(57) **CLAIM**

The ornamental design for a display screen or portion thereof with transitional graphical user interface for an image grid, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a first image of a transitional user interface for an implementation of a display screen illustrating a grid of images;

FIG. 2 is a front view of a second image of a transitional user interface for an implementation of a display screen illustrating a grid of images;

FIG. 3 is a front view of a third image of a transitional user interface for an implementation of a display screen illustrating a grid of images;

FIG. 4 is a front view of a fourth image of a transitional user interface for an implementation of a display screen illustrating a grid of images;

FIG. 5 is a front view of a fifth image of a transitional user interface for an implementation of a display screen illustrating a grid of images;

FIG. 6 is a front view of a sixth image of a transitional user interface for an implementation of a display screen illustrating a grid of images;

FIG. 7 is a front view of a seventh image of a transitional user interface for an implementation of a display screen illustrating a grid of images; and,

FIG. 8 is a front view of an eighth image of a transitional user interface for an implementation of a display screen illustrating a grid of images.

The outer rectangle in broken lines shows the display screen and forms no part of the claimed design. The portions of the transitional graphical user interface shown in broken lines form no part of the claimed design.

The subject matter of this patent includes a process or period in which an image changes into another image to represent how an image may be added to or removed from a user interface. This process or period forms no part of the claimed design.

The appearance of the transitional image of a first embodiment of the claimed design transitions sequentially between the images shown in FIGS. 1, 2, 3, 4, 5, 6, 7 and 8. The

appearance of the transitional image of a second embodiment of the claimed design transitions sequentially between the images shown in FIGS. 1, 2, 3, 4, 5, 7 and 8. The appearance of the transitional image of a third embodiment of the claimed design transitions sequentially between the images shown in FIGS. 1, 2, 3, 6, and 8. The appearance of the transitional image of a fourth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 1, 2, 4, 6, and 8. The appearance of the transitional image of a fifth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 1, 2, 3, 5, 6, and 8.

The appearance of the transitional image of a sixth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 1, 2, 3, 4, 5, 6, 7 and 8. The appearance of the transitional image of a seventh embodiment of the claimed design transitions sequentially between the images shown in FIGS. 1, 2, 3, 4, 5, 7 and 8. The appearance of the transitional image of an eighth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 1, 2, 3, 6, and 8. The appearance of the transitional image of a ninth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 1, 2, 4, 6, and 8. The appearance of the transitional image of a tenth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 1, 2, 3, 5, 6, and 8.

The appearance of the transitional image of an eleventh embodiment of the claimed design transitions sequentially between the images shown in FIGS. 8, 7, 6, 5, 4, 3, 2, and 1. The appearance of the transitional image of a twelfth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 8, 7, 5, 4, 3, 2, and 1. The appearance of the transitional image of a thirteenth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 8, 6, 3, 2, and 1. The appearance of the transitional image of a fourteenth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 8, 6, 4, 2, and 1. The appearance of the transitional image of a fifteenth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 8, 6, 5, 3, 2, and 1.

The appearance of the transitional image of a sixteenth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 8, 7, 6, 5, 4, 3, and 2. The appearance of the transitional image of a seventeenth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 8, 7, 5, 4, 3, and 2. The appearance of the transitional image of an eighteenth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 8, 6, 3, and 2. The appearance of the transitional image of a nineteenth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 8, 6, 4, and 2. The appearance of the transitional image of a twentieth embodiment of the claimed design transitions sequentially between the images shown in FIGS. 8, 6, 5, 3, and 2.
