(57) **CLAIM**
The ornamental design for a watch, as shown and described.

DESCRIPTION

FIG. 1 is a first top plan view in a sequence of a watch with an animated dial showing my new design;
FIG. 2 is a second top plan view in a sequence thereof;
FIG. 3 is a third top plan view in a sequence thereof;
FIG. 4 is a fourth top plan view in a sequence thereof;
FIG. 5 is a fifth top plan view in a sequence thereof;
FIG. 6 is a sixth top plan view in a sequence thereof;
FIG. 7 is a seventh top plan view in a sequence thereof;
FIG. 8 is an eighth top plan view in a sequence thereof;
FIG. 9 is a ninth top plan view in a sequence thereof;
FIG. 10 is a tenth top plan view in a sequence thereof;
FIG. 11 is an eleventh top plan view in a sequence thereof;
FIG. 12 is a twelfth top plan view in a sequence thereof;
FIG. 13 is a bottom plan view thereof;
FIG. 14 is a rear elevational view thereof;
FIG. 15 is a front elevational view thereof;
FIG. 16 is a left side elevational view thereof;
FIG. 17 is a right side elevational view thereof; and,
FIG. 18 is a top right perspective view thereof.
The appearance of the watch sequentially transitions between the views shown in FIGS. 1-12. The process or period in which one view transitions to another view forms no part of the claimed design.
The characteristic feature of the watch resides in the animated/changing nature of the ornamental appearance of the dial or face of the watch. Specifically, the portion of the watch dial containing the butterflies rotates around the watch hands, and the butterflies themselves rotate, as the wearer of the watch moves his or her wrist.

1 Claim, 5 Drawing Sheets
