(57) **CLAIM**

The ornamental design for a display screen with an animated graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a first image in a sequence for a display screen with an animated graphical user interface, according to a first embodiment;

FIG. 2 is a front view of a second image thereof;

FIG. 3 is a front view of a third image thereof;

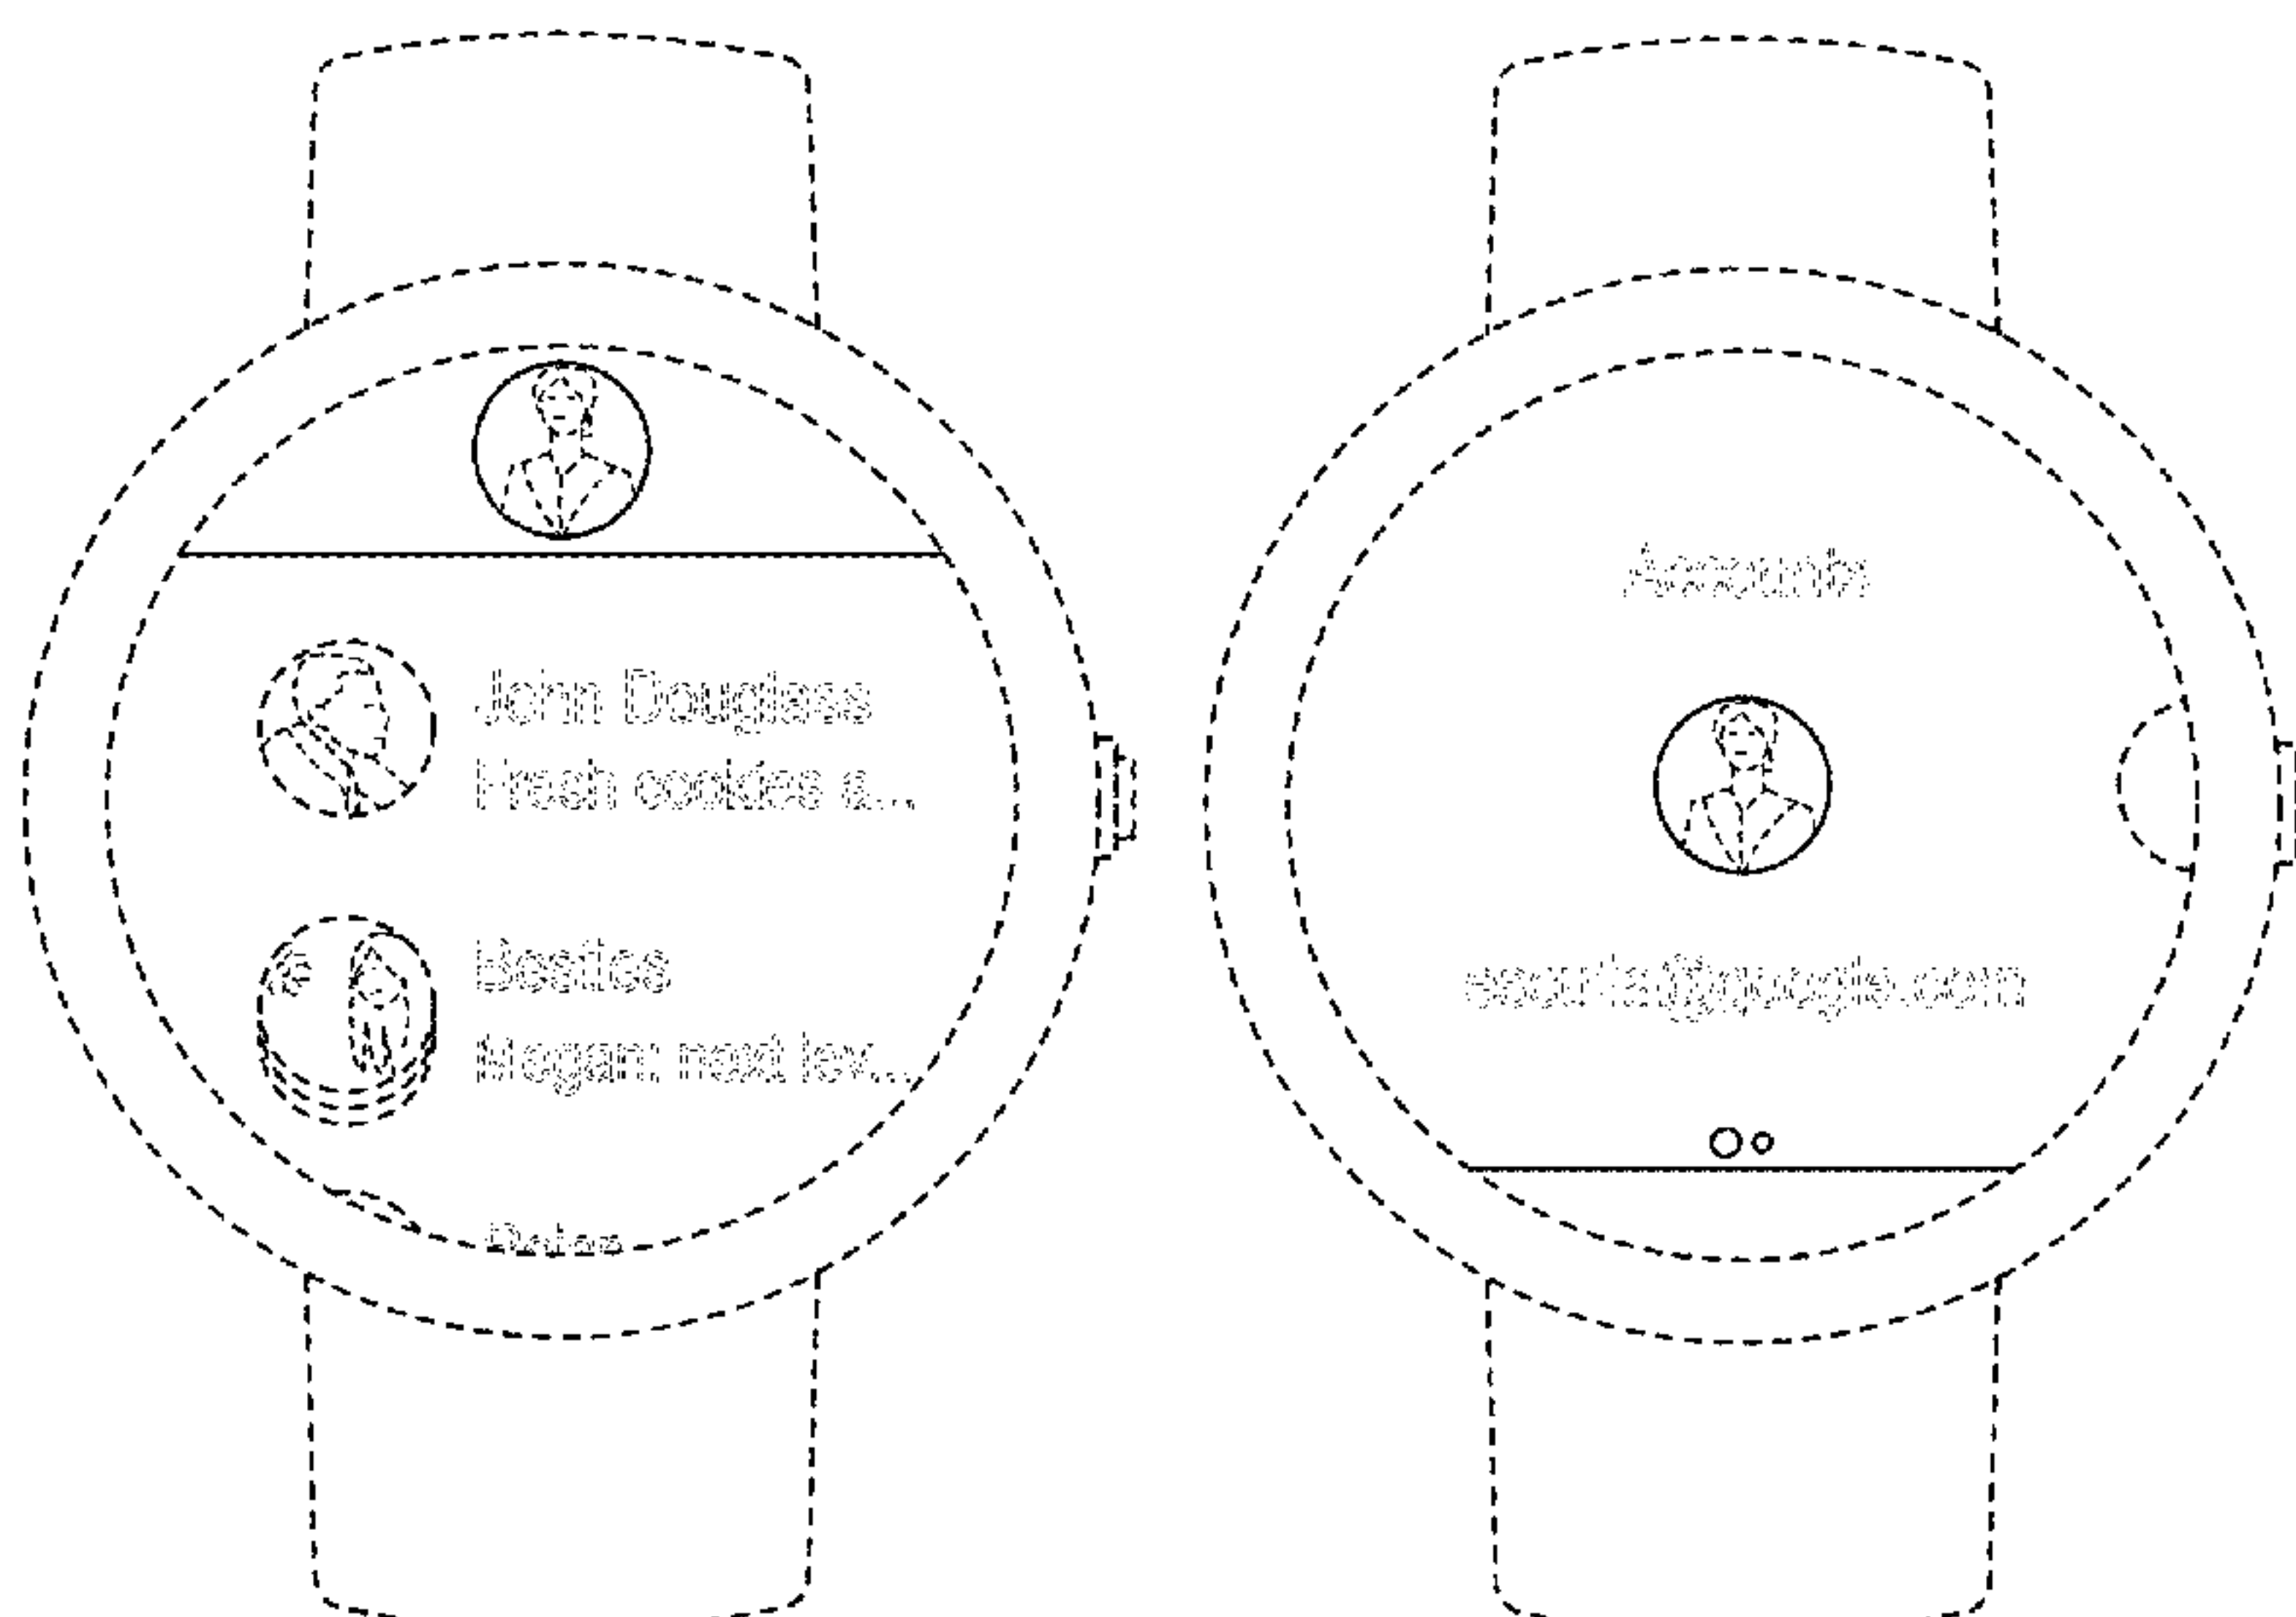

FIG. 4 is a front view of a fourth image thereof; and,

FIG. 5 is a front view of a fifth image in a sequence for a display screen with an animated graphical user interface, according to a second embodiment thereof where FIGS. 1-4 comprise the first four images in the sequence.

The subject matter of this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design. The appearance of the transitional image of a first embodiment transitions sequentially between the images shown in FIGS. 1-4. The appearance of the transitional image of a second embodiment transitions sequentially from the images shown in FIG. 1-5.

The outermost broken lines illustrate environmental subject matter. The remaining broken lines illustrate the display screen and portions of the graphical user interface. The broken lines form no part of the claimed design.
