(57) **CLAIM**

The ornamental design for a display screen with an animated graphical user interface, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawings will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a first image in a sequence for a first embodiment of a display screen with an animated graphical user interface showing my new design; and

FIG. 2 is a second image thereof.

FIG. 3 is a front view of a first image in a sequence for a second embodiment of a display screen with an animated graphical user interface showing my new design; and

FIG. 4 is a second image thereof.

FIG. 5 is a front view of a first image in a sequence for a third embodiment of a display screen with an animated graphical user interface showing my new design; and

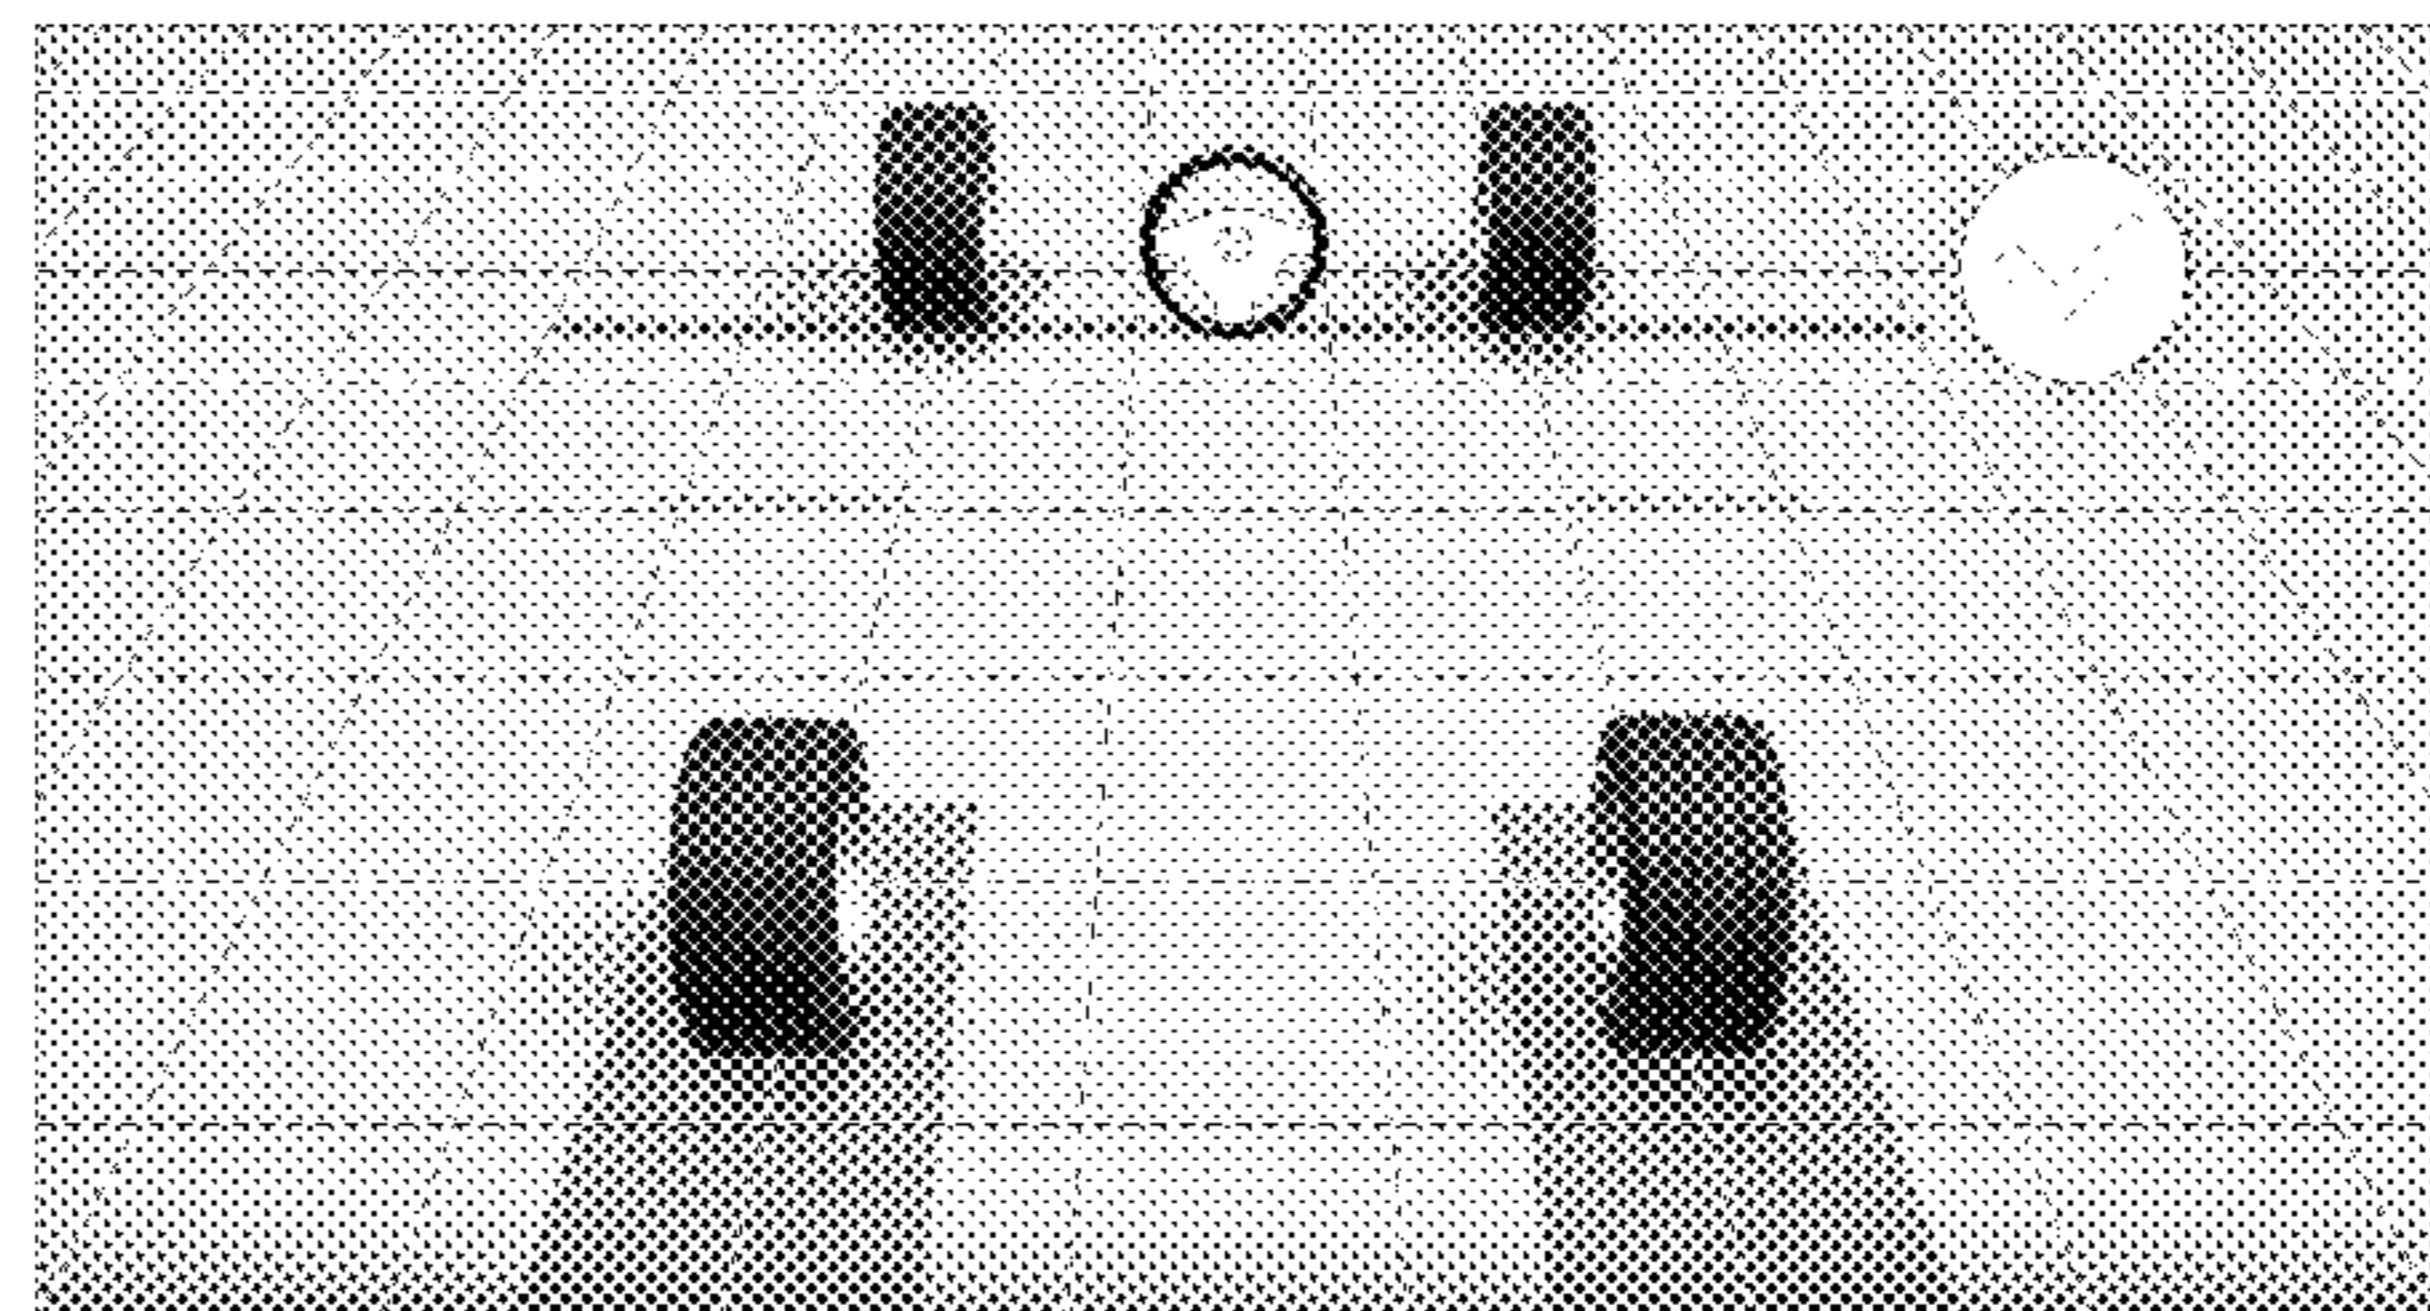

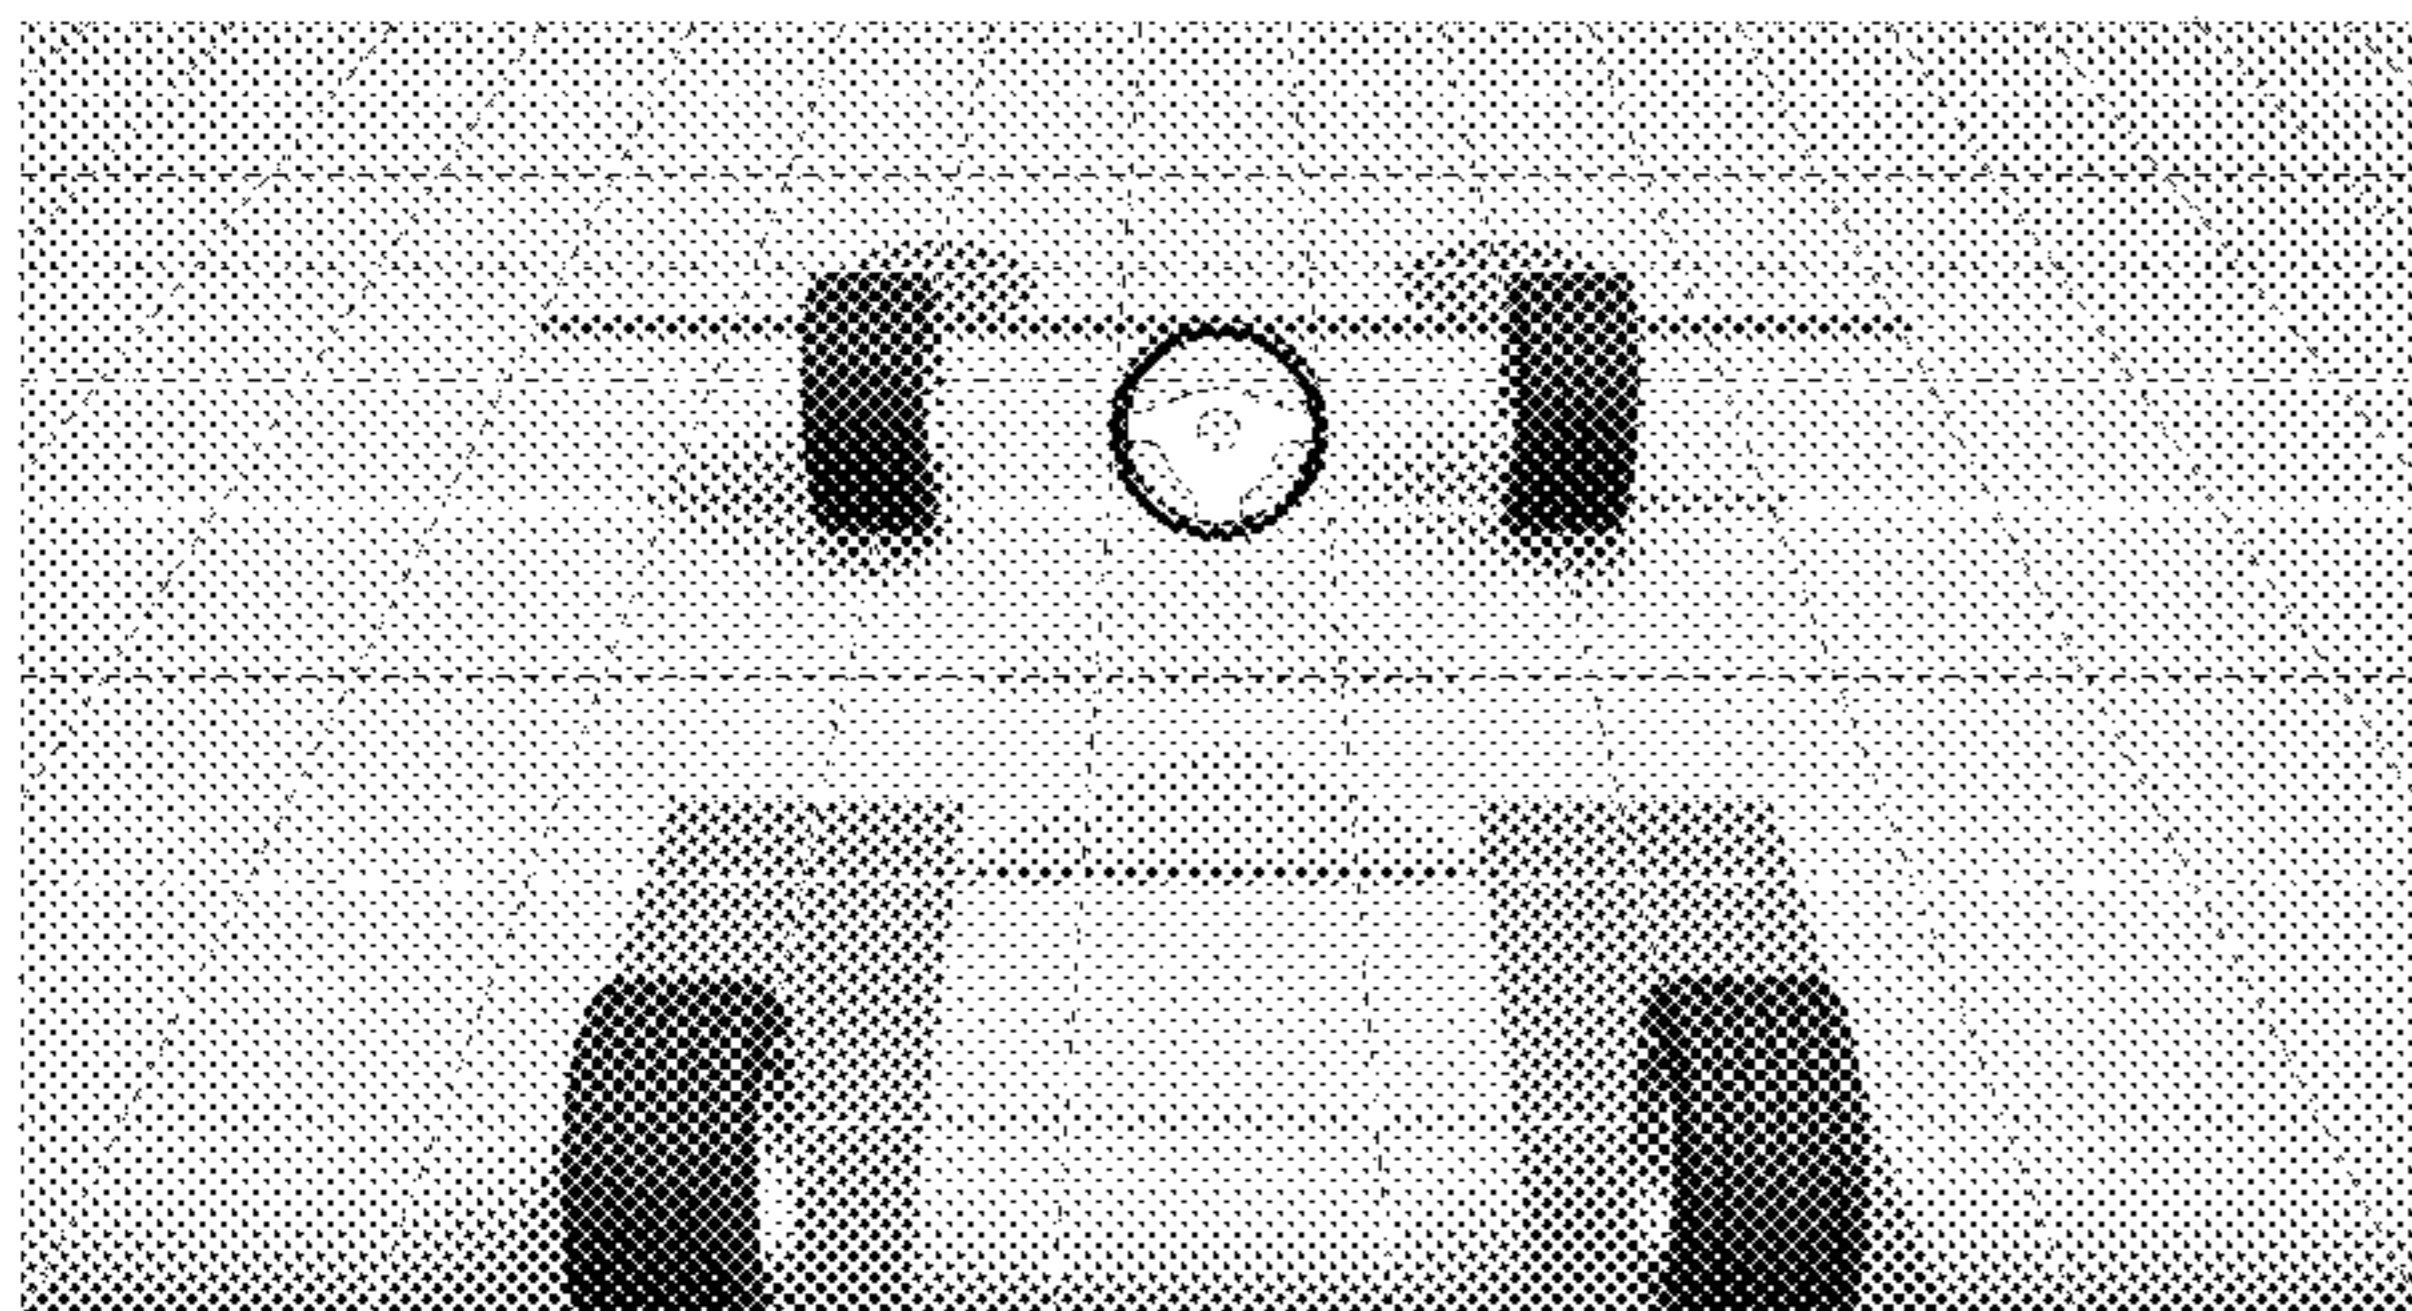

FIG. 6 is a second image thereof.

FIG. 7 is a front view of a first image in a sequence for a fourth embodiment of a display screen with an animated graphical user interface showing my new design; and

FIG. 8 is a second image thereof.

In the first embodiment, the appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1 and 2. In the second embodiment, the appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 3 and 4. In the third embodiment, the appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 5 and 6. In the fourth embodiment, the appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 7 and 8. The process or period in which one image transitions to another forms no part of the claimed design. The broken lines shown in the drawings illustrate portions of the display screen with an animated graphical user interface that form no part of the claimed design.
