(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with transitional graphical user interface showing a first image of a first embodiment;

FIG. 2 is a front view of a second image of the first embodiment;

FIG. 3 is a front view of a display screen with transitional graphical user interface showing a first image in a second embodiment; and,

FIG. 4 is a front view of a second image of the second embodiment.

The stippling shows contrasting appearances.

The longer-incremented broken lines showing a display screen form no part of the claimed design. The images and text in shown in finer-incremented broken lines illustrate features of the transitional graphical user interface that form no part of the claimed design.

The appearance of the image transitions sequentially between the images shown in FIGS. 1-2 and 3-4, respectively. The process or period in which an image transitions to another image forms no part of the claimed design.
