(57) **CLAIM**

The ornamental design for an extruded structural building component for robotics, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of an extruded structural building component for robotics showing my new design; FIG. 2 is a left side elevational view thereof, the opposite side being substantially identical; FIG. 3 is a front plan view thereof; FIG. 4 is a back plan view thereof; and, FIG. 5 is a bottom plan view thereof. The article is shown with a symbolic break in its length. The appearance of any portion of the article between the break lines forms no part of the claimed design. Any broken line illustration of environmental structure in the drawing is not part of the design sought to be patented. Note: The use of separation and a bracket indicates that the precise length is not claimed.
