(57) **CLAIM**

The ornamental design for a portion of a display panel with a graphical user interface component for flight operations management, as shown and described.

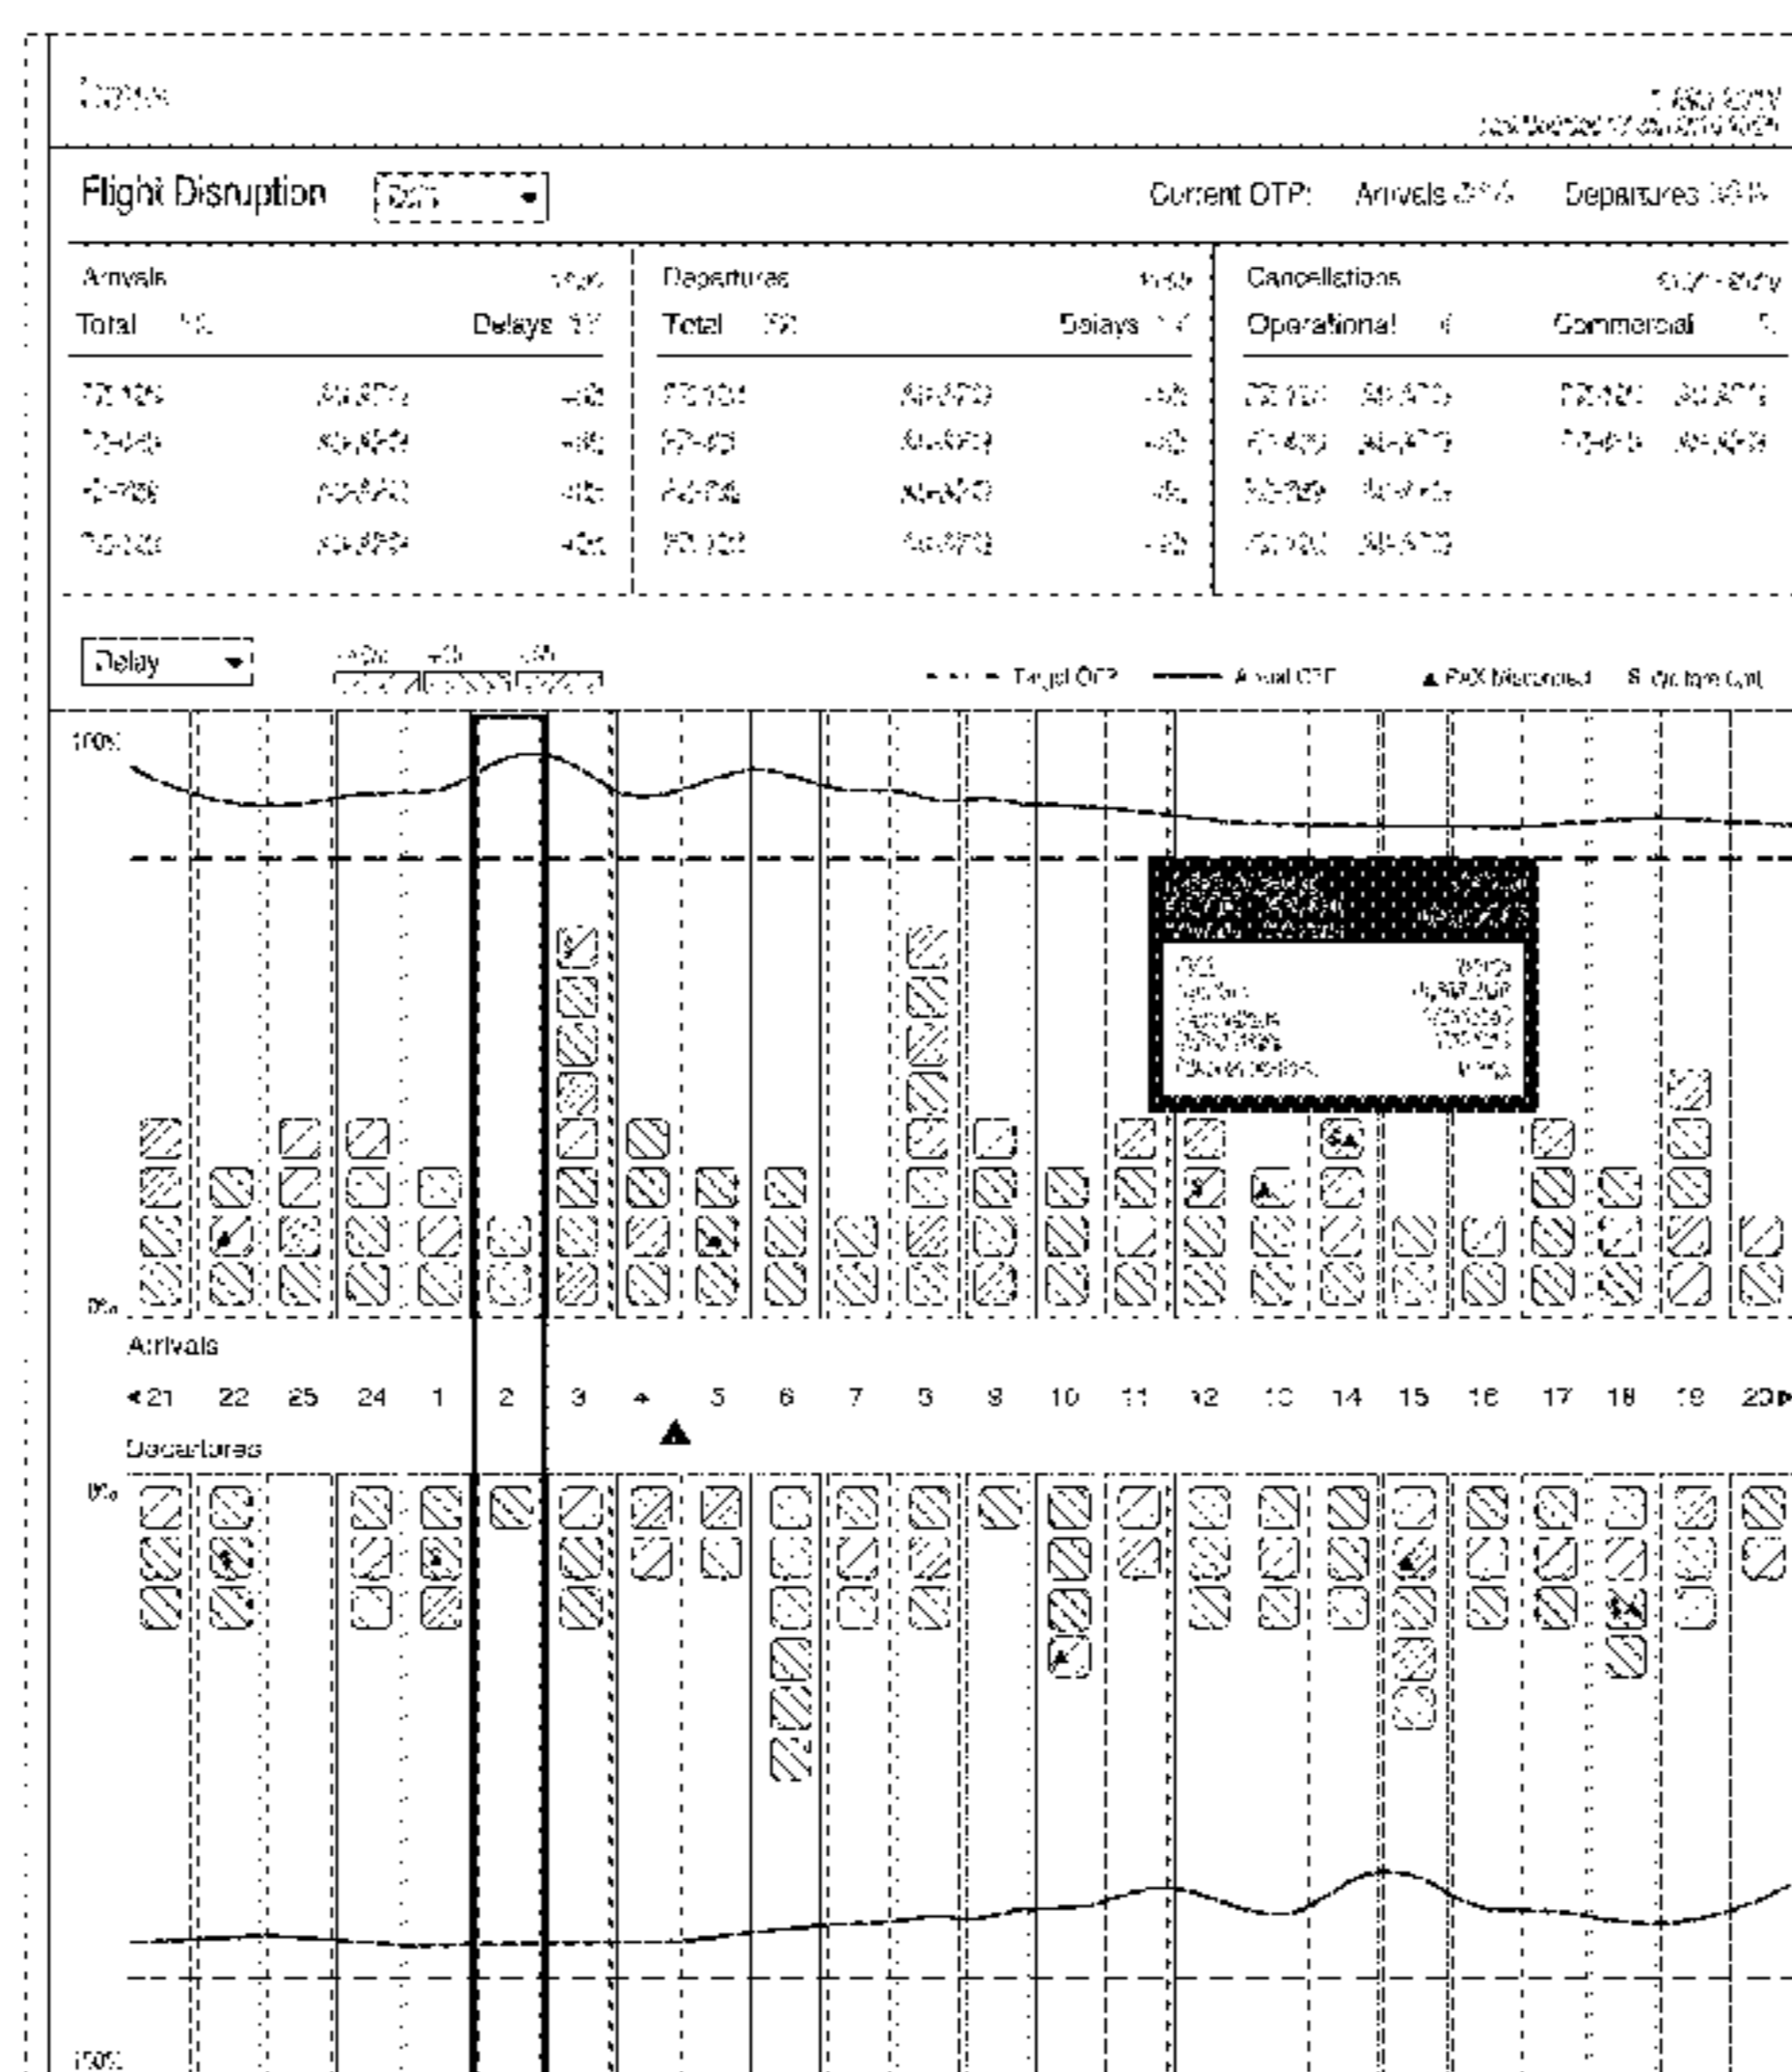

DESCRIPTION

The FIGURE is a front view of a portion of a display panel with a graphical user interface component for flight operations management according to the new design.

The subject matter of the present disclosure includes graphical user interface components present within a graphical user interface for flight operations management.

The outermost broken line showing the display panel and all other broken lines showing portions of the graphical user interface are included for the purpose of illustrating portions of the article and form no part of the claimed design.

1 Claim, 1 Drawing Sheet
