(57) **CLAIM**

The ornamental design for a mobile terminal display screen with a graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front elevation view of a first image of a mobile terminal display screen with a graphical user interface according to a first embodiment; FIG. 2 is a front elevation view of a second image thereof; FIG. 3 is a front elevation view of a first image of a mobile terminal display screen with a graphical user interface according to a second embodiment; FIG. 4 is a front elevation view of a second image thereof; FIG. 5 is a front elevation view of a first image mobile terminal display screen with a graphical user interface according to a third embodiment; FIG. 6 is a front elevation view of a second image thereof; FIG. 7 is a front elevation view of a first image mobile terminal display screen with a graphical user interface according to a fourth embodiment; FIG. 8 is a front elevation view of a second image thereof; FIG. 9 is a front elevation view of a first image mobile terminal display screen with a graphical user interface according to a fifth embodiment; and, FIG. 10 is a front elevation view of a second image thereof. The appearance of the animated images sequentially transitions between the images shown in FIGS. 1-2, 3-4, 5-6, 7-8, and 9-10. The process or period in which one image transitions to another forms no part of the claimed design. The difference in shading indicates a contrast of appearance. The dashed lines and broken text and graphics represent unclaimed features that form no part of the claimed design. The dash-dot lines indicate the boundary of the mobile terminal display screen.
