(57) **CLAIM**

The ornamental design for a display box, as shown and described.

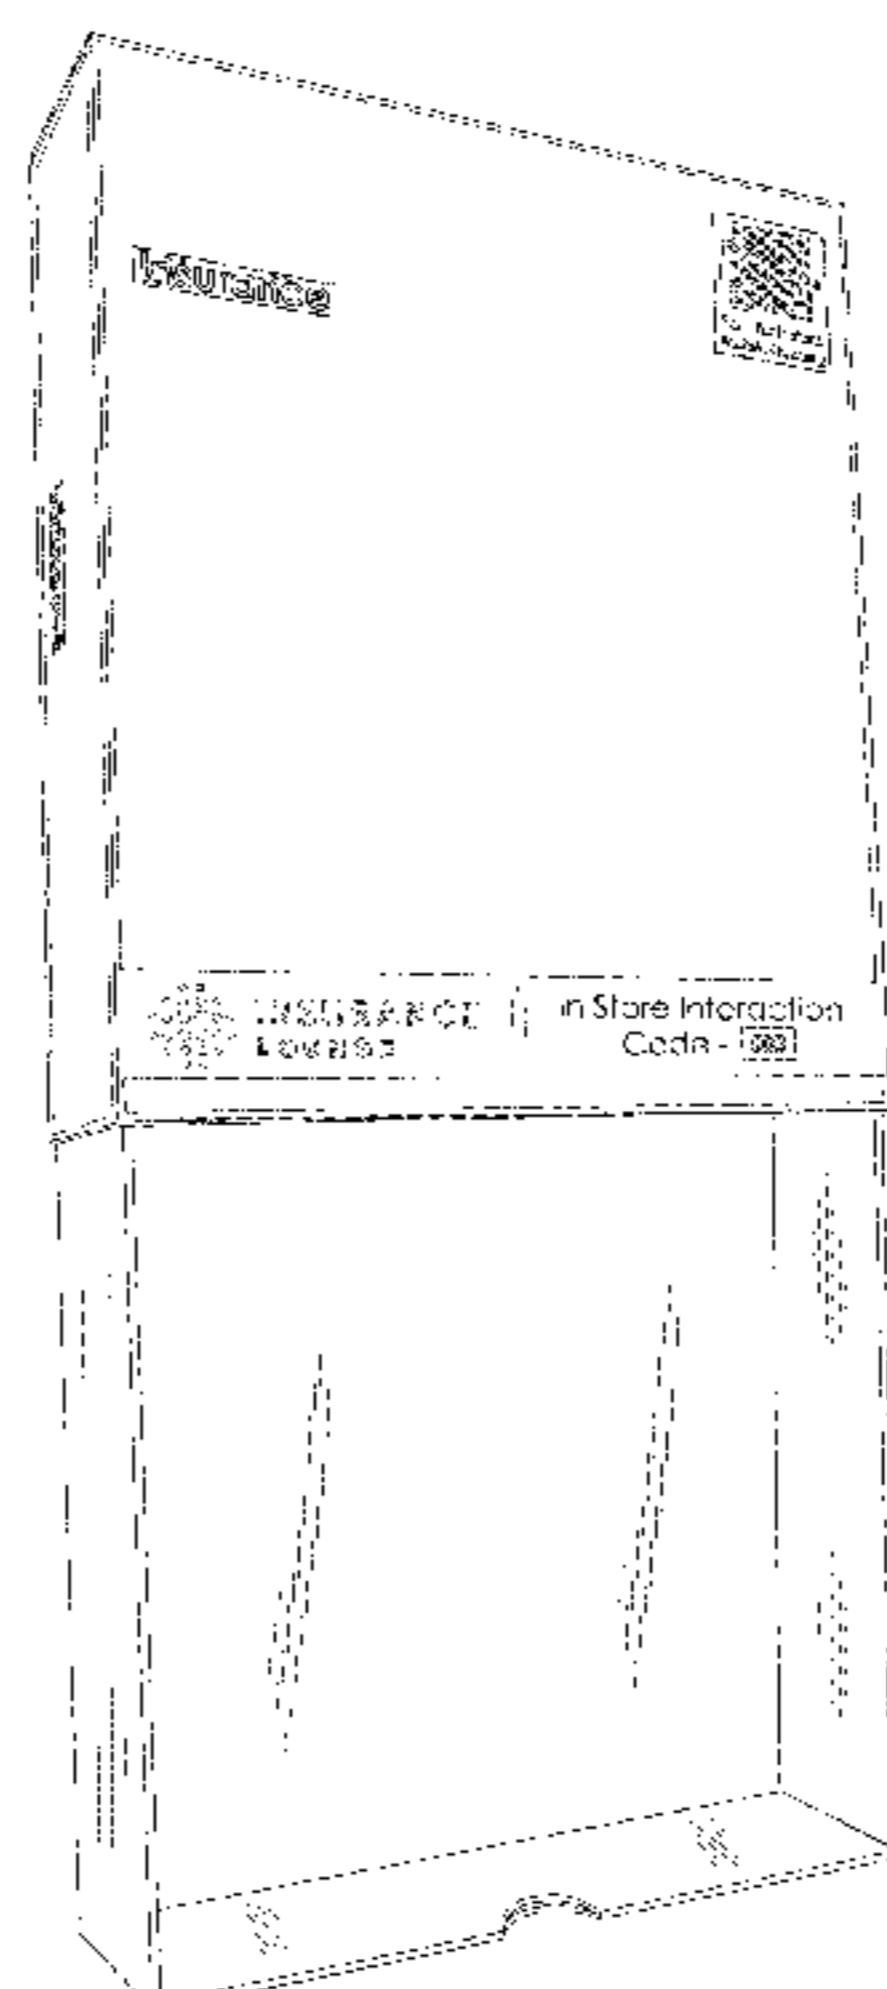

DESCRIPTION

FIG. 1 is a front perspective view of the new design for a display box. In particular, FIG. 1 shows a display box comprising an exterior sleeve with an open bottom side and an interior compartment with an open front side. The interior compartment is slidably insertable into the exterior sleeve to form a box with no open sides.

FIG. 2 is a left side view of the new design of FIG. 1. FIG. 3 is a right side view of the new design of FIG. 1. FIG. 4 is a back side view of the new design of FIG. 1. FIG. 5 is a front side view of the new design of FIG. 1. FIG. 6 is a top view of the new design of FIG. 1. FIG. 7 is a bottom view of the new design of FIG. 1. FIG. 8 is a front perspective view of the new design of FIG. 1 with the interior compartment removed from the exterior sleeve; and, FIG. 9 is a front perspective view of the new design of FIG. 1 with the interior compartment fully inserted into the exterior sleeve.

In the figures, the thinner solid lines appearing within the boundaries of the interactive insurance display box system are shading lines used to indicate the system’s surfaces. The dash-dot broken lines shown in the figures indicate the boundaries of the claimed design, while the evenly spaced broken lines of the system are directed to unclaimed subject matter. Further, the diagonal shading lines in the two thin bands along the top and bottom borders of the back surface of the exterior sleeve indicate a contrast in appearance.

1 Claim, 5 Drawing Sheets
