(57) **CLAIM**

The ornamental design for a door banner, as shown and described.

DESCRIPTION

The present application is related to commonly assigned U.S. patent applications Ser. Nos. 29/467,818 and 29/468,518 filed Sep. 24, 2013 and Oct. 1, 2013 respectively.

FIG. 1 is a front right perspective view of the door banner.

FIG. 2 is a back right perspective view of the door banner.

FIG. 3 is a front view of the door banner.

FIG. 4 is a back view of the door banner.

FIG. 5 is a view of one side of the door banner.

FIG. 6 is a view of the opposite side of the door banner.

FIG. 7 is a top view of the door banner.

FIG. 8 is a bottom view of the door banner; and,

FIG. 9 is a back detail view of the area 9 circumscribed within FIG. 2.

The detail depicts a strap joining the top and bottom edges of the design with a hook and loop closure mechanism.

The dot-dash-dot broken line circumscribing the area of the detail in FIG. 2 forms no part of the claimed design. The broken line outlines of text and the areas within these broken lines on the front and rear surface of the design depict features of the door banner that form no part of the claimed design. All other broken lines represent environmental structure that forms no part of the claimed design.

The present application is for the ornamental design of a door banner that wraps around a typical door as shown in the attached figures. While not part of the design, the banner generally includes a logo or image positioned on the face of the door.

1 Claim, 6 Drawing Sheets
