DESCRIPTION

FIG. 1 is a rear isometric view of an aircraft passenger control console with USB port, with a recessed trapezoidal keypad and rectangular USB port in the left-front side surface, showing my new design;

FIG. 2 is a front isometric view thereof;

FIG. 3 is a top view thereof;

FIG. 4 is a bottom view thereof;

FIG. 5 is a rear side view thereof;

FIG. 6 is a front side view thereof;

FIG. 7 is a left side view thereof;

FIG. 8 is a right side view thereof;

FIGS. 9 and 10 are a rear isometric view and a front isometric view respectively thereof with an alternative flush trapezoidal keypad;

FIGS. 11 and 12 are a rear isometric view and a front isometric view respectively thereof with an alternative flush oval keypad;

FIGS. 13 and 14 are a rear isometric view and a front isometric view respectively thereof with an alternative raised trapezoidal keypad; and

FIGS. 15 and 16 are a rear isometric view and a front isometric view respectively thereof with an alternative flush rectangular keypad;

FIG. 17 is a rear isometric view of another embodiment of my design with a recessed trapezoidal keypad;

FIG. 18 is a front isometric view thereof showing a rectangular USB port in the left-front side surface;

FIG. 19 is a top view thereof;

FIG. 20 is a bottom view thereof;

FIG. 21 is a rear side view thereof;

FIG. 22 is a front side view thereof;

FIG. 23 is a right side view thereof;

FIG. 24 is a left side view thereof;

(Continued)

FIGS. 25 and 26 are a rear isometric view and a front isometric view respectively thereof with an alternative flush trapezoidal keypad;
 FIGS. 27 and 28 are a rear isometric view and a front isometric view respectively thereof with an alternative flush oval keypad;
 FIGS. 29 and 30 are a rear isometric view and a front isometric view respectively thereof with an alternative raised trapezoidal keypad; and
 FIGS. 31 and 32 are a rear isometric view and a front isometric view respectively thereof with an alternative flush rectangular keypad;
 FIG. 33 is a front isometric view of yet another embodiment of my design with a recessed trapezoidal keypad;
 FIG. 34 is a rear isometric view thereof showing a rectangular USB port in the rear side surface;
 FIG. 35 is a top view thereof;
 FIG. 36 is a bottom view thereof;
 FIG. 37 is a front side view thereof;
 FIG. 38 is a rear side view thereof;
 FIG. 39 is a left side view thereof;
 FIG. 40 is a right side view thereof;
 FIGS. 41 and 42 are a rear isometric view and a front isometric view respectively thereof with an alternative flush trapezoidal keypad and showing a rectangular USB port in the front side surface;
 FIGS. 43 and 44 are a rear isometric view and a front isometric view respectively thereof with an alternative flush oval keypad and showing a rectangular USB port in the front side surface;
 FIGS. 45 and 46 are a rear isometric view and a front isometric view respectively thereof with an alternative raised trapezoidal keypad and showing a rectangular USB port in the front side surface; and,
 FIGS. 47 and 48 are a rear isometric view and a front isometric view respectively thereof with an alternative flush rectangular keypad and showing a rectangular USB port in the front side surface.
 In the drawings, the broken lines depict environmental subject matter only and form no part of the claimed design.
