(57) **CLAIM**

The ornamental design for an automotive instrument panel having display device, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an automotive instrument panel having display device with the display device shown in a retracted position;
 FIG. 2 is a front view of the display device shown in the retracted position;
 FIG. 3 is a rear view of the display device shown in the retracted position;
 FIG. 4 is a left side view of the display device shown in the retracted position, the right side view being a mirror image;
 FIG. 5 is a top view of the display device shown in the retracted position;
 FIG. 6 is a bottom view of the display device shown in the retracted position;
 FIG. 7 is another perspective view of the display device shown in the retracted position;
 FIG. 8 is a perspective view of the display device shown in a partially extended position;
 FIG. 9 is a front view of the display device shown in the partially extended position;
 FIG. 10 is a rear view of the display device shown in the partially extended position;
 FIG. 11 is a left side view of the display device shown in the partially extended position, the right side being a mirror image;
 FIG. 12 is a top view of the display device shown in the partially extended position;
 FIG. 13 is a bottom view of the display device shown in the partially extended position;
 FIG. 14 is another perspective view of the display device shown in the partially extended position;
 FIG. 15 is a perspective view of the display device shown in a fully extended position;
 FIG. 16 is a front view of the display device shown in the fully extended position;

(Continued)

FIG. 17 is a rear view of the display device shown in the fully extended position;
 FIG. 18 is a left side view of the display device shown in the fully extended position, the right side being a mirror image;
 FIG. 19 is a top view of the display device shown in the fully extended position;
 FIG. 20 is a bottom view of the display device shown in the fully extended position;
 FIG. 21 is another perspective view of the display device shown in the fully extended position; and,
 FIG. 22 is a front view of the automotive instrument panel having display device in which an image, such as a navigational map, is displayed on the display device, the image forming no part of the claimed design.
 The broken lines shown in the drawings illustrate portions of the automotive instrument panel having display device that form no part of the claimed design.
