(57) **CLAIM**

The ornamental design for a portion of a display screen with a changeable graphical user interface component, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a portion of a display screen with a changeable graphical user interface component showing a first image in a sequence that comprises our invention according to a first embodiment;

FIG. 2 is a front view of a second image included in the sequence of the first embodiment; and

FIG. 3 is a front view of a third image included in the sequence of the first embodiment;

FIG. 4 is a front view of a portion of a display screen with a changeable graphical user interface component showing a first image in a sequence that comprises our invention according to a second embodiment;

FIG. 5 is a front view of a second image included in the sequence of the second embodiment; and,

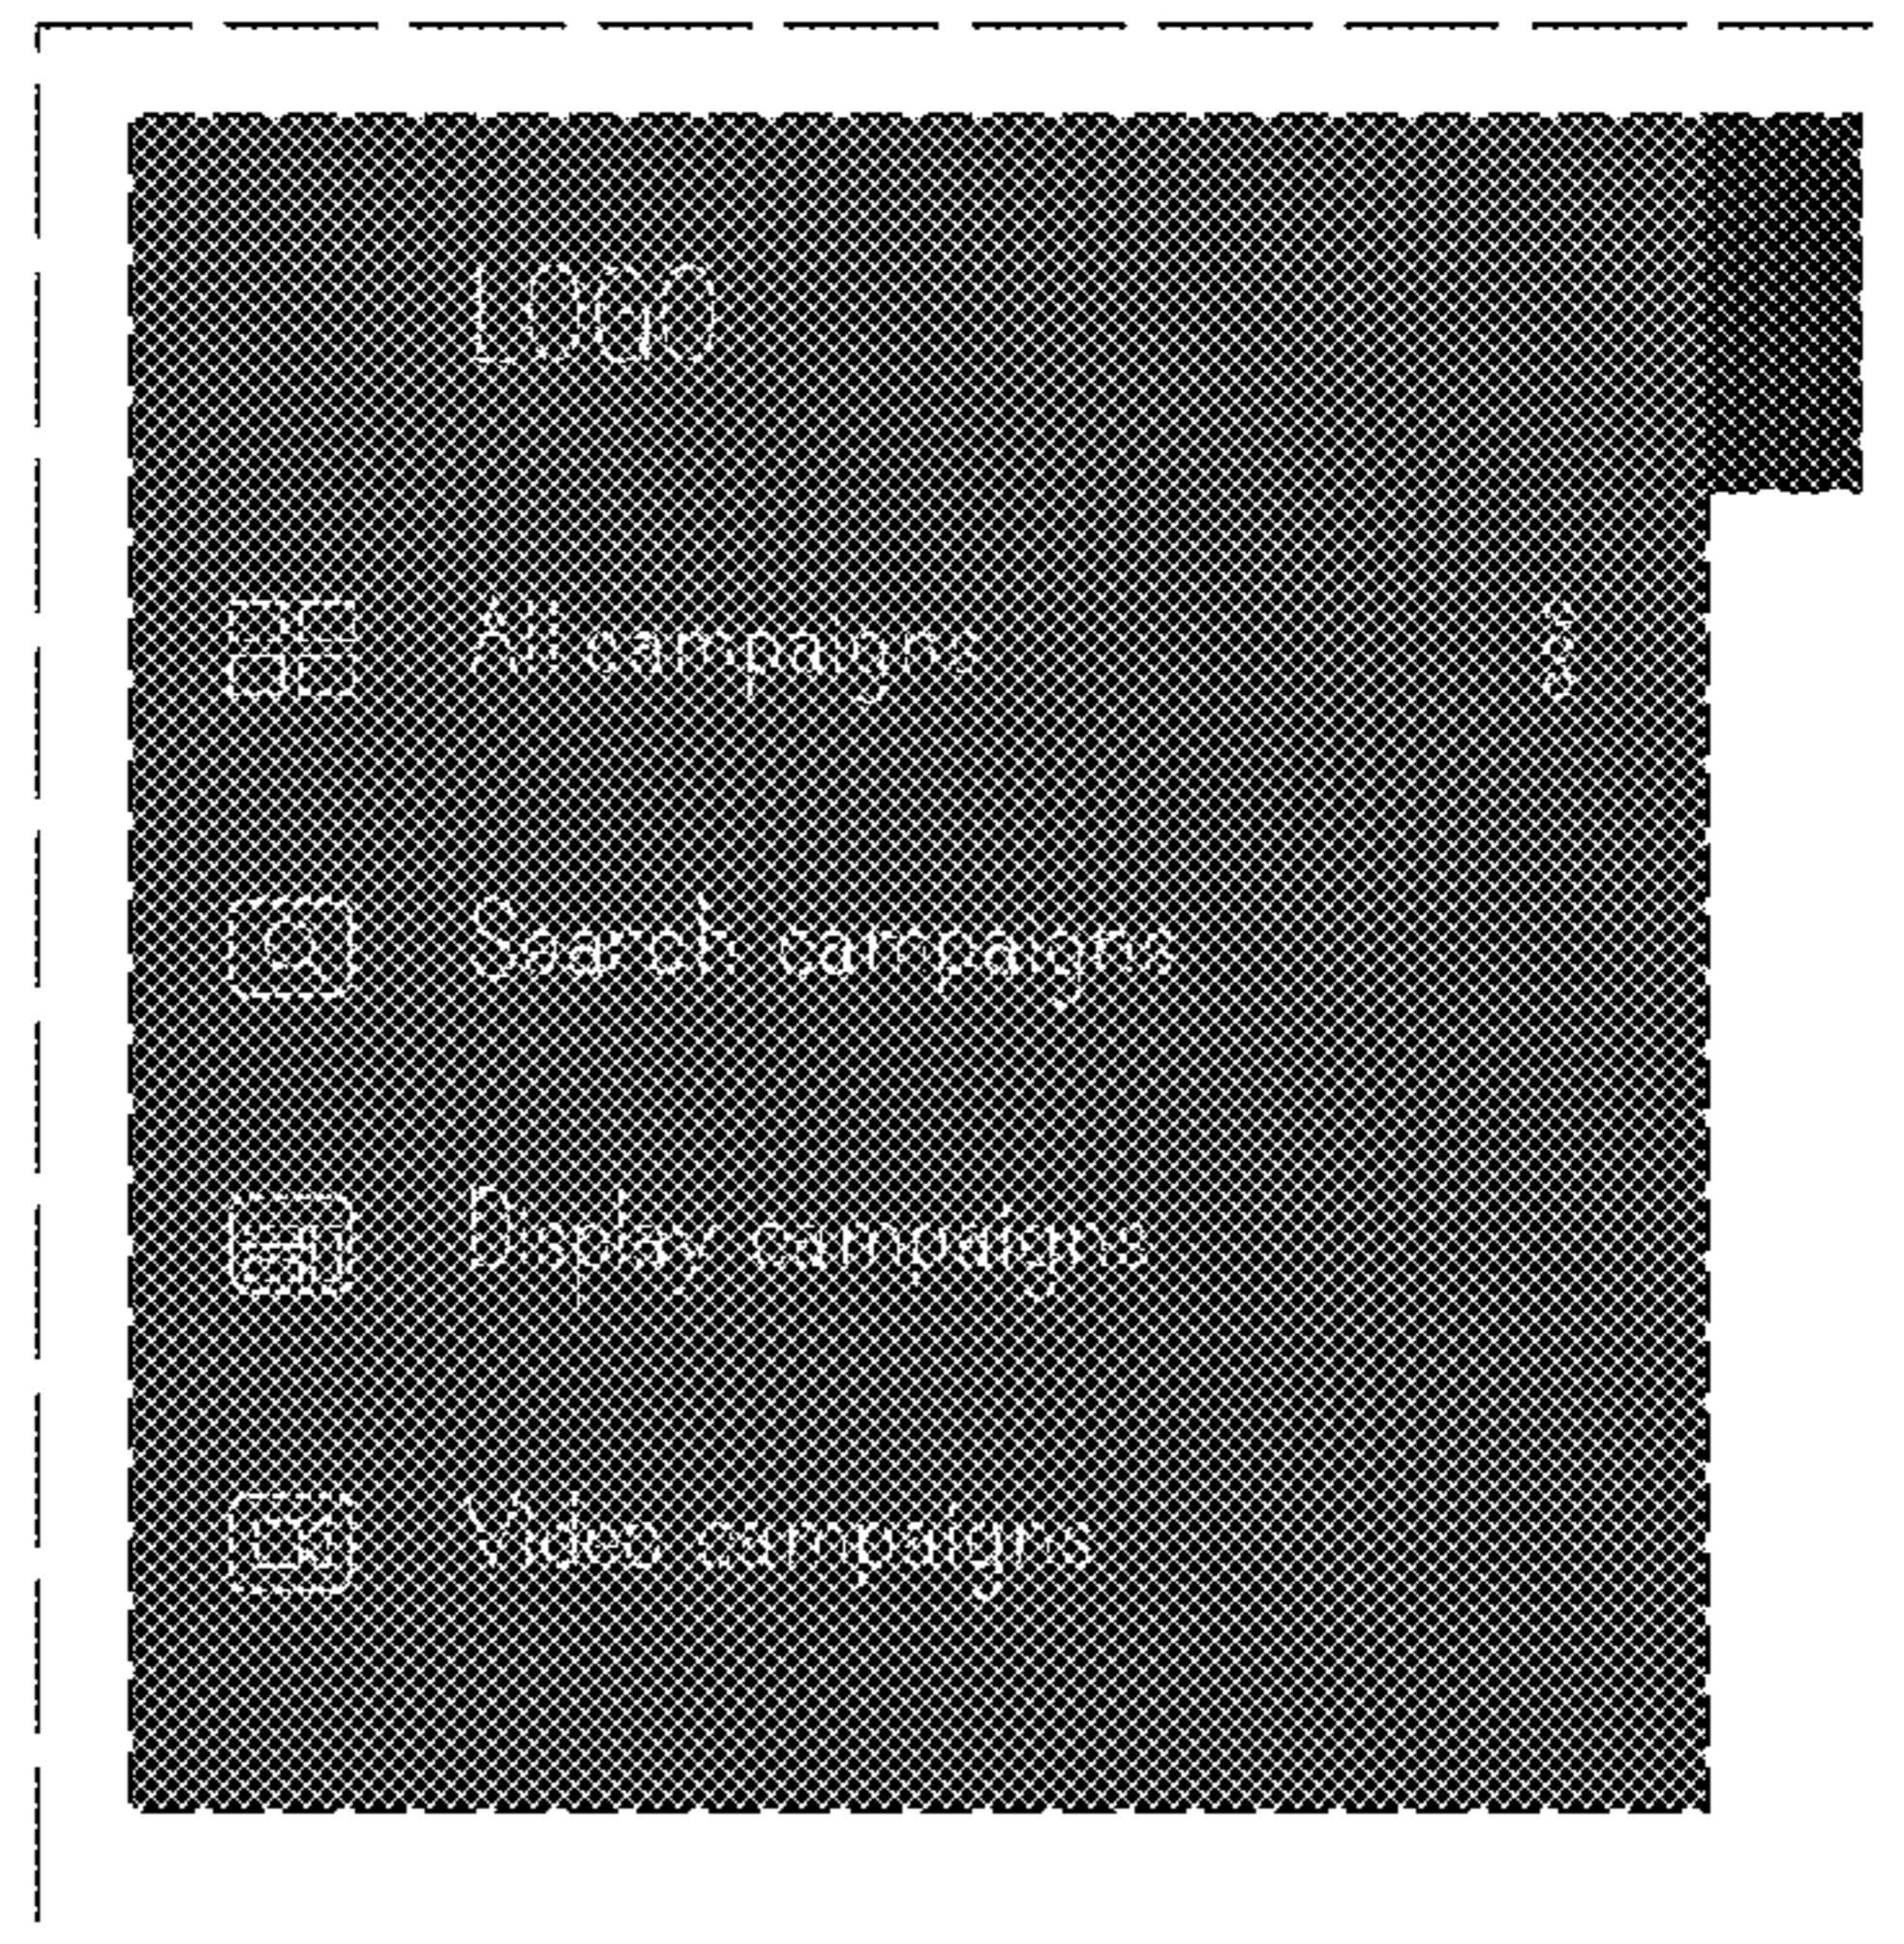

FIG. 6 is a front view of a third image included in the sequence of the second embodiment.

The outermost broken line shows the bounds of the claimed design and forms no part thereof. The finer-incremented broken lines showing of the text and all other broken lines are included for the purpose of illustrating portions of the graphical user interface and form no part of the claimed design.

The gray shading in the drawings indicate contrast of appearance.

The subject matter in this patent includes a process or period in which an image changes into another image. The process or period in which an image transitions to another image forms no part of the claimed design.
