(57) **CLAIM**

The ornamental design for a network connected interactive push button, as shown and described.

DESCRIPTION

FIG. 1 is a perspective top view of a network connected interactive push button showing my new design;
FIG. 2 is a top view thereof;
FIG. 3 is a right side view;
FIG. 4 is a left side view;
FIG. 5 is a perspective bottom view thereof;
FIG. 6 is a top view of the network connected interactive push button showing one in-use state having one illuminated light segment with radiating lines depicting illumination thereof; and,
FIG. 7 is a top view of the network connected interactive push button showing another in-use state having six illuminated light segments with radiating lines depicting illumination thereof.

The broken line showing in the figures is for environmental purposes only and forms no part of the claimed design. The contrast in shading indicates a contrast of appearance and does not depict any particular color.
