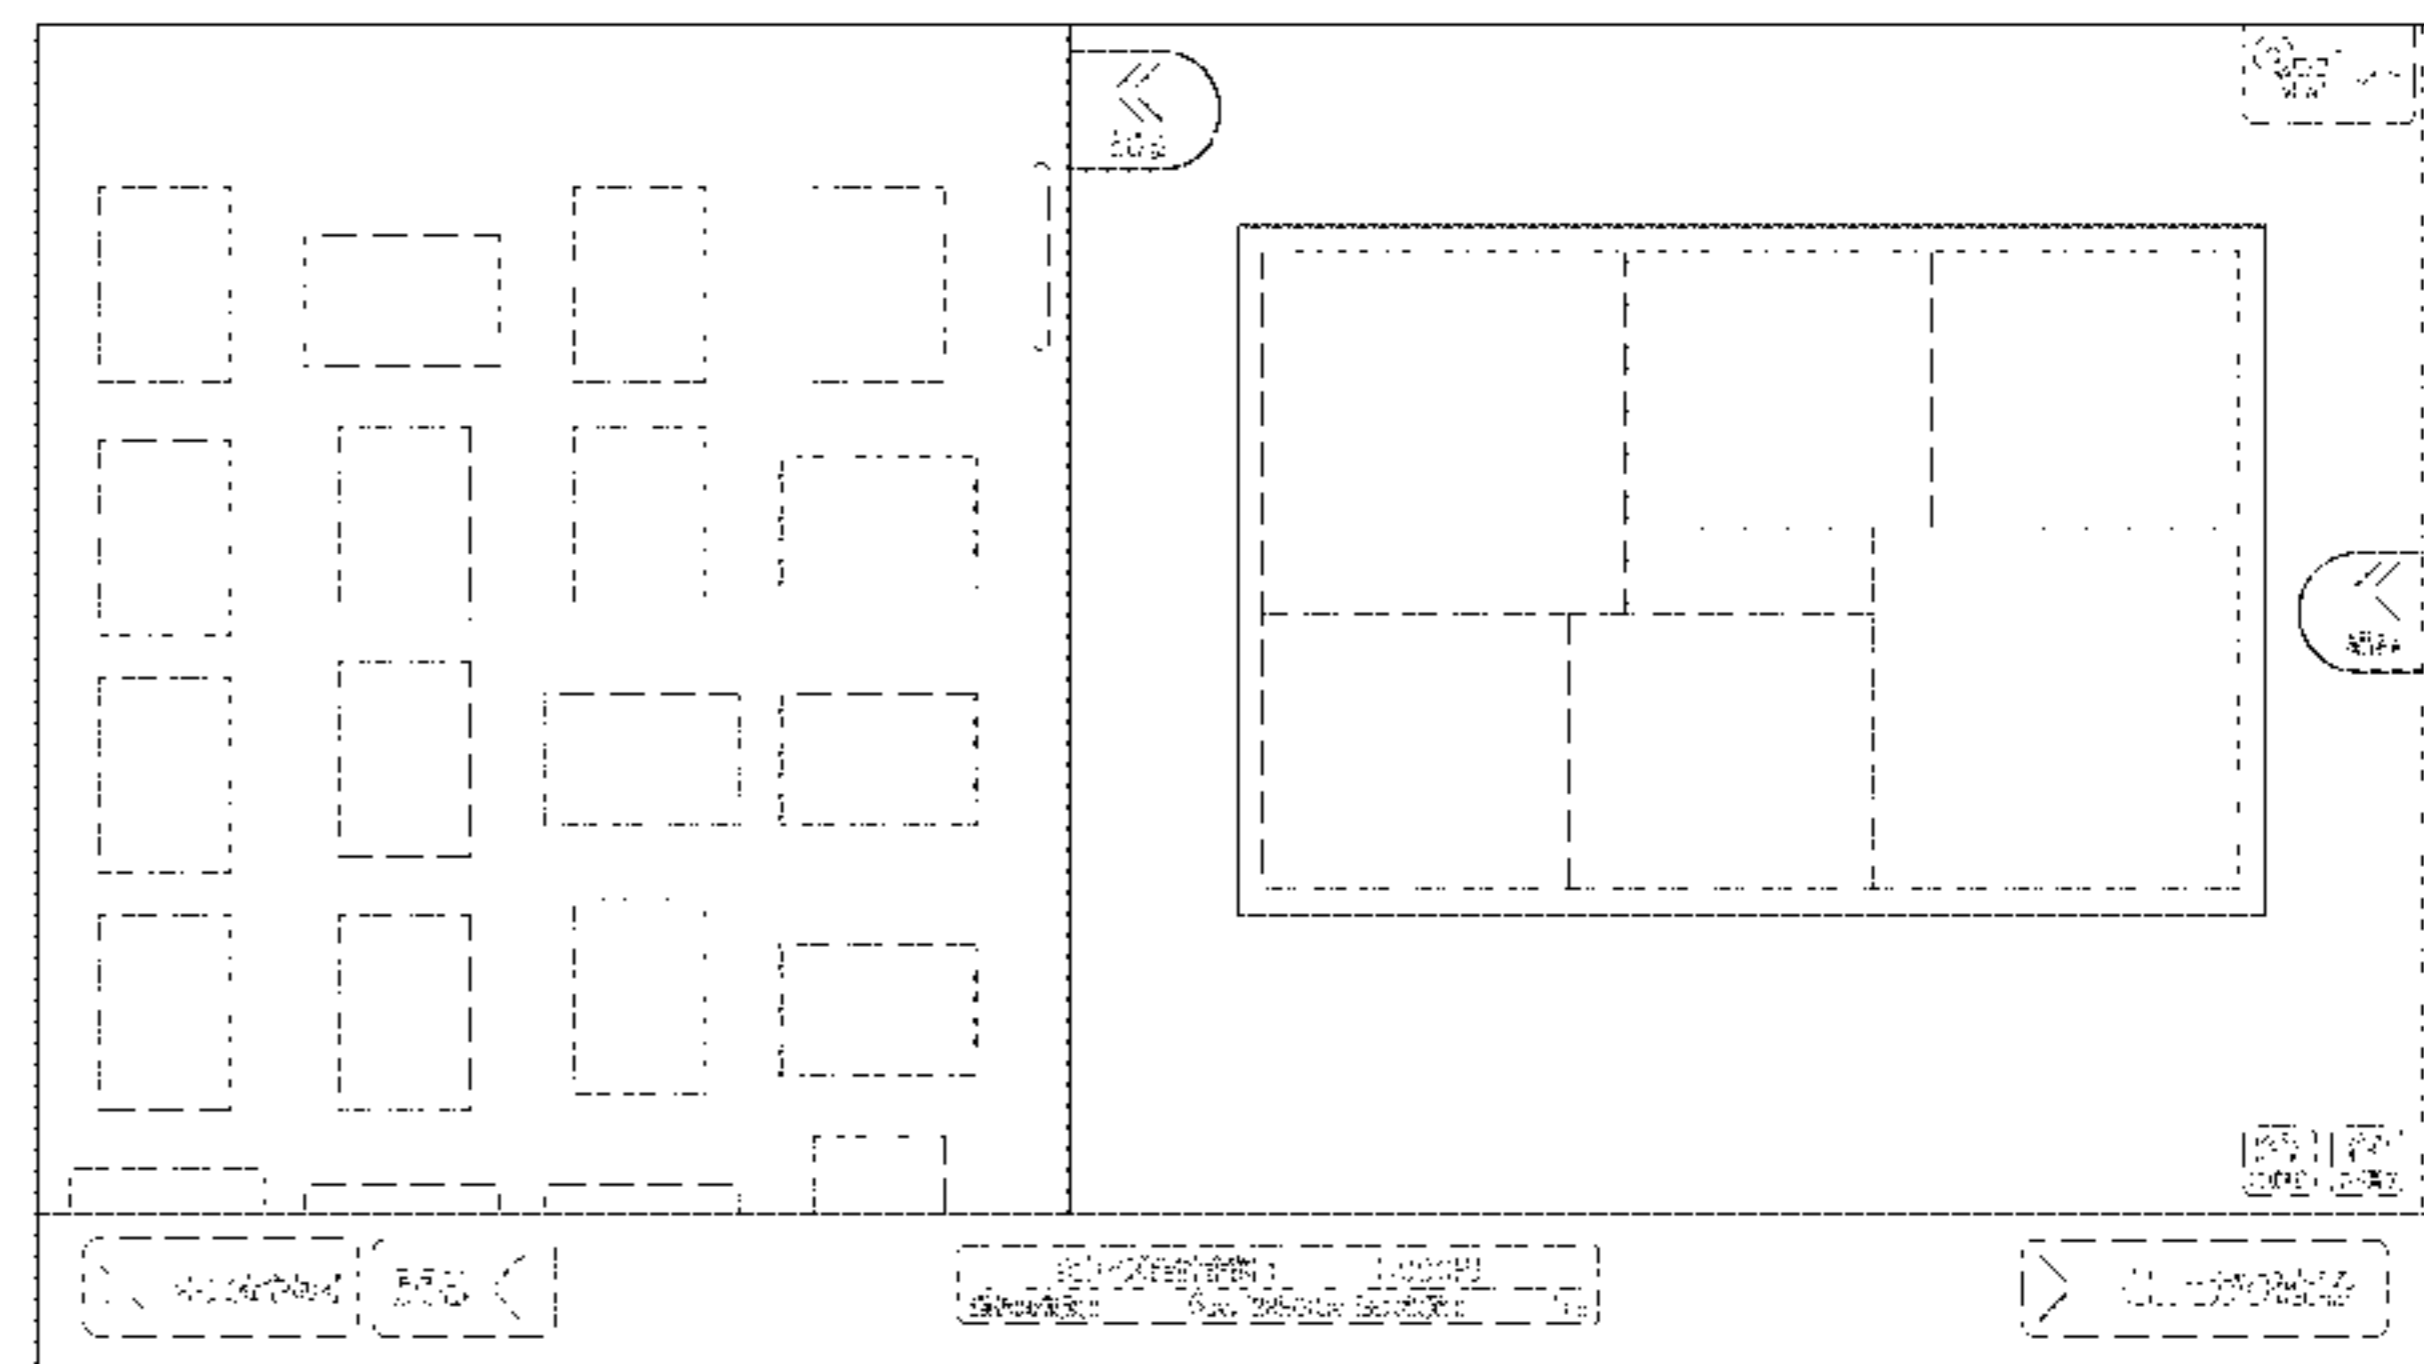

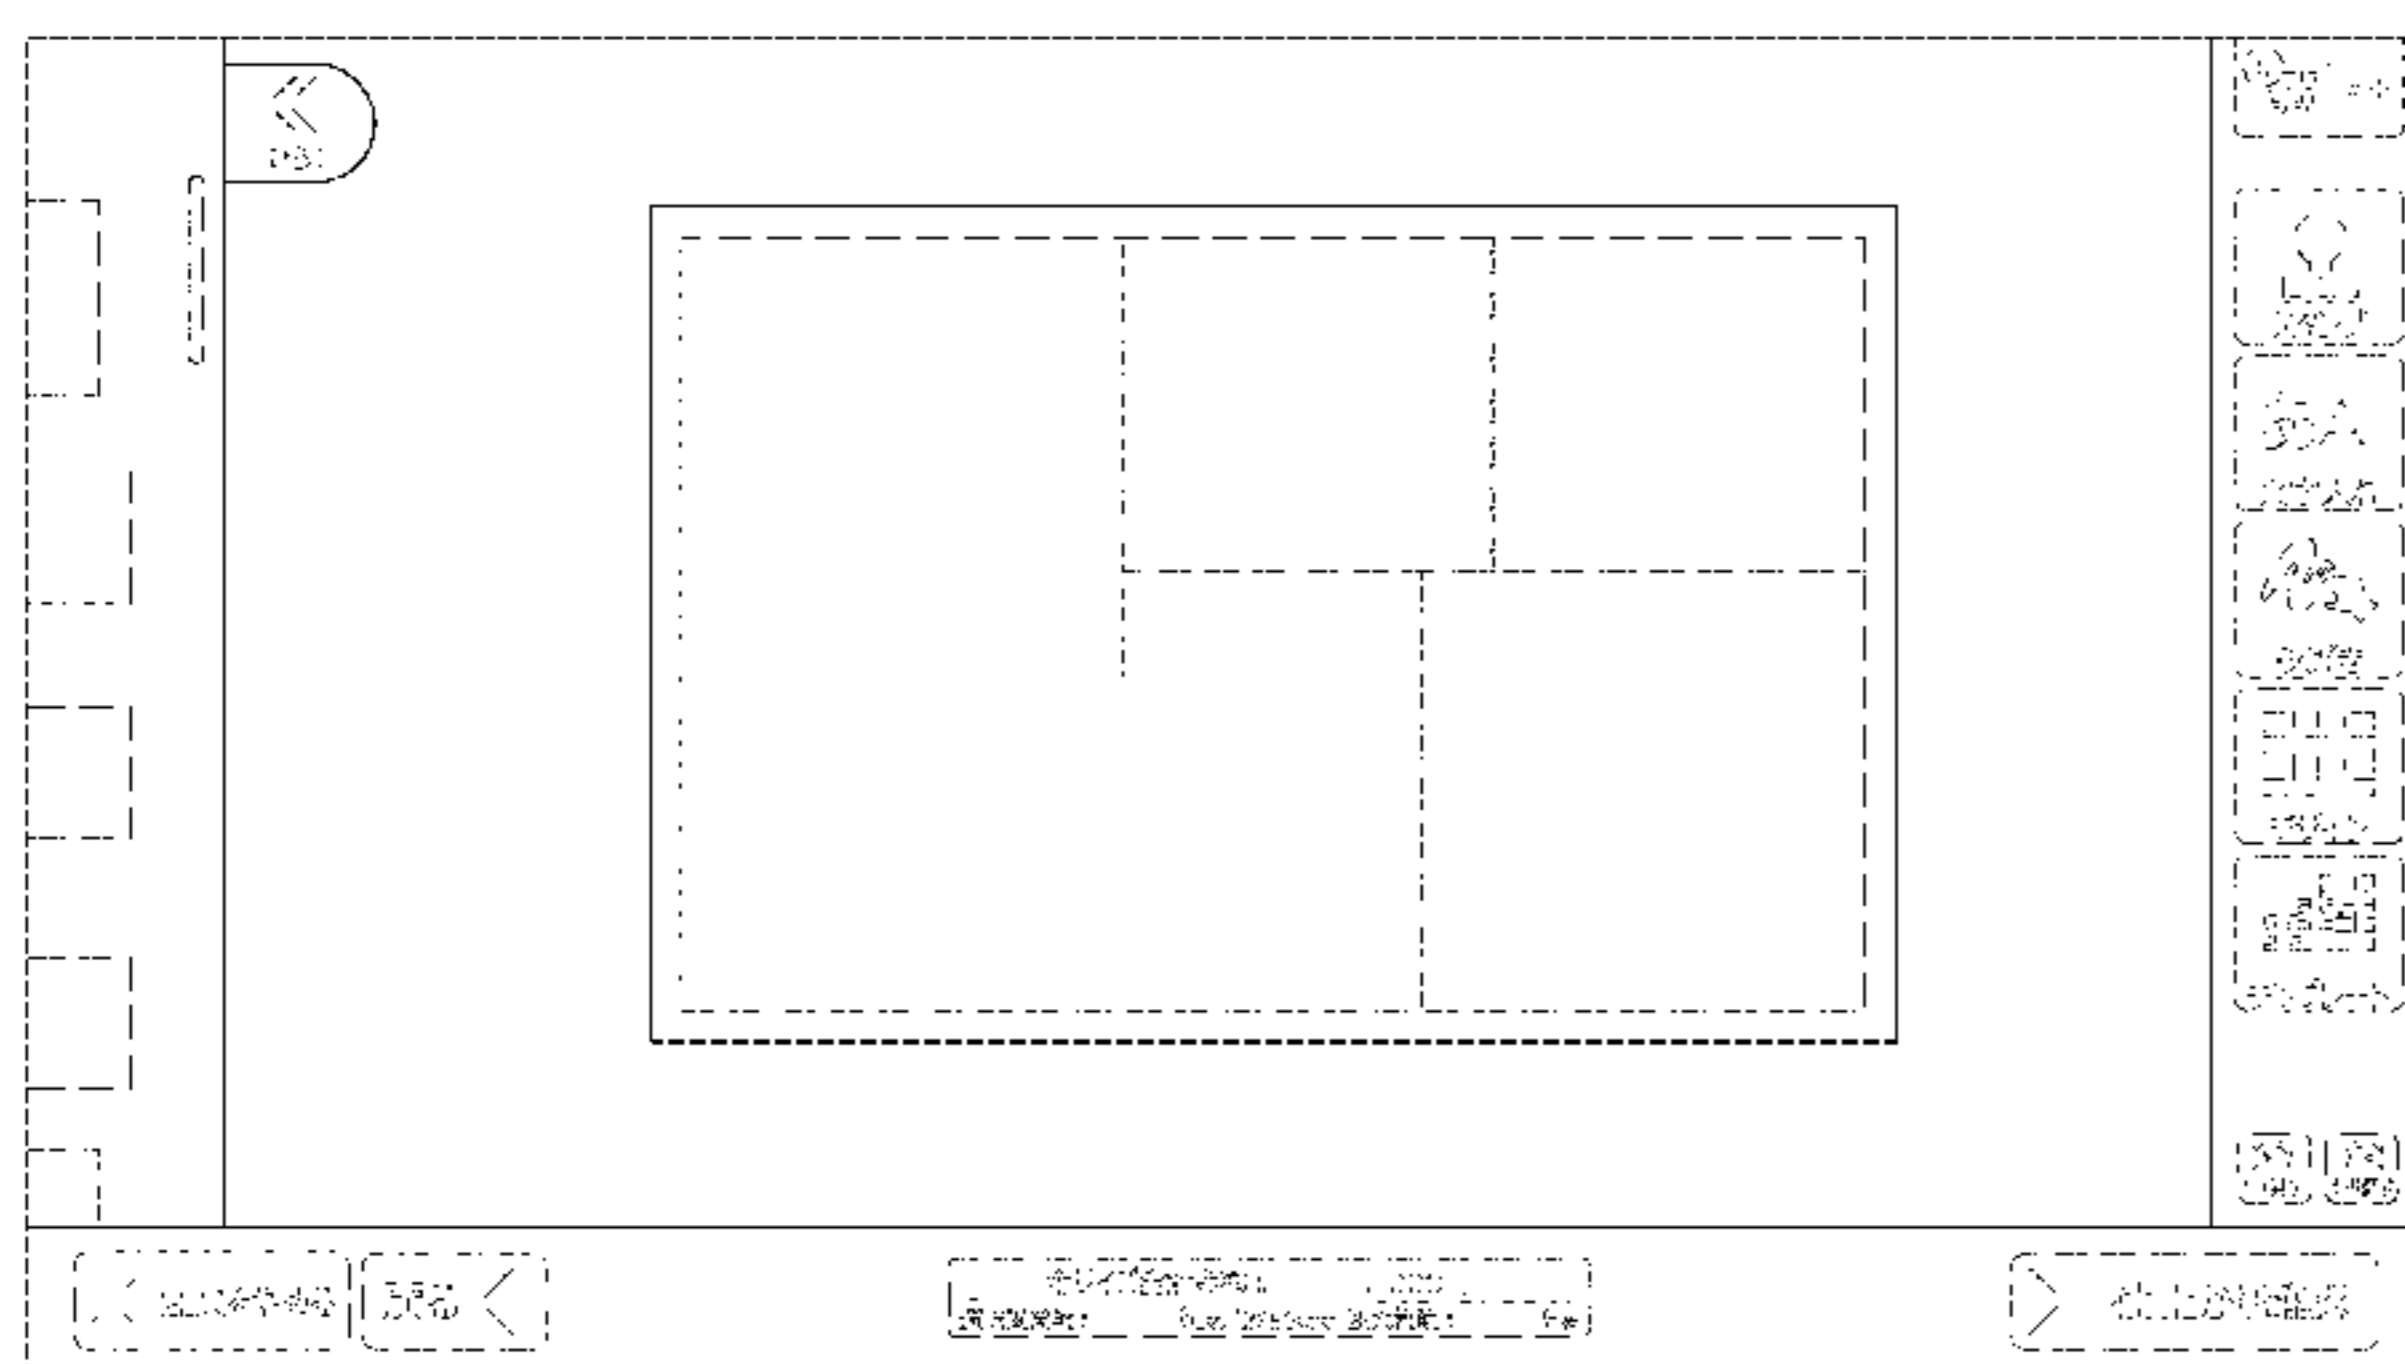

FIG. 1 is a top, front and left side perspective view of a display screen with graphical user interface shown in the environment of an image-printing, order-receiving terminal, showing my new design;

FIG. 2 is a front view of the display screen of FIG. 1, shown enlarged and isolated from its environment for clarity of disclosure, and showing the first image in a sequence; and, FIG. 3 is a front view thereof, showing the second image in a sequence.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design. The appearance of the transitional image transitions from FIG. 2 to FIG. 3.

The broken lines illustrate portions of a graphical user interface, and, in FIG. 1, an image-printing, order-receiving terminal as the environment of the claimed design. The broken lines form no part of the claimed design.

1 Claim, 3 Drawing Sheets
