(57) **CLAIM**

The ornamental design for a mobile phone display screen with animated graphical user interface, as shown and described.

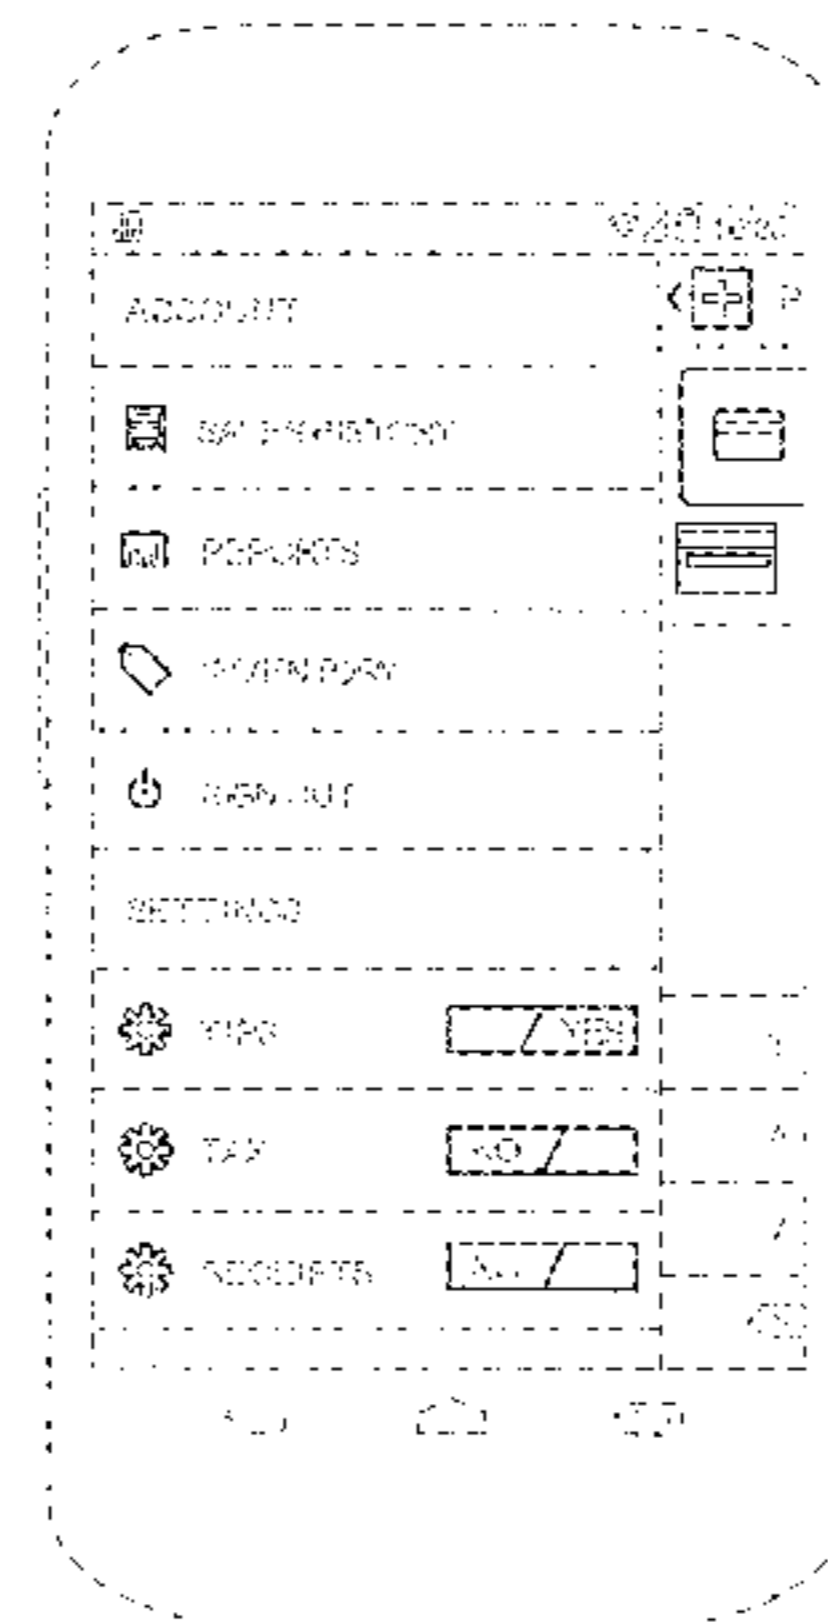

DESCRIPTION

FIG. 1 is a front view of the first image in a sequence for a mobile phone display screen with animated graphical user interface showing our new design; and, FIG. 2 is a front view of the second image in a sequence for a mobile phone display screen with animated graphical user interface showing our new design.

The outer broken lines and the broken line showing of the lowermost three icons illustrate a mobile device. The broken line at the perimeter of the figures illustrates a display screen. The remaining broken lines illustrate portions of the graphical user interface. None of the broken lines form part of the claimed design.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 and 2. The process or period in which one image transitions to another image forms no part of the claimed design.
