(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a view of the display screen with graphical user interface showing a first image of our new design; FIG. 2 is a view of a second image of our new design; FIG. 3 is a view of a third image of our new design; FIG. 4 is a view of a fourth image of our new design; FIG. 5 is a view of a fifth image of our new design; FIG. 6 is a view of a sixth image of our new design; FIG. 7 is a view of a seventh image of our new design; FIG. 8 is a view of a sixth image of our new design; and, FIG. 9 is a view of a seventh image of our new design. The appearance of the images sequentially transitions between the images shown in FIGS. 1 through 9. The process or period in which one image transitions to another forms no part of the claimed design.

The claim is directed to the shapes formed by solid dots in the central portion of the display screen.

The dashed broken line showing of an electronic device and display screen illustrates environmental structure and the article of manufacture, respectively. The remaining dashed broken lines illustrate portions of the graphical user interface. None of the broken lines form part of the claimed design.

1 Claim, 9 Drawing Sheets
