Primary Examiner — Robert M. Spear

(57) **CLAIM**

The ornamental design for a tire, as shown and described.

DESCRIPTION

FIG. 1 is a side perspective view of a tire showing our new design, it being understood that the tread pattern is repeated throughout the circumference of the tire tread, the opposite side being the same as that shown;
FIG. 2 is a front elevational view thereof, the opposite side being identical thereto;
FIG. 3 is an enlarged fragmentary front elevational view of FIG. 2; and,
FIG. 4 is a side elevational view of the left side thereof, the opposite side being identical thereto.
In the drawings, the surfaces with the solid lines comprise the claim. The broken lines defining the sidewall, inner bead, groove walls, groove bottoms, shoulder portions of the tire tread and the peripheral boundary between the tire tread and the sidewall depict environmental subject matter that forms no part of the claimed design.
