(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

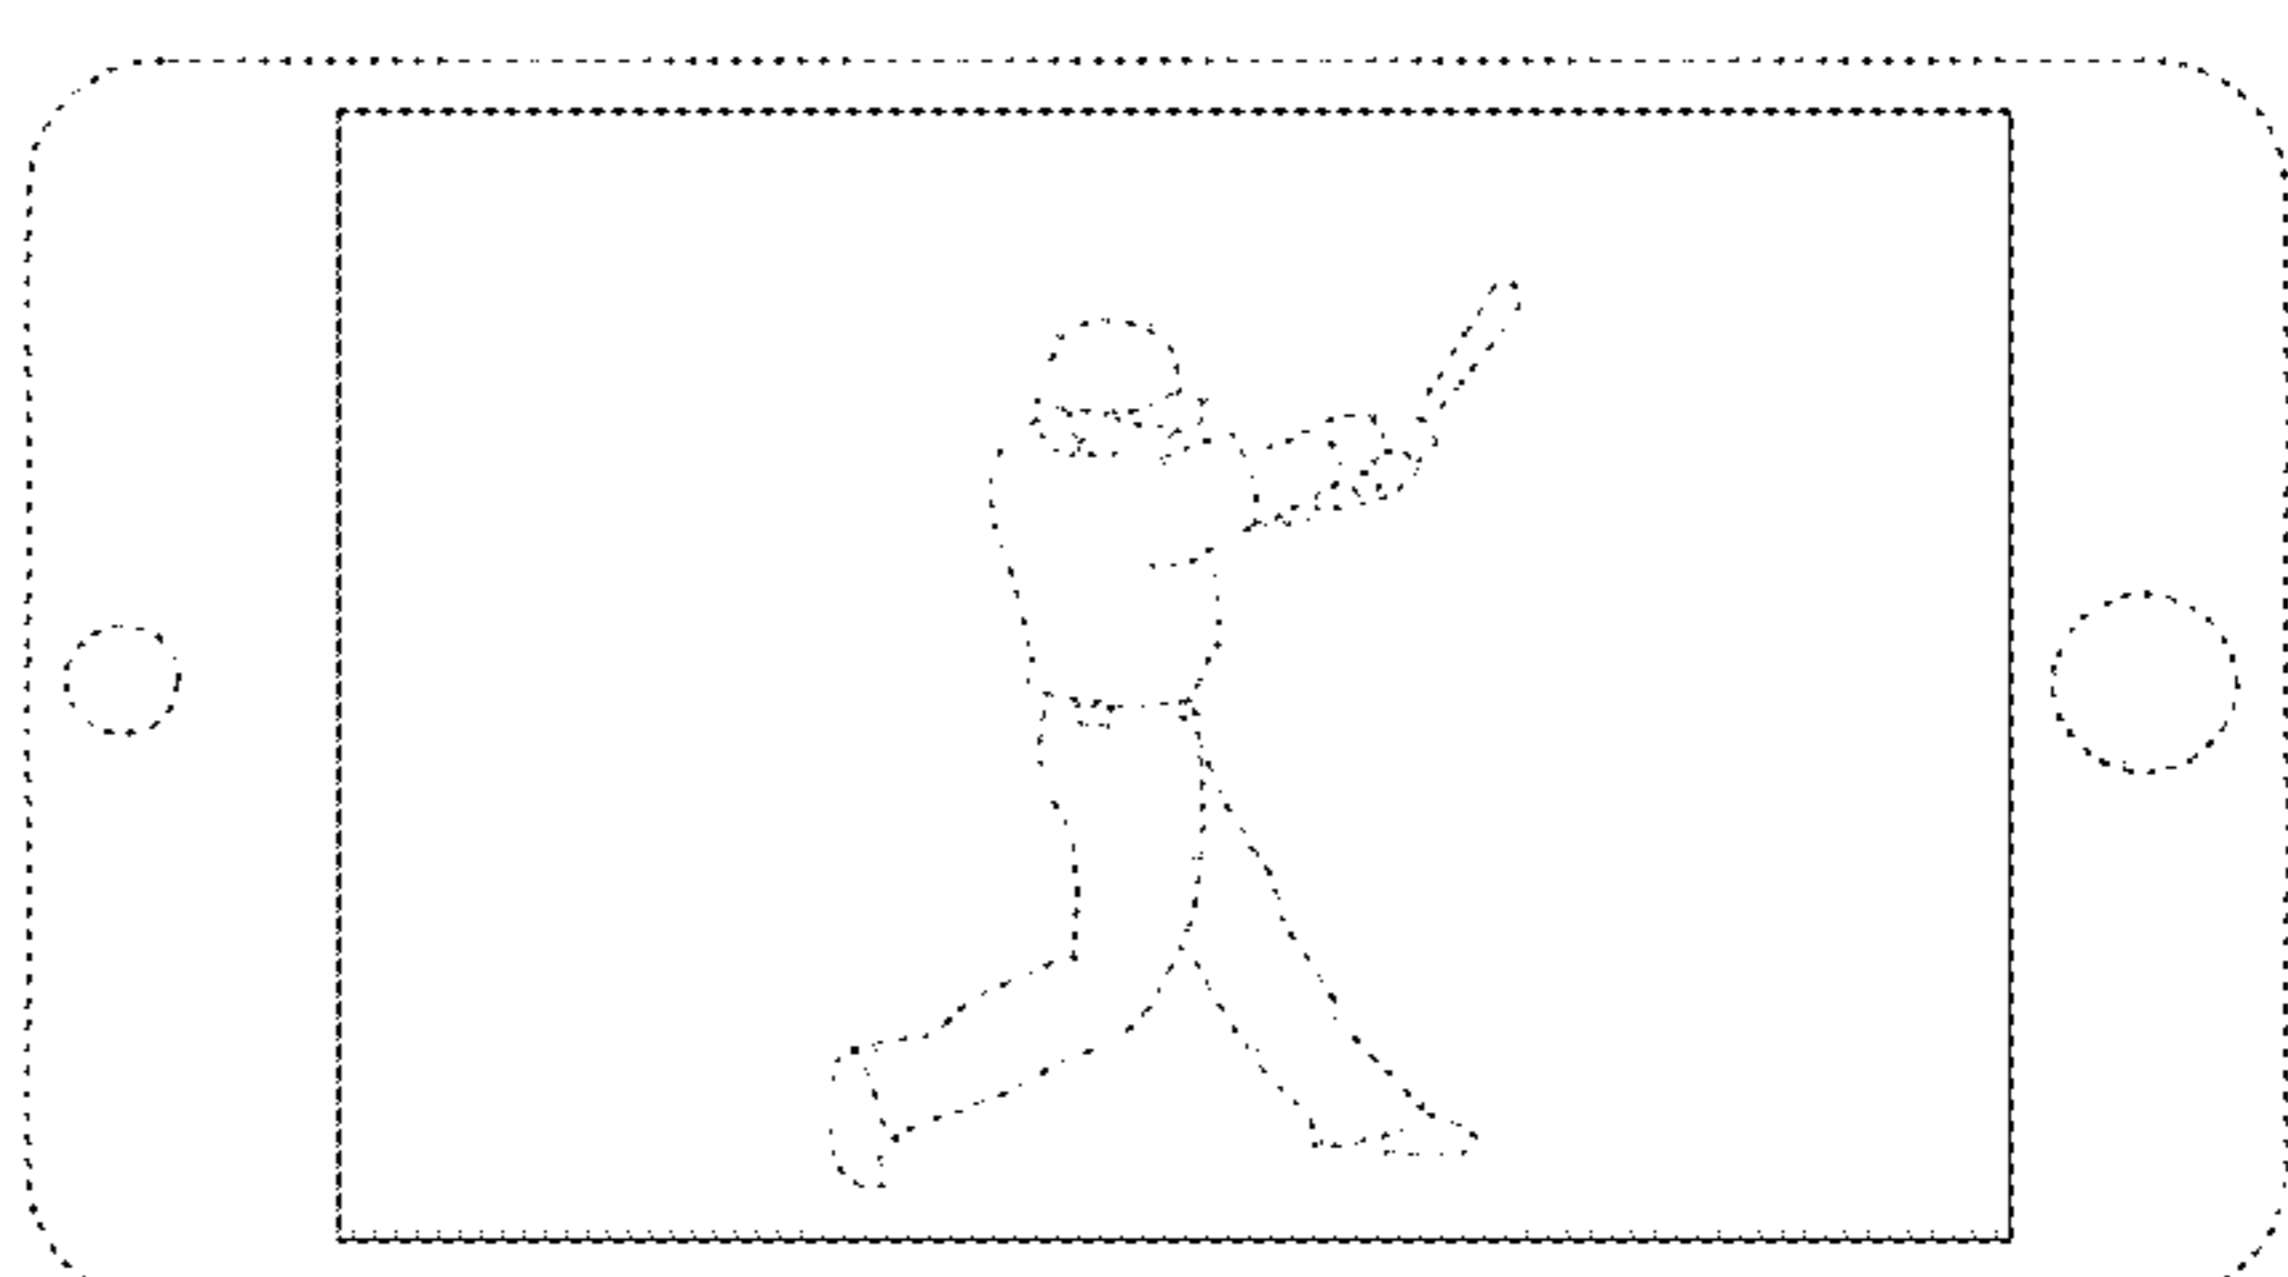

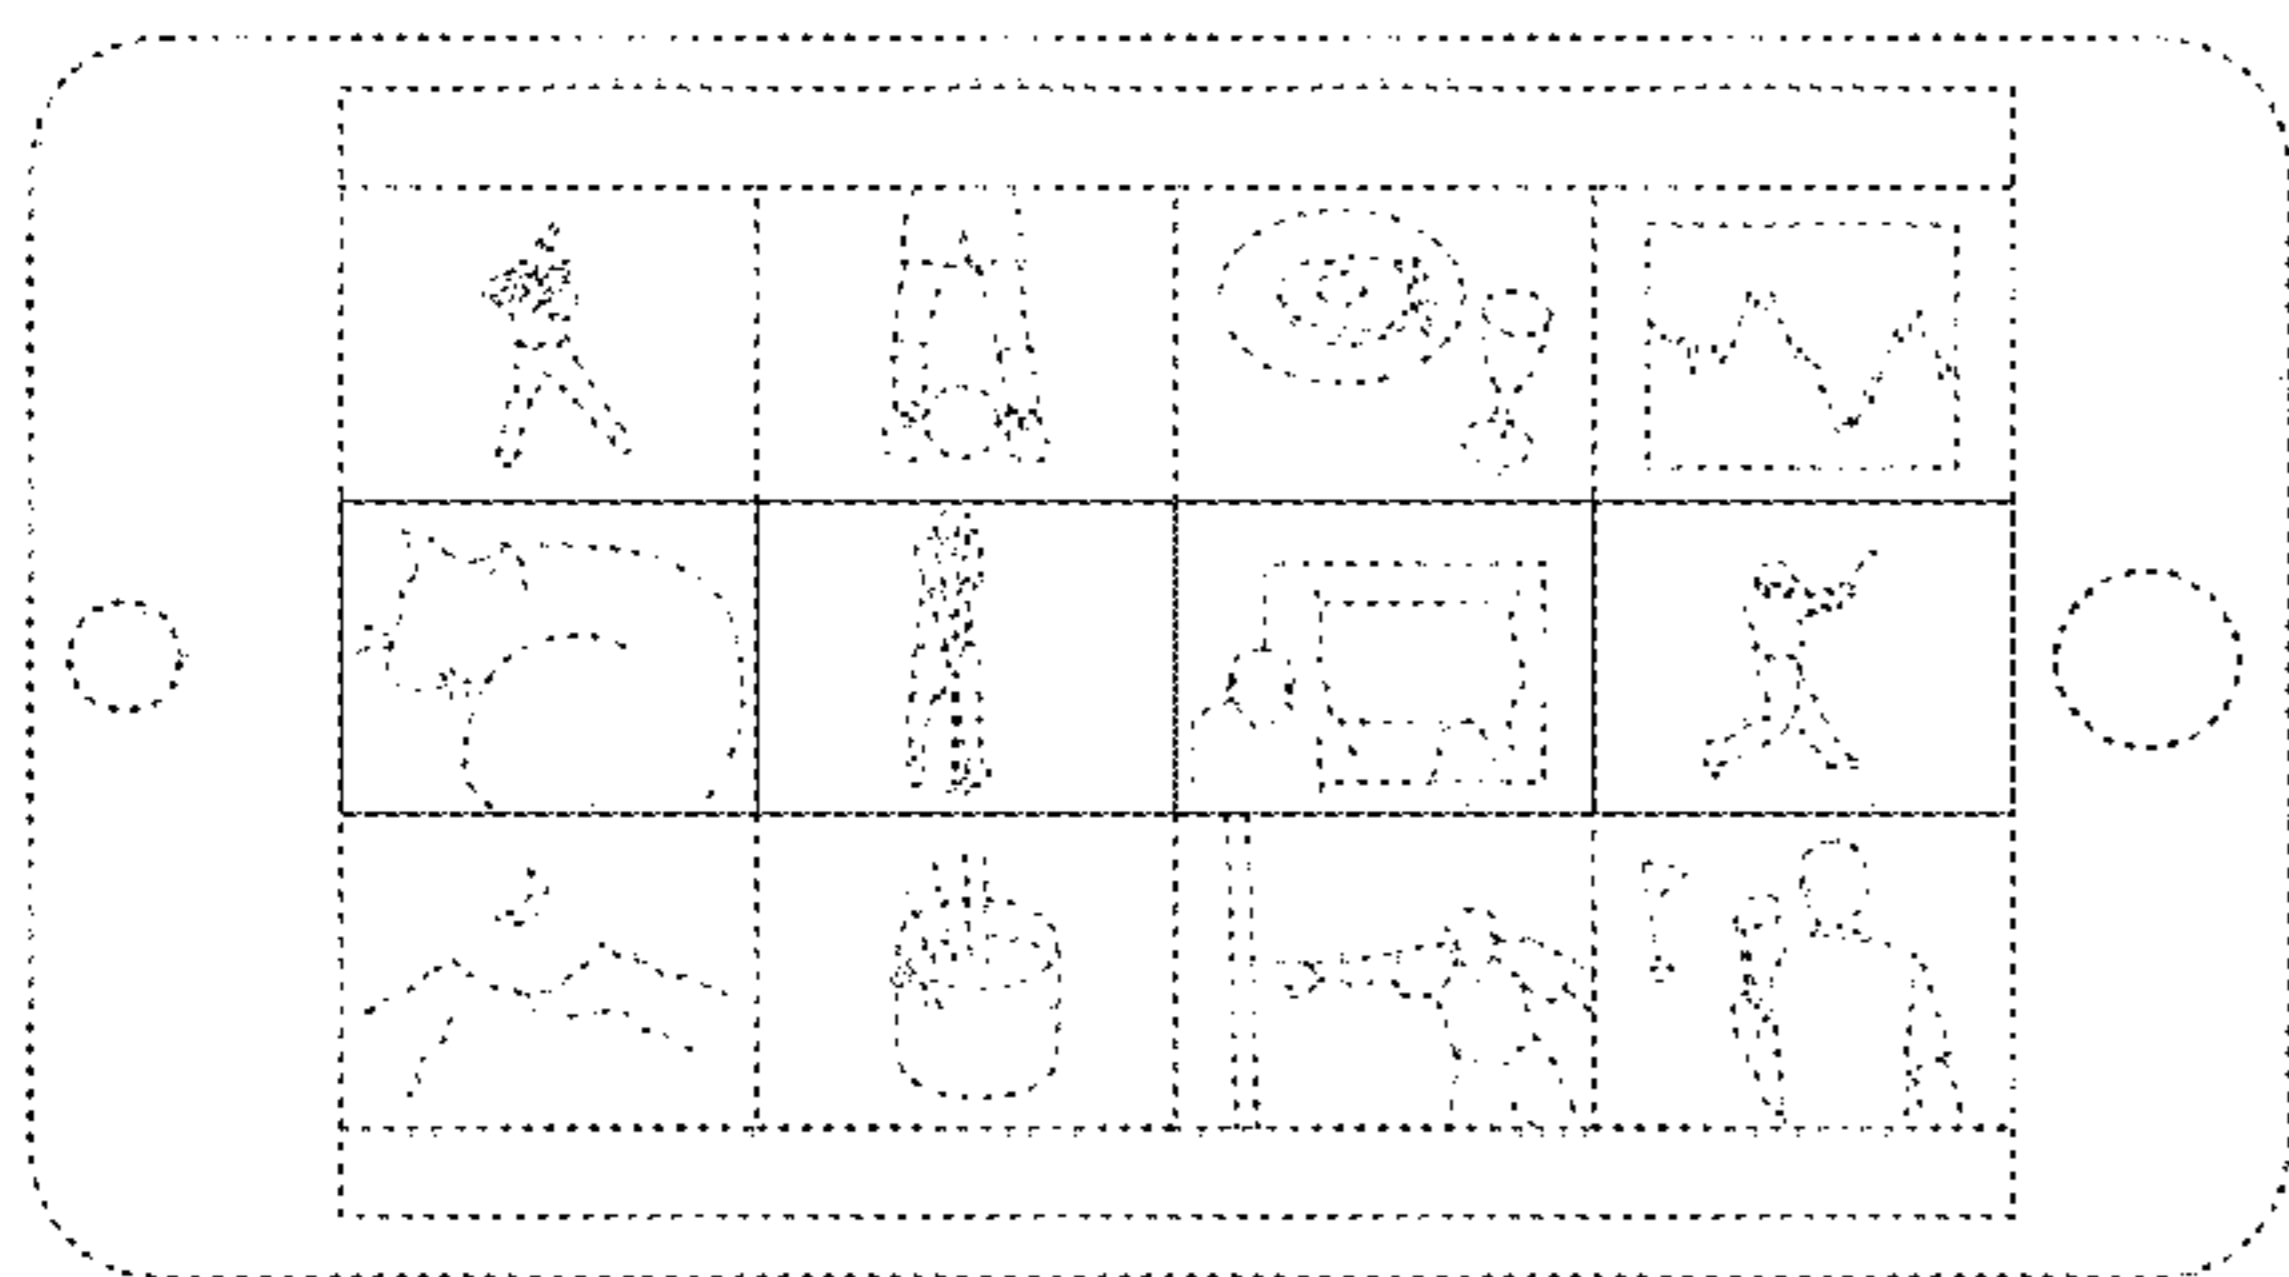

DESCRIPTION

FIG. 1 is a first image of a front view of a display screen with graphical user interface showing our new design; and FIG. 2 is a second image thereof.

FIG. 3 is a front view of FIG. 1 in the configuration when the display screen is rotated vertically; and, FIG. 4 is an alternative front view of FIG. 1 in the configuration when the display screen is rotated vertically.

The appearance of the animated graphical user interface sequentially transitions between FIGS. 1, 2 and 3, or between FIGS. 1, 2 and 4. The process or period in which one image transitions to another image forms no part of the claimed design. The broken lines represent a display screen and environmental element and form no part of the claim.
