(57) **CLAIM**

The ornamental design for a head cap housing for brain signal sensing, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a head cap housing for brain signal sensing showing our new design shown with an exemplary head cap and electrodes;
FIG. 2 is front perspective view of the head cap housing for brain signal sensing shown in FIG. 1;
FIG. 3 is a rear perspective view of the head cap housing for brain signal sensing shown in FIG. 1;
FIG. 4 is a front elevational view of the head cap housing for brain signal sensing shown in FIG. 1;
FIG. 5 is a rear elevational view of the head cap housing for brain signal sensing shown in FIG. 1;
FIG. 6 is a left-side elevational view of the head cap housing for brain signal sensing shown in FIG. 1;
FIG. 7 is a right-side elevational view of the head cap housing for brain signal sensing shown in FIG. 1;
FIG. 8 is a top plan view of the head cap housing for brain signal sensing shown in FIG. 1; and,
FIG. 9 is a bottom plan view of the head cap housing for brain signal sensing shown in FIG. 1.
The broken lines showing an exemplary cap portion of the head cap housing for brain signal sensing and electrodes shown in FIG. 1 are for the purposes of illustrating environmental structure. The broken lines immediately adjacent the shaded areas without adjacent shading on both sides of the broken line represent the bounds of the claimed design. All other broken lines are directed to environment and are for illustrative purposes only; the broken lines form no part of the claimed design.
