(57) **CLAIM**

The ornamental design for a display panel portion with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display panel portion with transitional graphical user interface showing a first image in a sequence according to our new design; FIG. 2 is a front view of a second image thereof; FIG. 3 is a front view of a third image thereof; and, FIG. 4 is a front view of a fourth image thereof.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.

The broken lines shown in the drawings illustrate portions of the display panel or portion thereof with transitional graphical user interface that forms no part of the claimed design.

The stippling is used to portray the illusion of shading in the graphical user interface and forms part of the claimed design.
