(57) **CLAIM**

The ornamental design for a fluid applicator with flow diverter, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of our ornamental design for a fluid applicator with flow diverter.

FIG. 2 is a top view of our design shown in FIG. 1; and,

FIG. 3 is a side plan view of our design shown in FIG. 1, all side plan views being identical to the side plan view.

The fluid applicator with flow diverter is used to change the flow of a fluid through a fluid applicator with four separate fluid diverter passageways so as to uniformly saturate the media shown in broken lines.

The applicator is open at the distal end straight through up to the four separate fluid diverter passageways at the proximal end.

The broken lines in the drawings represent environmental structure only and form no part of the claimed design.
