(57) **CLAIM**

The ornamental design for a portion of a display screen with a changeable graphical user interface component, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a portion of a display screen with a changeable graphical user interface component showing a first image in a sequence that comprises a first embodiment; FIG. 2 is a front view of a second image included in the sequence of the first embodiment;

FIG. 3 is a front view of a portion of a display screen with a changeable graphical user interface component showing a first image in a sequence that comprises a second embodiment;

FIG. 4 is a front view of a second image included in the sequence of the second embodiment; and,

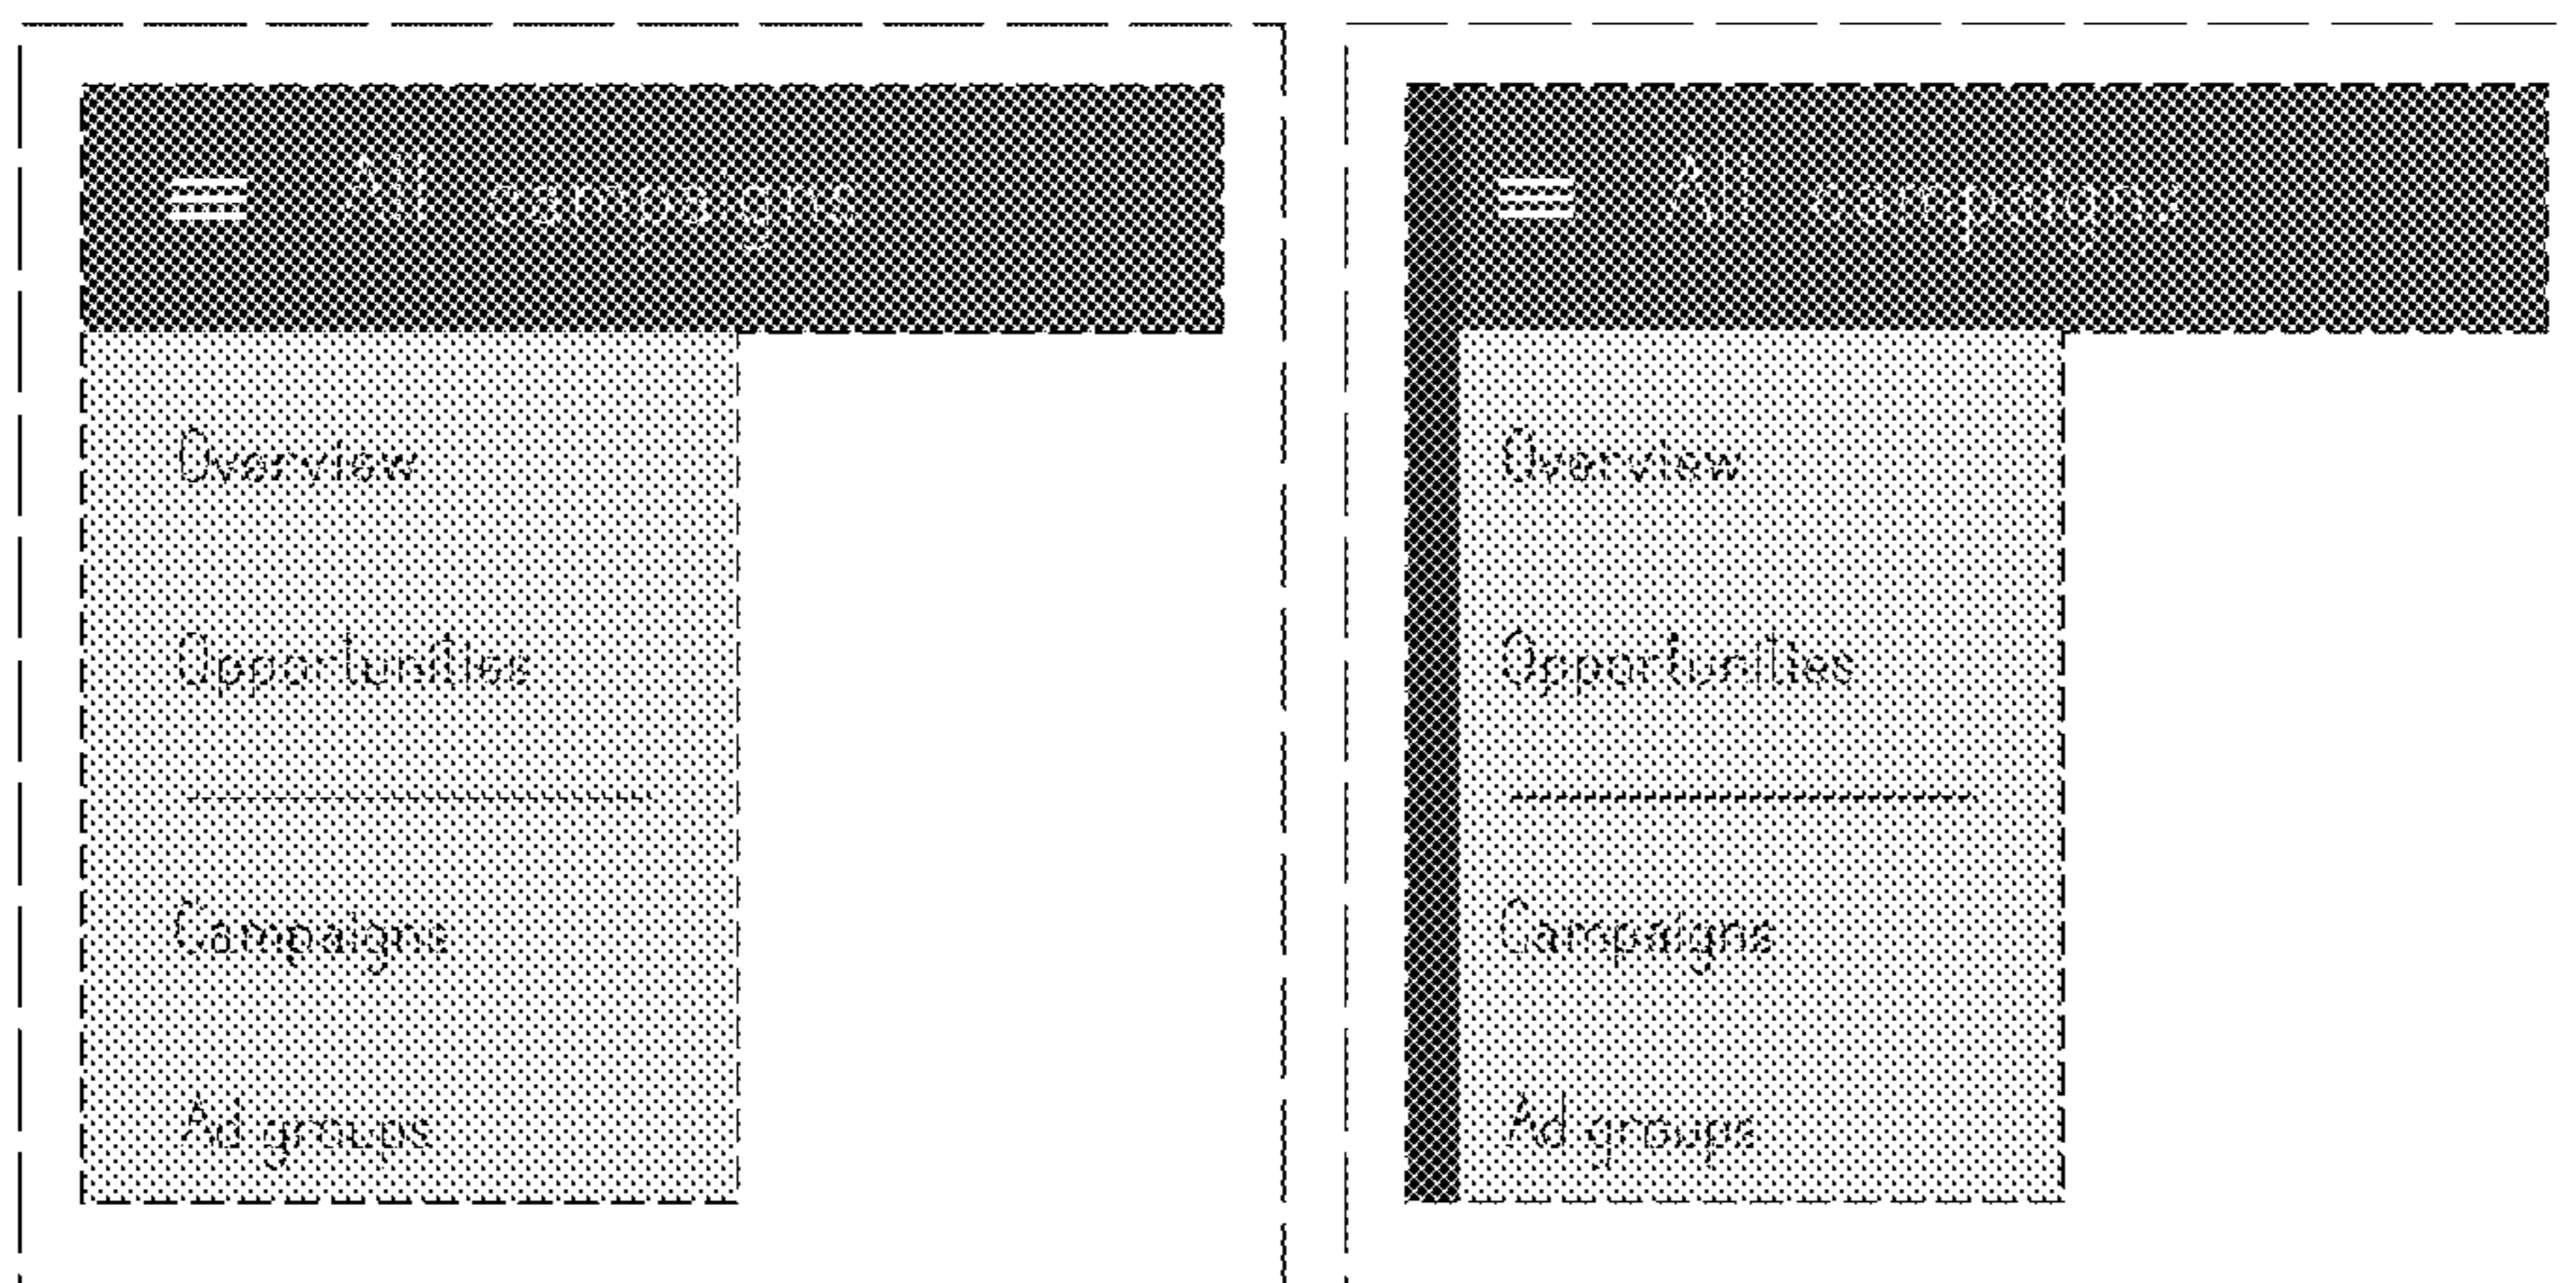

FIG. 5 is a front view of a third image included in the sequence of the second embodiment.

The outermost broken lines showing of a portion of a display screen illustrate environment and form no part of the claimed design. The medium length broken lines show the bounds of the claimed design. The finer-incremented broken lines showing of the text is included for the purpose of illustrating portions of the graphical user interface and forms no part of the claimed design.

The gray shading portrays contrast of one area of the claimed design from another.

The subject matter in this patent includes a process or period in which an image transitions sequentially between the images shown in the figures. The process or period in which an image transitions to another image forms no part of the claimed design.
