FIG. 1 is a front view of a portion of a display screen with a changeable graphical user interface component showing a first image in a sequence that comprises our invention; and, FIG. 2 is a front view of a second image included in the sequence.

The longer-incremented broken lines showing of a portion of a display screen of a communications terminal illustrate environment and form no part of the claimed design. The medium length broken lines illustrate the bounds of the claim and form no part thereof. The finer-incremented broken lines illustrate features of the graphical user interface that form no part of the claimed design.

See application file for complete search history.

The gray shading in the drawings indicates a contrast of appearance.
