(57) **CLAIM**

The ornamental design for a display screen or portion thereof with color graphical user interface for automobile preconditioning control, as shown and described.

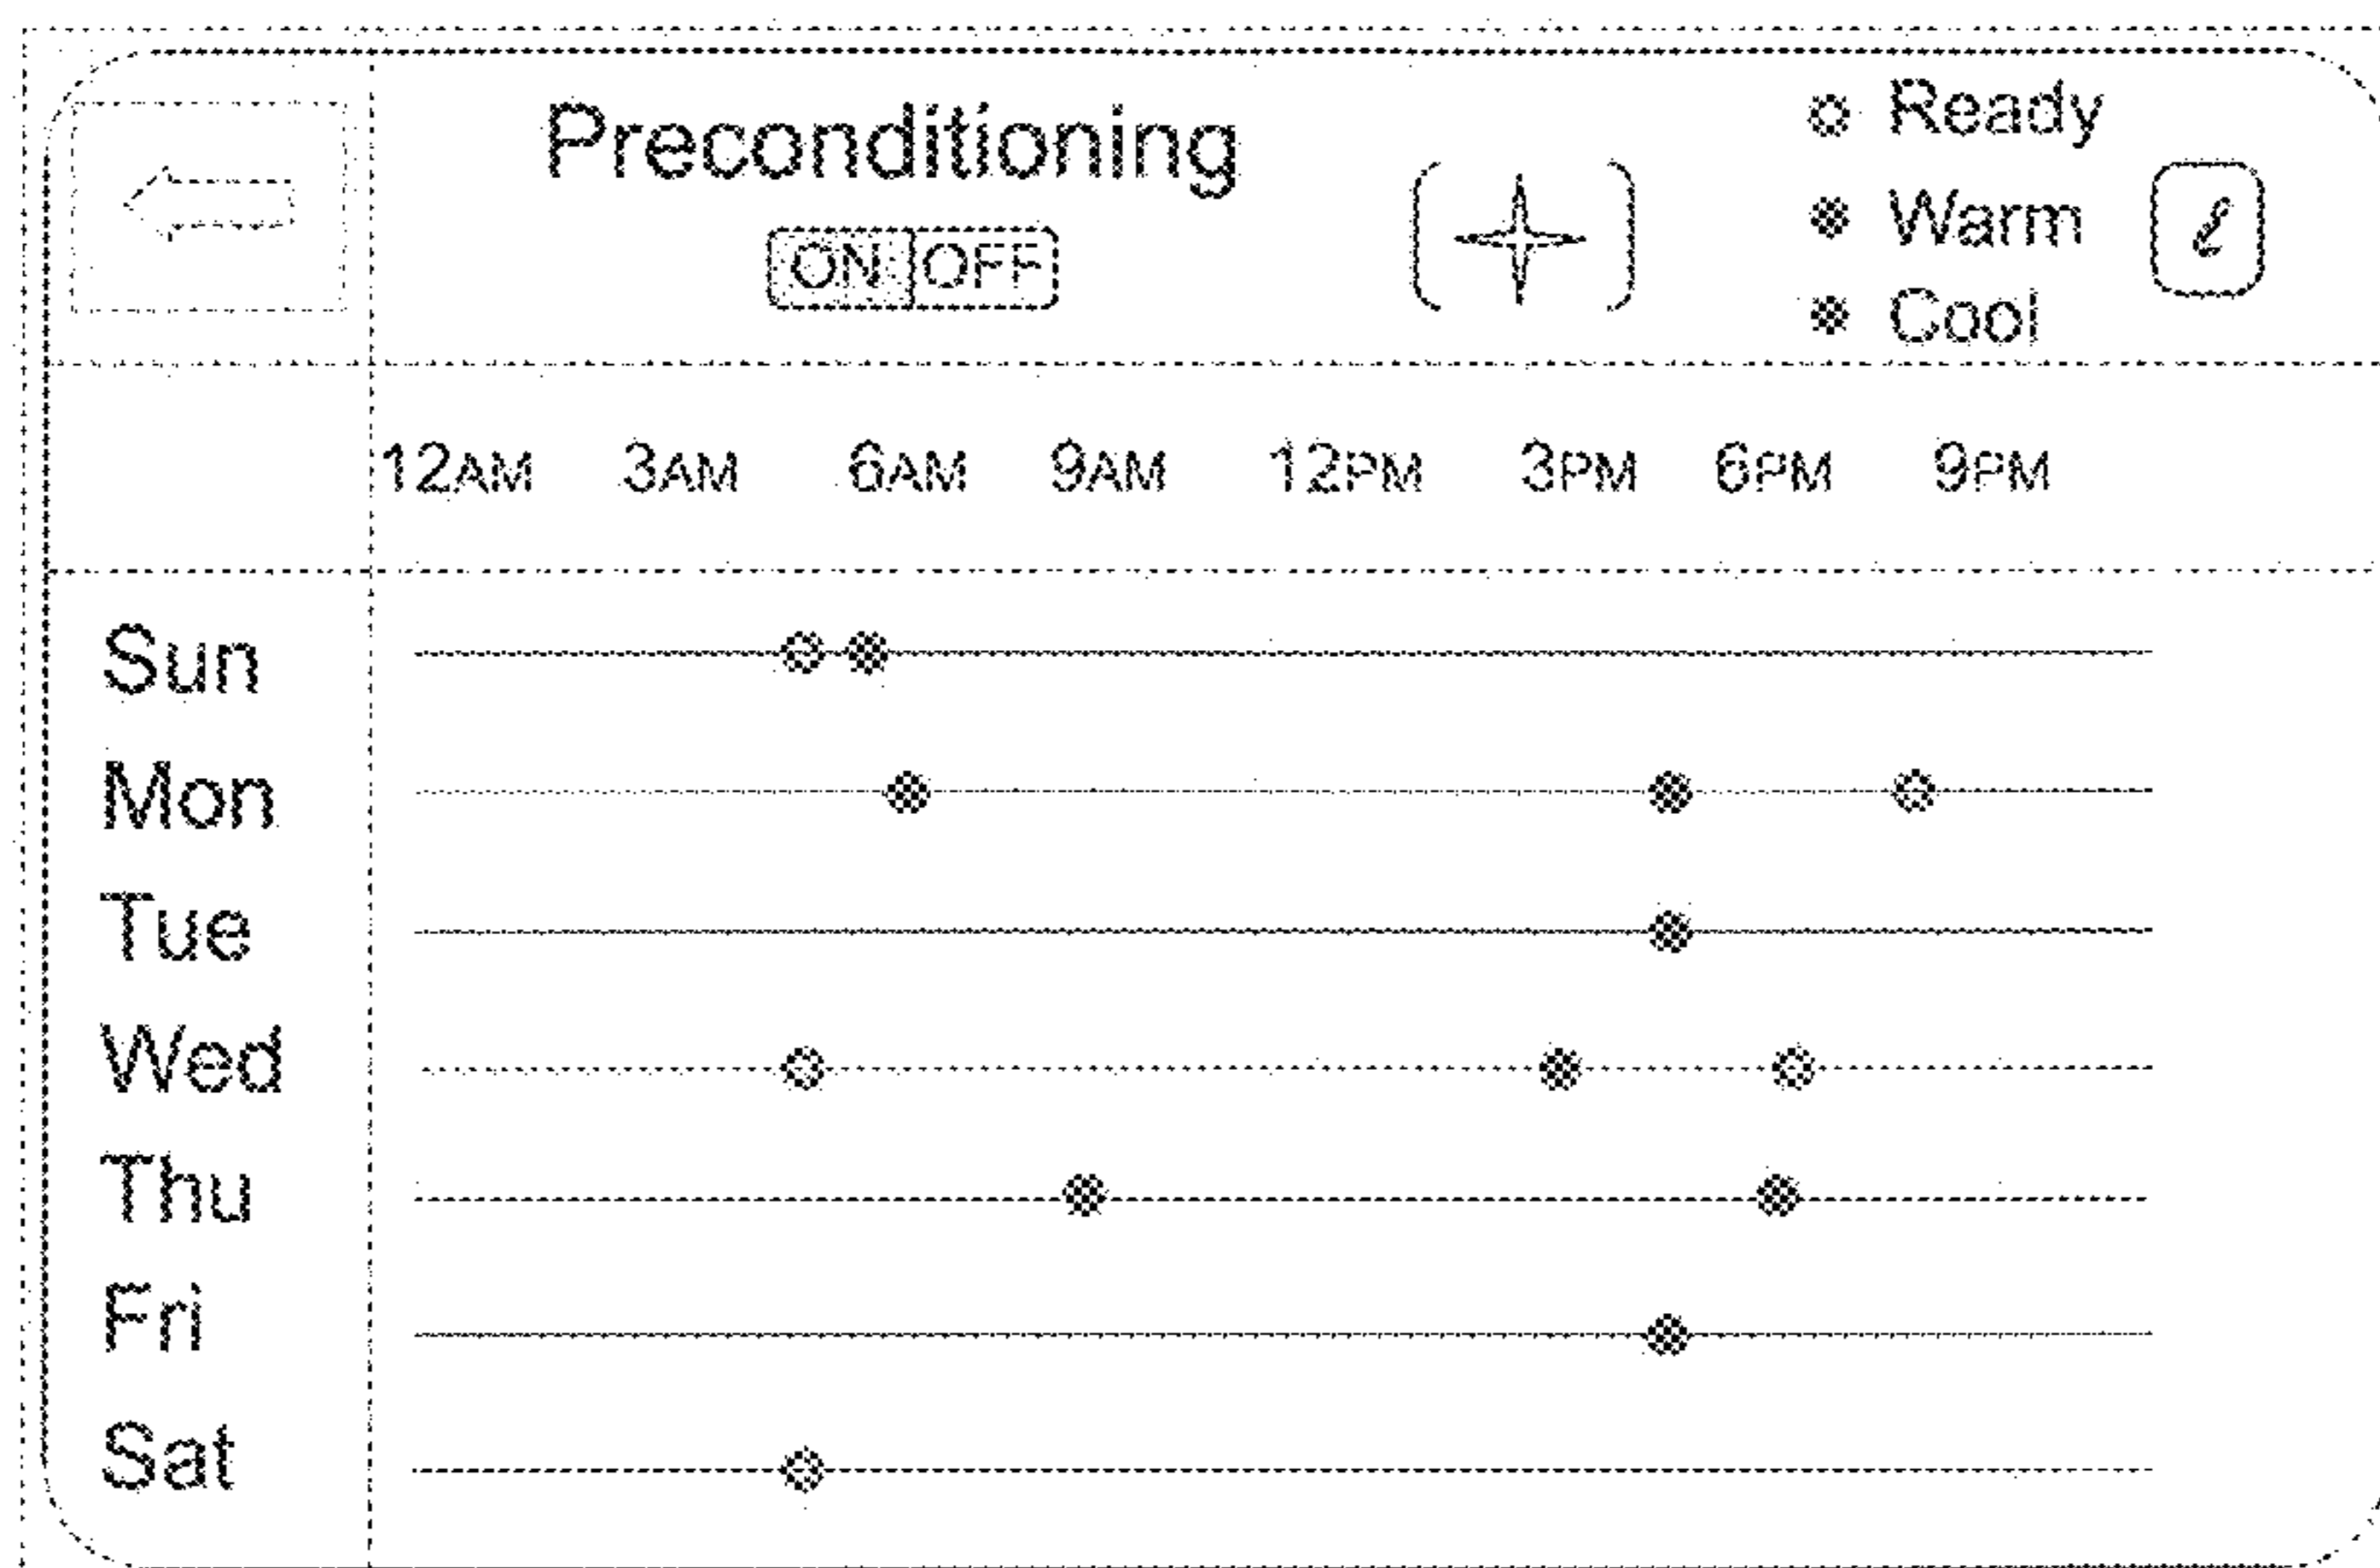

**DESCRIPTION**

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

The FIGURE is a front view of a display screen or portion thereof with color graphical user interface for automobile preconditioning control showing our new design.

The outermost broken lines illustrate a display screen or portion thereof. The remaining broken lines illustrate portions of the graphical user interface. None of the broken lines form part of the claimed design.
