(57) **CLAIM**

The ornamental design for the aircraft passenger control console with USB port, as shown and described.

DESCRIPTION

FIG. 1 is a rear isometric view of an aircraft passenger control console with USB port, with a recessed trapezoidal keypad and rectangular keypad-USB rocker in the top surface in a closed position, showing my new design;

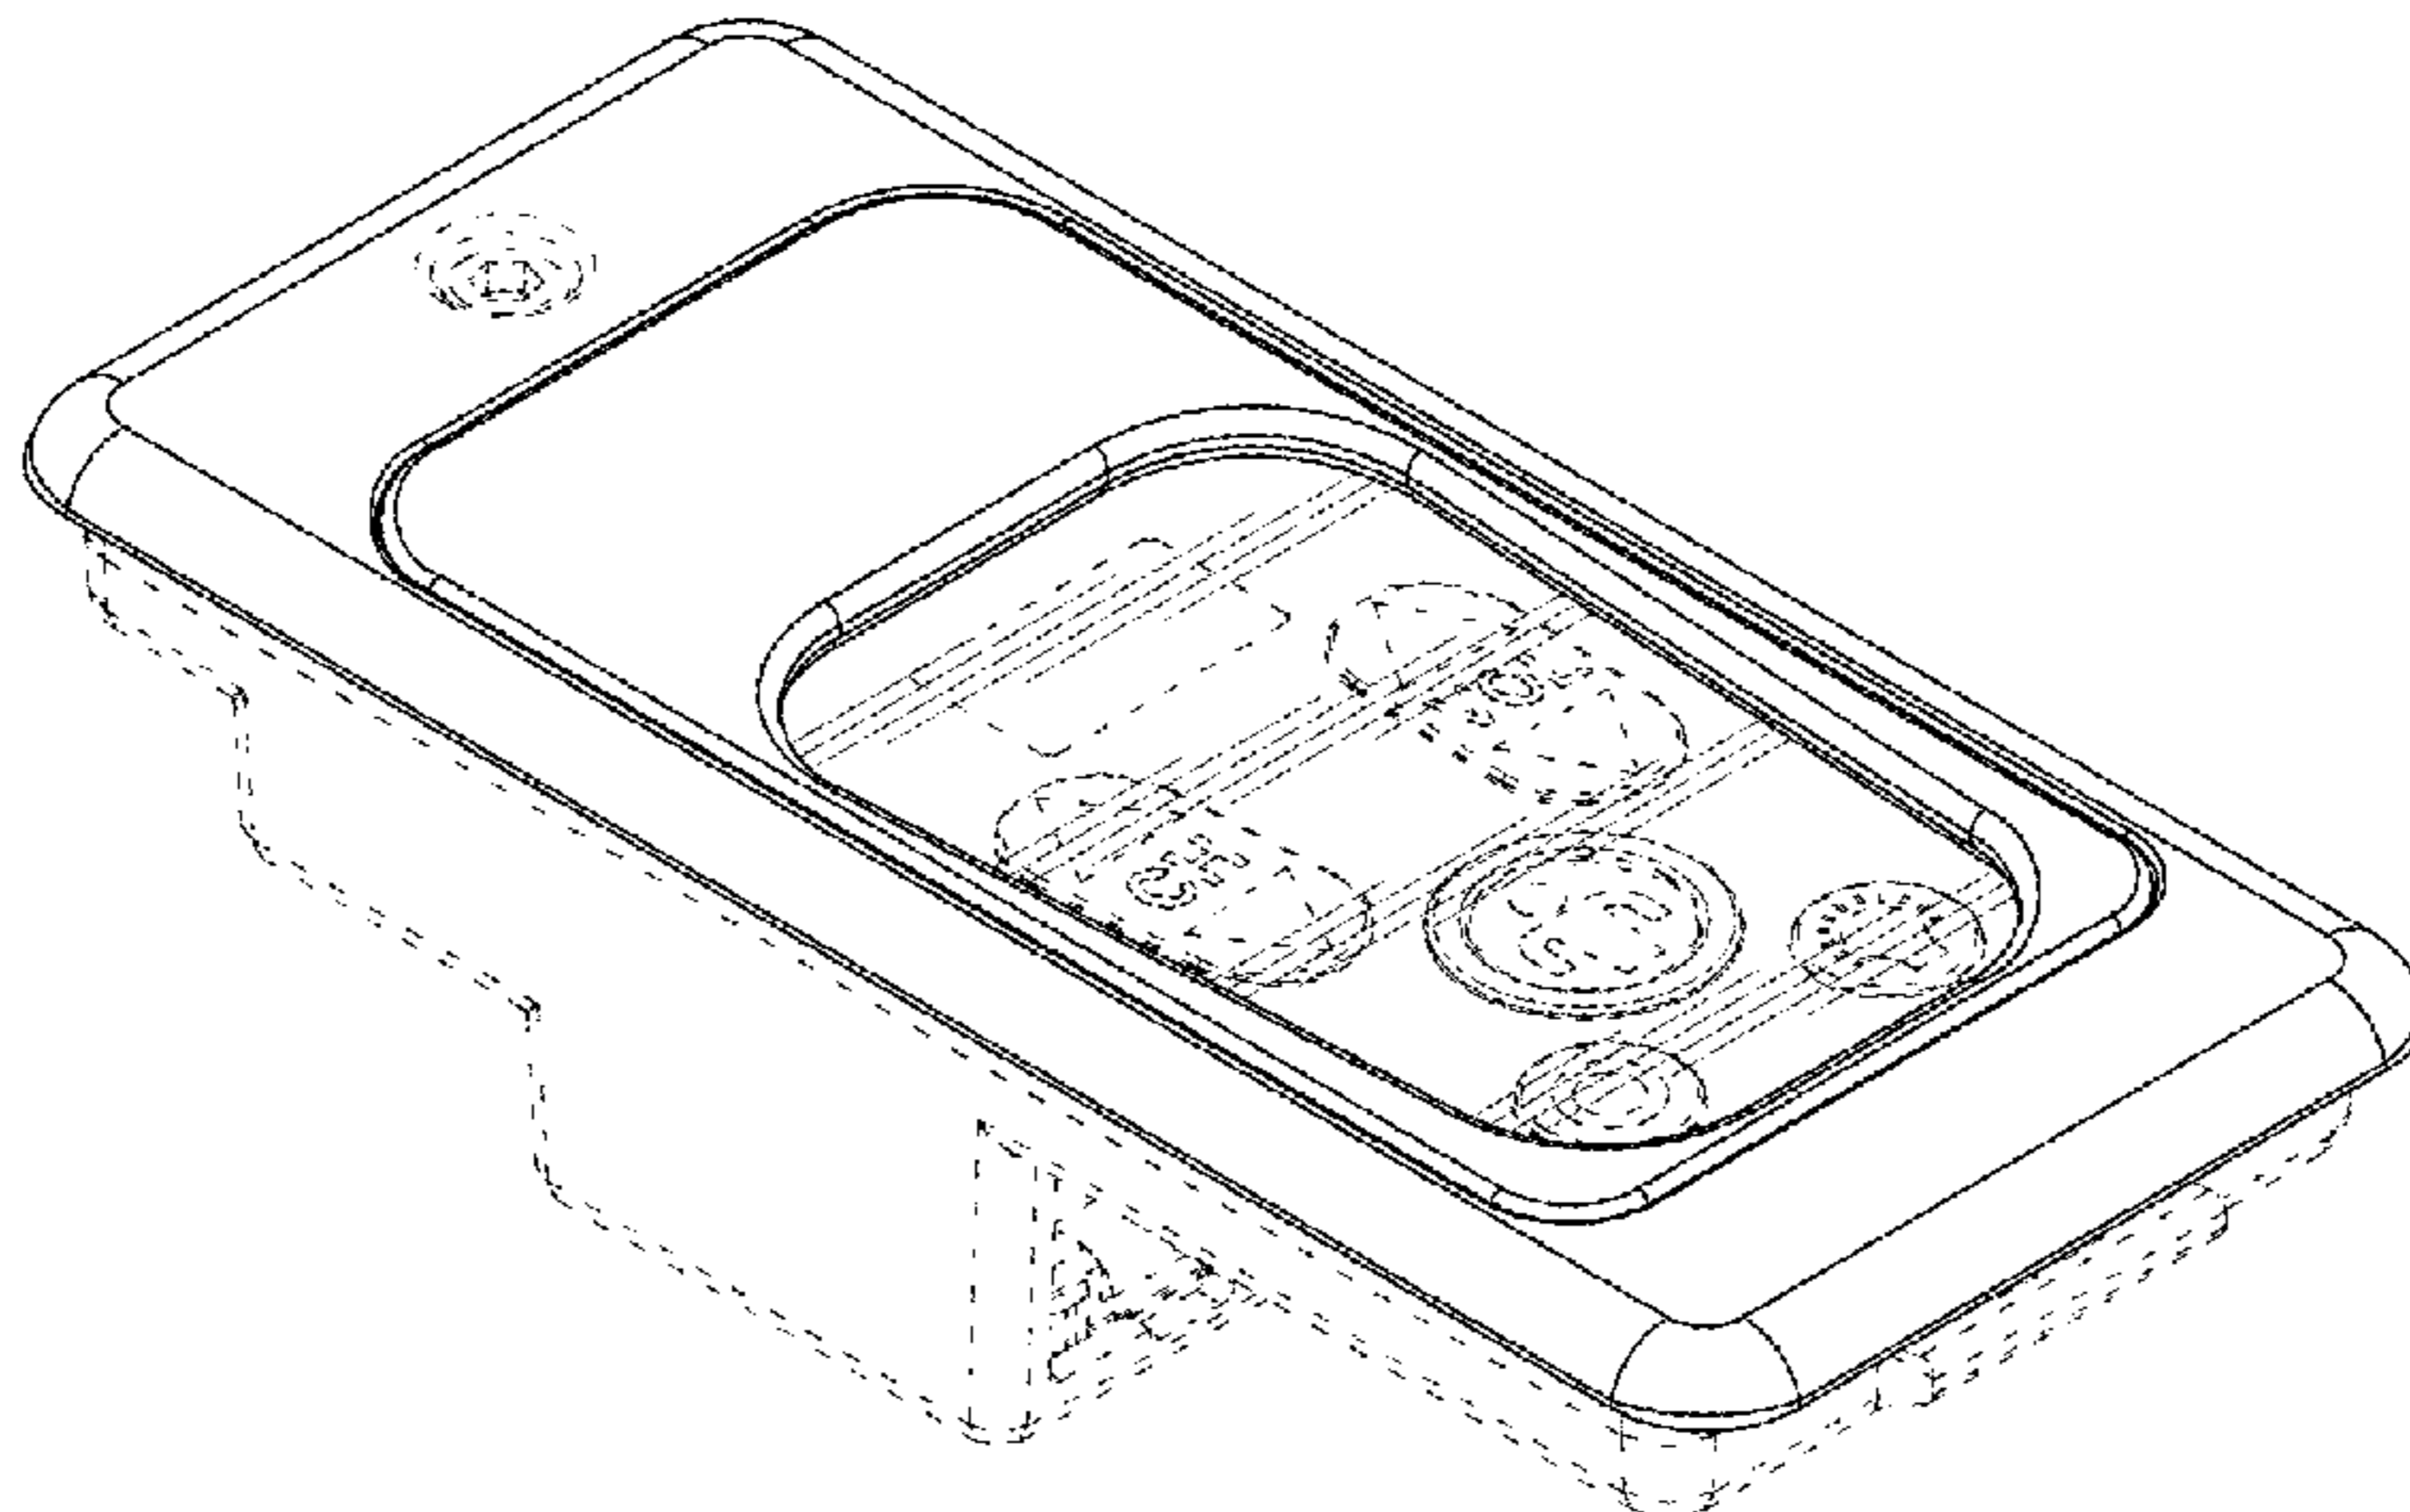

FIG. 2 is a front isometric view thereof with the keypad-USB rocker in the closed position;
 FIG. 3 is a rear isometric view thereof with the keypad-USB rocker in an open position;
 FIG. 4 is a front isometric view thereof with the keypad-USB rocker in an open position;
 FIG. 5 is a top view thereof with the keypad-USB rocker in the closed position;
 FIG. 6 is a top view thereof with the keypad-USB rocker in the open position;
 FIG. 7 is a rear view thereof with the keypad-USB rocker in the closed position;
 FIG. 8 is a rear view thereof with the keypad-USB rocker in the open position;
 FIG. 9 is a front view thereof with the keypad-USB rocker in the closed position;
 FIG. 10 is a front view thereof with the keypad-USB rocker in the open position;
 FIG. 11 is a left side view thereof with the keypad-USB rocker in the closed position;
 FIG. 12 is a left side view thereof with the keypad-USB rocker in the open position;
 FIG. 13 is a right side view thereof with the keypad-USB rocker in the closed position;
 FIG. 14 is a right side view thereof with the keypad-USB rocker in the open position;
 FIG. 15 is a bottom view thereof;
 FIGS. 16 and 17 are a rear isometric view and a front isometric view respectively thereof with an alternative flush trapezoidal keypad and with the keypad-USB rocker in the open position;
 FIGS. 18 and 19 are a rear isometric view and a front isometric view respectively thereof with an alternative flush oval keypad and with the keypad-USB rocker in the open position;
 FIGS. 20 and 21 are a rear isometric view and a front isometric view respectively thereof with an alternative flush rectangular keypad and with the keypad-USB rocker in the open position;
 FIG. 22 is a rear isometric view of another embodiment of my design with a recessed trapezoidal keypad and rectangular keypad-USB rocker in the top surface in a closed position;
 FIG. 23 is a front isometric view thereof with the keypad-USB rocker in the closed position;
 FIG. 24 is a rear isometric view thereof with the keypad-USB rocker in an open position;
 FIG. 25 is a front isometric view thereof with the keypad-USB rocker in an open position;
 FIG. 26 is a top view thereof with the keypad-USB rocker in the closed position;
 FIG. 27 is a top view thereof with the keypad-USB rocker in the open position;
 FIG. 28 is a rear view thereof with the keypad-USB rocker in the closed position;
 FIG. 29 is a rear view thereof with the keypad-USB rocker in the open position;
 FIG. 30 is a front view thereof with the keypad-USB rocker in the closed position;
 FIG. 31 is a front view thereof with the keypad-USB rocker in the open position;
 FIG. 32 is a left side view thereof with the keypad-USB rocker in the closed position;

FIG. 33 is a left side view thereof with the keypad-USB rocker in the open position;
 FIG. 34 is a right side view thereof with the keypad-USB rocker in the closed position;
 FIG. 35 is a right side view thereof with the keypad-USB rocker in the open position;
 FIG. 36 is a bottom view thereof;
 FIGS. 37 and 38 are a rear isometric view and a front isometric view respectively thereof with an alternative flush trapezoidal keypad and with the keypad-USB rocker in the open position;
 FIGS. 39 and 40 are a rear isometric view and a front isometric view respectively thereof with an alternative flush oval keypad and with the keypad-USB rocker in the open position;
 FIGS. 41 and 42 are a rear isometric view and a front isometric view respectively thereof with an alternative flush rectangular keypad and with the keypad-USB rocker in the open position;
 FIG. 43 is a front isometric view of my design with a recessed trapezoidal keypad and rectangular keypad-USB rocker in the top surface in a closed position;
 FIG. 44 is a rear isometric view thereof with the keypad-USB rocker in the closed position;
 FIG. 45 is a front isometric view thereof with the keypad-USB rocker in an open position;
 FIG. 46 is a rear isometric view thereof with the keypad-USB rocker in an open position;
 FIG. 47 is a top view thereof with the keypad-USB rocker in the closed position;
 FIG. 48 is a top view thereof with the keypad-USB rocker in the open position;
 FIG. 49 is a front view thereof with the keypad-USB rocker in the closed position;
 FIG. 50 is a front view thereof with the keypad-USB rocker in the open position;
 FIG. 51 is a rear view thereof with the keypad-USB rocker in the closed position;
 FIG. 52 is a rear view thereof with the keypad-USB rocker in the open position;
 FIG. 53 is a right side view thereof with the keypad-USB rocker in the closed position;
 FIG. 54 is a right side view thereof with the keypad-USB rocker in the open position;
 FIG. 55 is a left side view thereof with the keypad-USB rocker in the closed position;
 FIG. 56 is a left side view thereof with the keypad-USB rocker in the open position;
 FIG. 57 is a bottom view thereof;
 FIGS. 58 and 59 are a front isometric view and a rear isometric view respectively thereof with an alternative flush trapezoidal keypad and with the keypad-USB rocker in the open position;
 FIGS. 60 and 61 are a front isometric view and a rear isometric view respectively thereof with an alternative flush oval keypad and with the keypad-USB rocker in the open position; and,
 FIGS. 62 and 63 are a front isometric view and a rear isometric view respectively thereof with an alternative flush rectangular keypad and with the keypad-USB rocker in the open position.
 In the drawings, the broken lines depict environmental subject matter only and form no part of the claimed design.
