(57) **CLAIM**

The ornamental design for a building, substantially as shown and described.

**DESCRIPTION**

FIG. 1 is a front, top, right perspective view of the building, also indicating a close-up view of a selection of rivets located on the surface of the building (which is shown in FIG. 25), in accordance with a first embodiment.

FIG. 2 is a rear, bottom, left perspective view of the building, in accordance with the first embodiment.

FIG. 3 is a top elevation view of the building, in accordance with the first embodiment.

FIG. 4 is a bottom view of the building, in accordance with the first embodiment.

FIG. 5 is a front view of the building, in accordance with the first embodiment.

FIG. 6 is a rear view of the building, in accordance with the first embodiment.

FIG. 7 is a right side view of the building, in accordance with the first embodiment.

FIG. 8 is a left side view of the building, in accordance with the first embodiment.

FIG. 9 is a front top, right perspective view of the building, showing in dashed lines circular windows and a door under a fin, for the purpose of showing environmental structures, in accordance with a second embodiment. The Figure also indicates a detail view is presented in FIG. 26.

FIG. 10 is a rear, bottom, left perspective view of the building showing a circular window in dashed lines for the purpose of showing an environmental structure, in accordance with the second embodiment.

FIG. 11 is a top elevation view of the building showing the top portion of three windows on the right in dashed lines and the top portion of one window on the left in dashed lines for the purpose of showing environmental structures, in accordance with the second embodiment.

FIG. 12 is a bottom view of the building showing three windows and a door on the right in dashed lines and one window on the left in dashed lines, the dashed lines serving the purpose of showing environmental structures, in accordance with the second embodiment.

FIG. 13 is a front view of the building, showing a side view of windows on the left and right side of the building in dashed lines, the dashed lines serving the purpose of showing environmental structures, in accordance with the second embodiment.

FIG. 14 is a rear view of the Building showing a side view of a window on the left side of the building in dashed lines, for showing an environmental structure, in accordance with the second embodiment.

FIG. 15 is a right side view of the building showing a door and three circular windows in dashed lines, the dashed lines

(Continued)

...serving the purpose of showing environmental structures, in accordance with the second embodiment.

FIG. 16 is a left side view of the building showing a circular window in dashed lines for the purpose of showing an environmental structure, in accordance with the second embodiment.

FIG. 17 is a front top, right perspective view of the building having no rivets on the surface of the building, showing in dashed lines circular windows and a door under a fin, for the purpose of showing environmental structures, in accordance with a third embodiment.

FIG. 18 is a rear, bottom, left perspective view of the building having no rivets on the surface of the building, showing a circular window in dashed lines for the purpose of showing an environmental structure, in accordance with the third embodiment.

FIG. 19 is a top elevation view of the building having no rivets on the surface of the building, showing the top portion of three windows on the right in dashed lines and the top portion of one window on the left in dashed lines for the purpose of showing environmental structures, in accordance with the third embodiment.

FIG. 20 is a bottom view of the building having no rivets on the surface of the building, showing three windows and a door on the right in dashed lines and one window on the left in dashed lines, the dashed lines serving the purpose of showing environmental structures, in accordance with the third embodiment.

FIG. 21 is a front view of the building having no rivets on the surface of the building, showing a side view of windows on the left and right side of the building in dashed lines, the dashed lines serving the purpose of showing environmental structures, in accordance with the third embodiment.

FIG. 22 is a rear view of the building having no rivets on the surface of the building, showing a side view of a window on

the left side of the building in dashed lines for the purpose of showing an environmental structure, in accordance with the third embodiment.

FIG. 23 is a right side view of the building having no rivets on the surface of the building, showing a door and three circular windows in dashed lines, the dashed lines serving the purpose of showing environmental structures, in accordance with the third embodiment.

FIG. 24 is a left side view of the building having no rivets on the surface of the building, showing a circular window in dashed lines for the purpose of showing an environmental structure, in accordance with the third embodiment.

FIG. 25 is a detail view of the rivets shown in FIG. 1, in accordance with the first embodiment; and,

FIG. 26 is a detail view of the rivets shown in FIG. 9, in accordance with the second embodiment.
