(57) **CLAIM**

The ornamental design for a zipper assembly, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a zipper assembly showing the first embodiment of the present design, shown in the first environment;

FIG. 2 is a front view of the zipper assembly of FIG. 1, shown within a second environment;

FIG. 3 is a front view of a zipper assembly showing a second embodiment of the present design, shown within a third environment;

FIG. 4 is a front view of a zipper assembly showing a third embodiment of the present design, shown within the first environment; and,

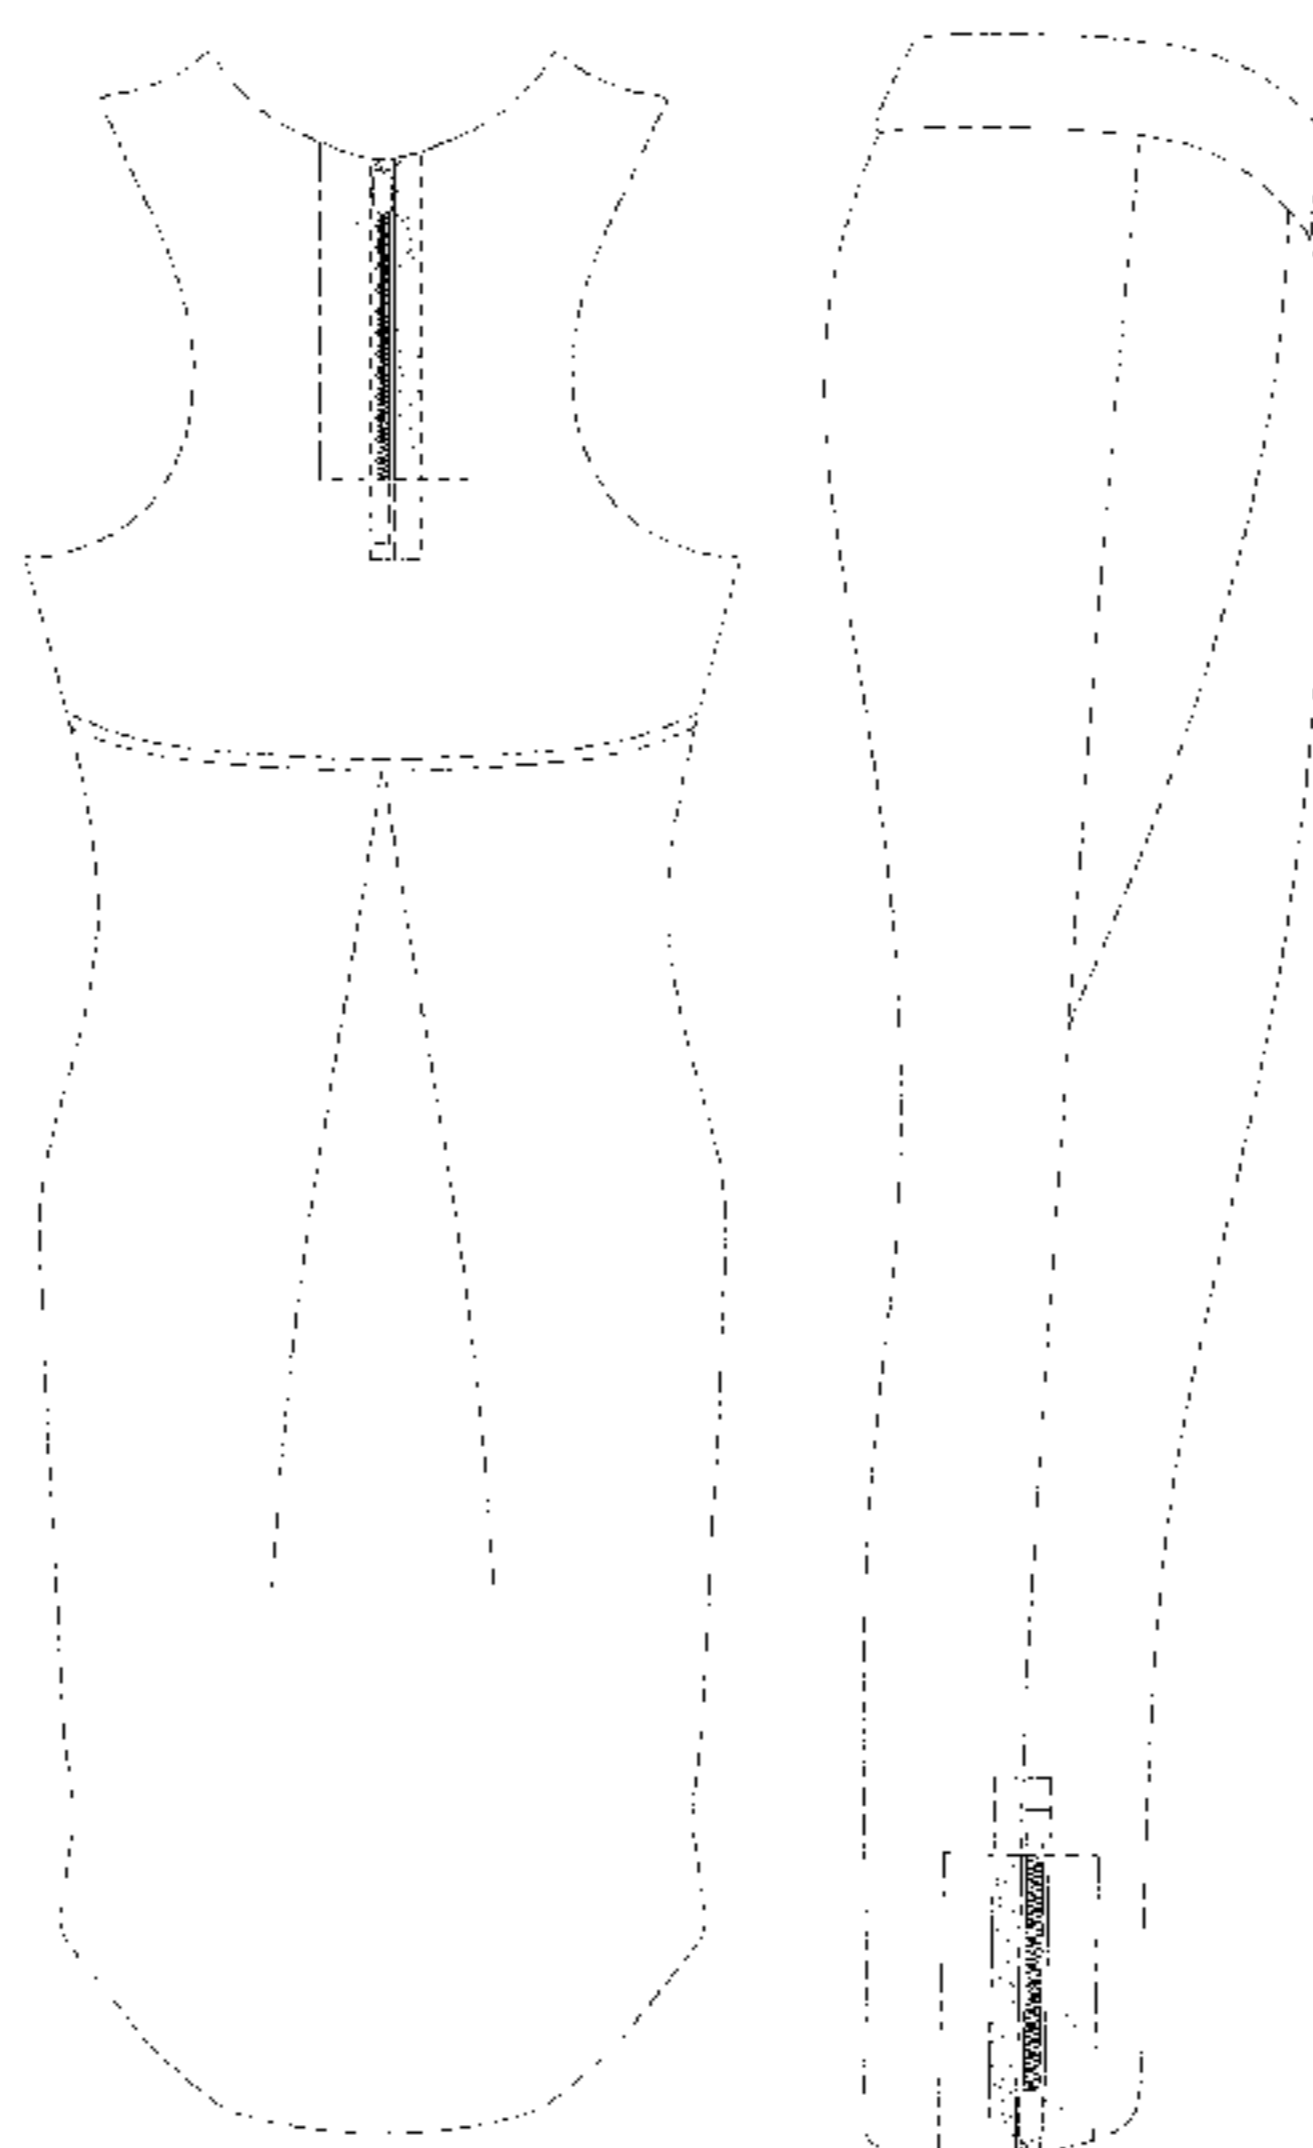

FIG. 5 is a front view of a zipper assembly showing a fourth embodiment of the present design, shown within a fourth environment.

The evenly spaced broken lines shown in the drawings are included for the purpose of illustrating environmental structure and form no part of the claimed design.

The long and short broken lines are boundary lines, which define bounds of the claimed design. These boundaries do not exist in reality in the article embodying the design. It is understood that the claimed design extends to these boundaries but does not include the boundaries.

The surface shading on the claimed portion is provided only to indicate the character and/or any contour or curvature of the surfaces. It does not indicate color, texture, markings that actually exist thereon, indicia, graphic representations, surface treatment, or any other ornamentation applied to the article.

1 Claim, 5 Drawing Sheets
