(57) **CLAIM**

The ornamental design for a display device with animated graphical user interface element, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawings will be provided by the office upon request and payment of the necessary fee.

FIG. **1** is a front elevational view of a first state for a first embodiment of a display device with animated graphical user interface element;

FIG. **2** is a front elevational view of a second state for the first embodiment of the display device with animated graphical user interface element;

FIG. **3** is a front elevational view of a third state for the first embodiment of the display device with animated graphical user interface element;

FIG. **4** is a front elevational view of a fourth state for the first embodiment of the display device with animated graphical user interface element;

FIG. **5** is a front elevational view of a fifth state for the first embodiment of the display device with animated graphical user interface element;

FIG. **6** is a front elevational view of a sixth state for the first embodiment of the display device with animated graphical user interface element;

FIG. **7** is a front elevational view of a seventh state for the first embodiment of the display device with animated graphical user interface element;

FIG. **8** is a front elevational view of an eighth state for the first embodiment of the display device with animated graphical user interface element;

FIG. **9** is a front elevational view of a ninth state for the first embodiment of the display device with animated graphical user interface element;

FIG. **10** is a front elevational view of a first state for a second embodiment of the display device with animated graphical user interface element;

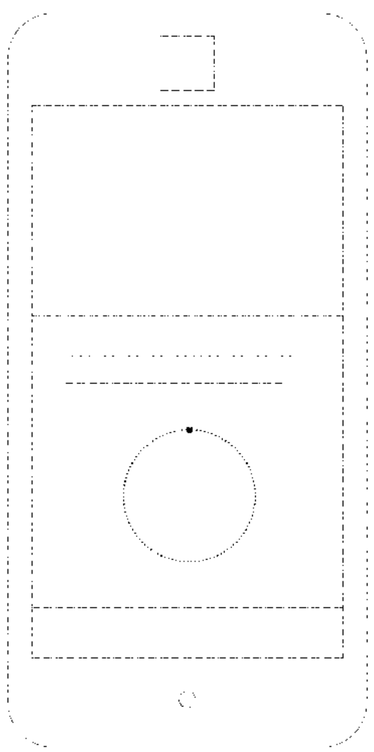
FIG. **11** is a front elevational view of a second state for the second embodiment of the display device with animated graphical user interface element;

FIG. **12** is a front elevational view of a third state for the second embodiment of the display device with animated graphical user interface element;

FIG. **13** is a front elevational view of a fourth state for the second embodiment of the display device with animated graphical user interface element;

FIG. **14** is a front elevational view of a fifth state for the second embodiment of the display device with animated graphical user interface element;

(Continued)



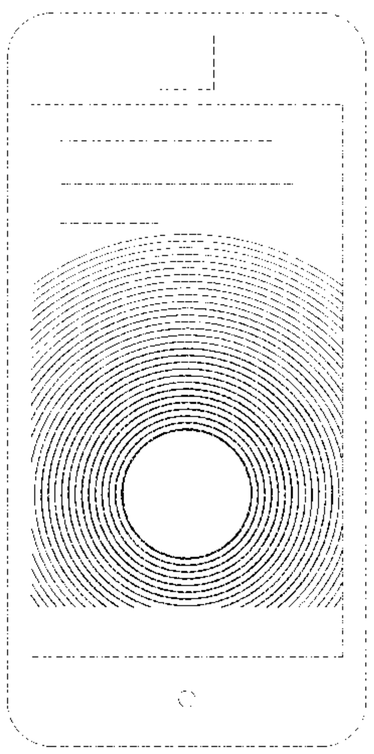


FIG. **15** is a front elevational view of a sixth state for the second embodiment of the display device with animated graphical user interface element;

FIG. **16** is a front elevational view of a seventh state for the second embodiment of the display device with animated graphical user interface element;

FIG. **17** is a front elevational view of an eighth state for the second embodiment of the display device with animated graphical user interface element; and,

FIG. **18** is a front elevational view of a ninth state for the second embodiment of the display device with animated graphical user interface element.

The broken line showing of the display device and remainder of the graphical user interface forms no part of the claimed design.

The dashed broken line showing of the display device and remainder of the graphical user interface forms no part of the claimed design. The dotted lines shown in the drawings are claimed subject matter.
