(57) **CLAIM**

The ornamental design for a rear combination lamp for an automobile, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a rear combination lamp for an automobile in accordance with a first embodiment of our new design;

FIG. 2 is a rear elevational view of the rear combination lamp for an automobile in accordance with the first embodiment of our new design of FIG. 1;

FIG. 3 is a top plan view of the rear combination lamp for an automobile in accordance with the first embodiment of our new design of FIGS. 1 and 2;

FIG. 4 is a bottom plan view of the rear combination lamp for an automobile in accordance with the first embodiment of our new design of FIGS. 1 to 3;

FIG. 5 is a right side elevational view of the rear combination lamp for an automobile in accordance with the first embodiment of our new design of FIGS. 1 to 4;

FIG. 6 is a left side elevational view of the rear combination lamp for an automobile in accordance with the first embodiment of our new design of FIGS. 1 to 5; and,

FIG. 7 is a front side perspective view of the rear combination lamp for an automobile in accordance with the first embodiment of our new design of FIGS. 1 to 6.

The rear combination lamp is configured to be mounted to an automobile. The mounting structure and support structure of the rear combination lamp, visible in FIGS. 1 to 7, form no part of the claimed design since the mounting structure and support structure are hidden when the rear combination lamp is mounted to the automobile.

In addition, the appearance of the rear side structures and inside side structures of the rear combination lamp for an automobile as seen in FIGS. 1 to 7 is for purpose of illustrating the boundaries of the exterior surface of the outside of the rear combination lamp for an automobile, and forms no part of the claimed design.

A second embodiment of our new design is identical to the first embodiment except that the second embodiment of our
