(57) **CLAIM**

We claim the ornamental design for a wearable fitness monitor, as shown and described.

DESCRIPTION

FIG. 1 is a side view of a wearable fitness monitor or pebble that may be used with wearable fitness monitor accessories. FIG. 2 is a top view of the wearable fitness monitor or pebble of FIG. 1.

FIG. 3 is an opposing side view of the wearable fitness monitor or pebble of FIG. 1.

FIG. 4 is a bottom view of the wearable fitness monitor or pebble of FIG. 1.

FIG. 5 is a front view of the wearable fitness monitor or pebble of FIG. 1; the rear view is the same due to symmetry in this respect.

FIG. 6 is an isometric view of the wearable fitness monitor or pebble of FIG. 1; and,

FIG. 7 is another isometric view of the wearable fitness monitor or pebble of FIG. 1 from a different perspective.

The wearable fitness monitor depicted herein may be part of a complementary system of accessories for the wearable fitness monitor, i.e., the same wearable fitness monitor may be inserted into accessories according to the immediate needs of the wearer, e.g., a pendant accessory may be used in more formal settings, such as formal dinners, a bangle may be more suited to everyday use, and a clip accessory may be used in more active settings, such as during an exercise session. Other accessories, not depicted herein, may be used as well.

The five circular features arranged in an evenly spaced line on the wearable fitness monitor may be transparent or translucent to allow light emitted from inside the wearable

(Continued)

fitness monitor to be seen. Diagonal hatching, which is normally used to indicate such transparent or translucent portions, is not used for the five circular features discussed above since those features are so small that the hatching would obscure their shape.

Stipple shading is used in all of the accompanying Figures to convey surface contouring and not texture.

The design(s) depicted herein may include all of the components shown, or only subsets of the components shown. Additionally, the design(s) depicted herein may focus only on subportions of various Figures. Applicant reserves the right to render various portions of the designs as unclaimed environmental subject matter.
