FIG. 1 is a front view of a display screen or portion thereof with animated graphical user interface for an advertisement management application showing a first image in a sequence;

FIG. 2 is a second image thereof; and,

FIG. 3 is a third image thereof.

The broken lines showing an electronic device and display screen illustrate environmental structure and the article of manufacture, respectively. The remaining broken lines and lined-through text and icons illustrate portions of the graphical user interface. None of the broken lines and lined-through text and icons form part of the claimed design.

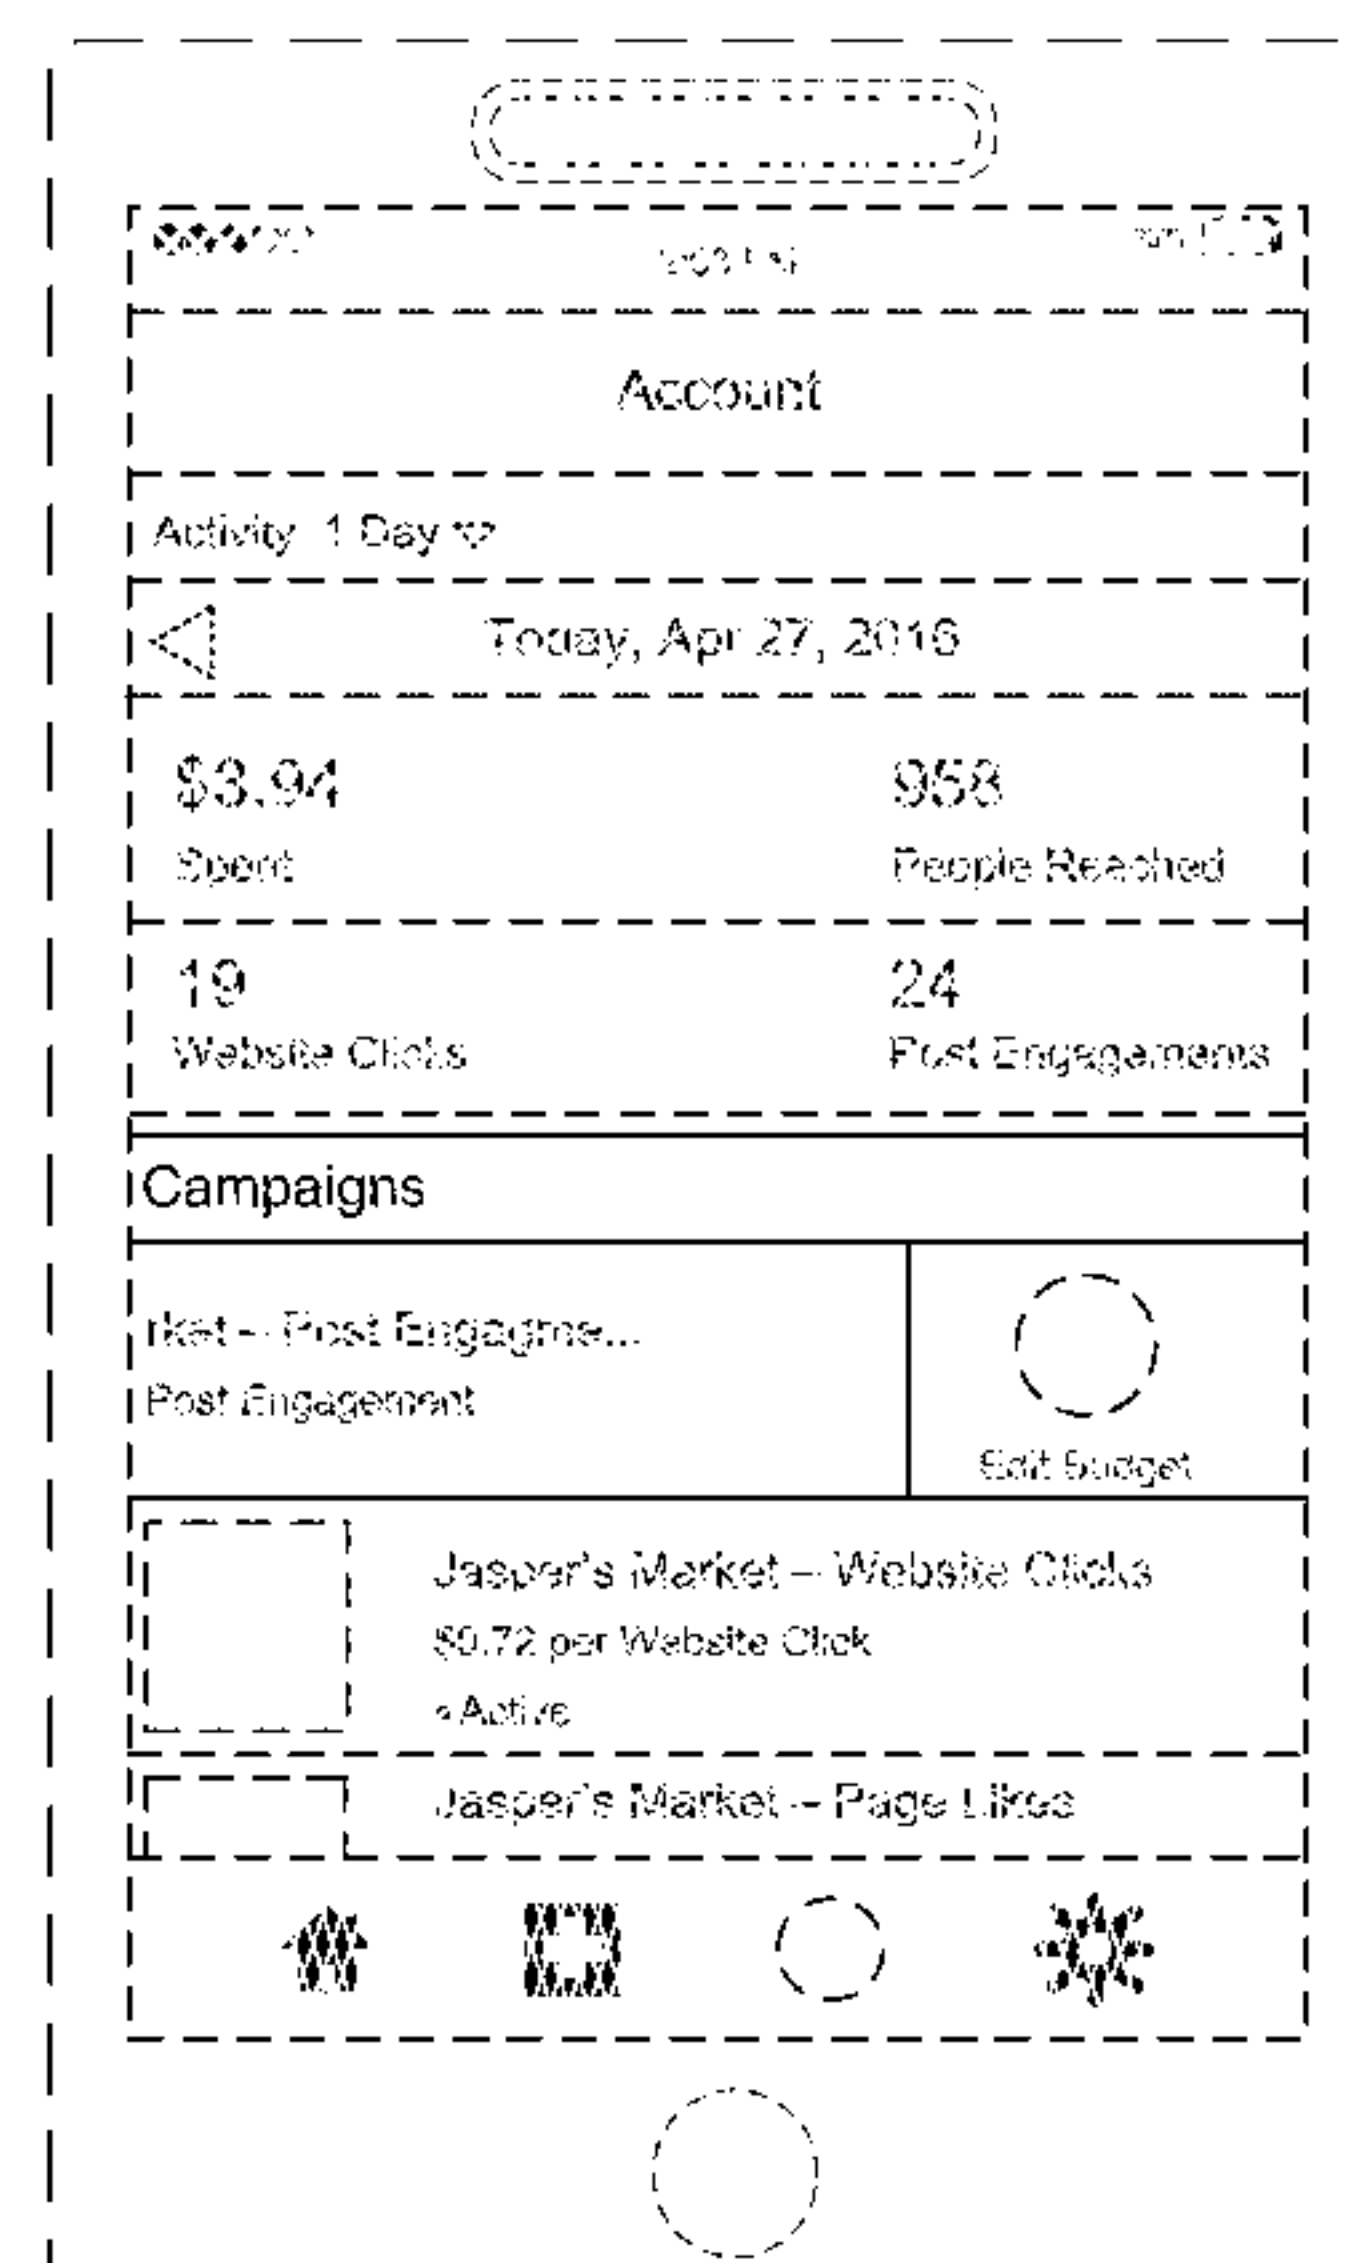

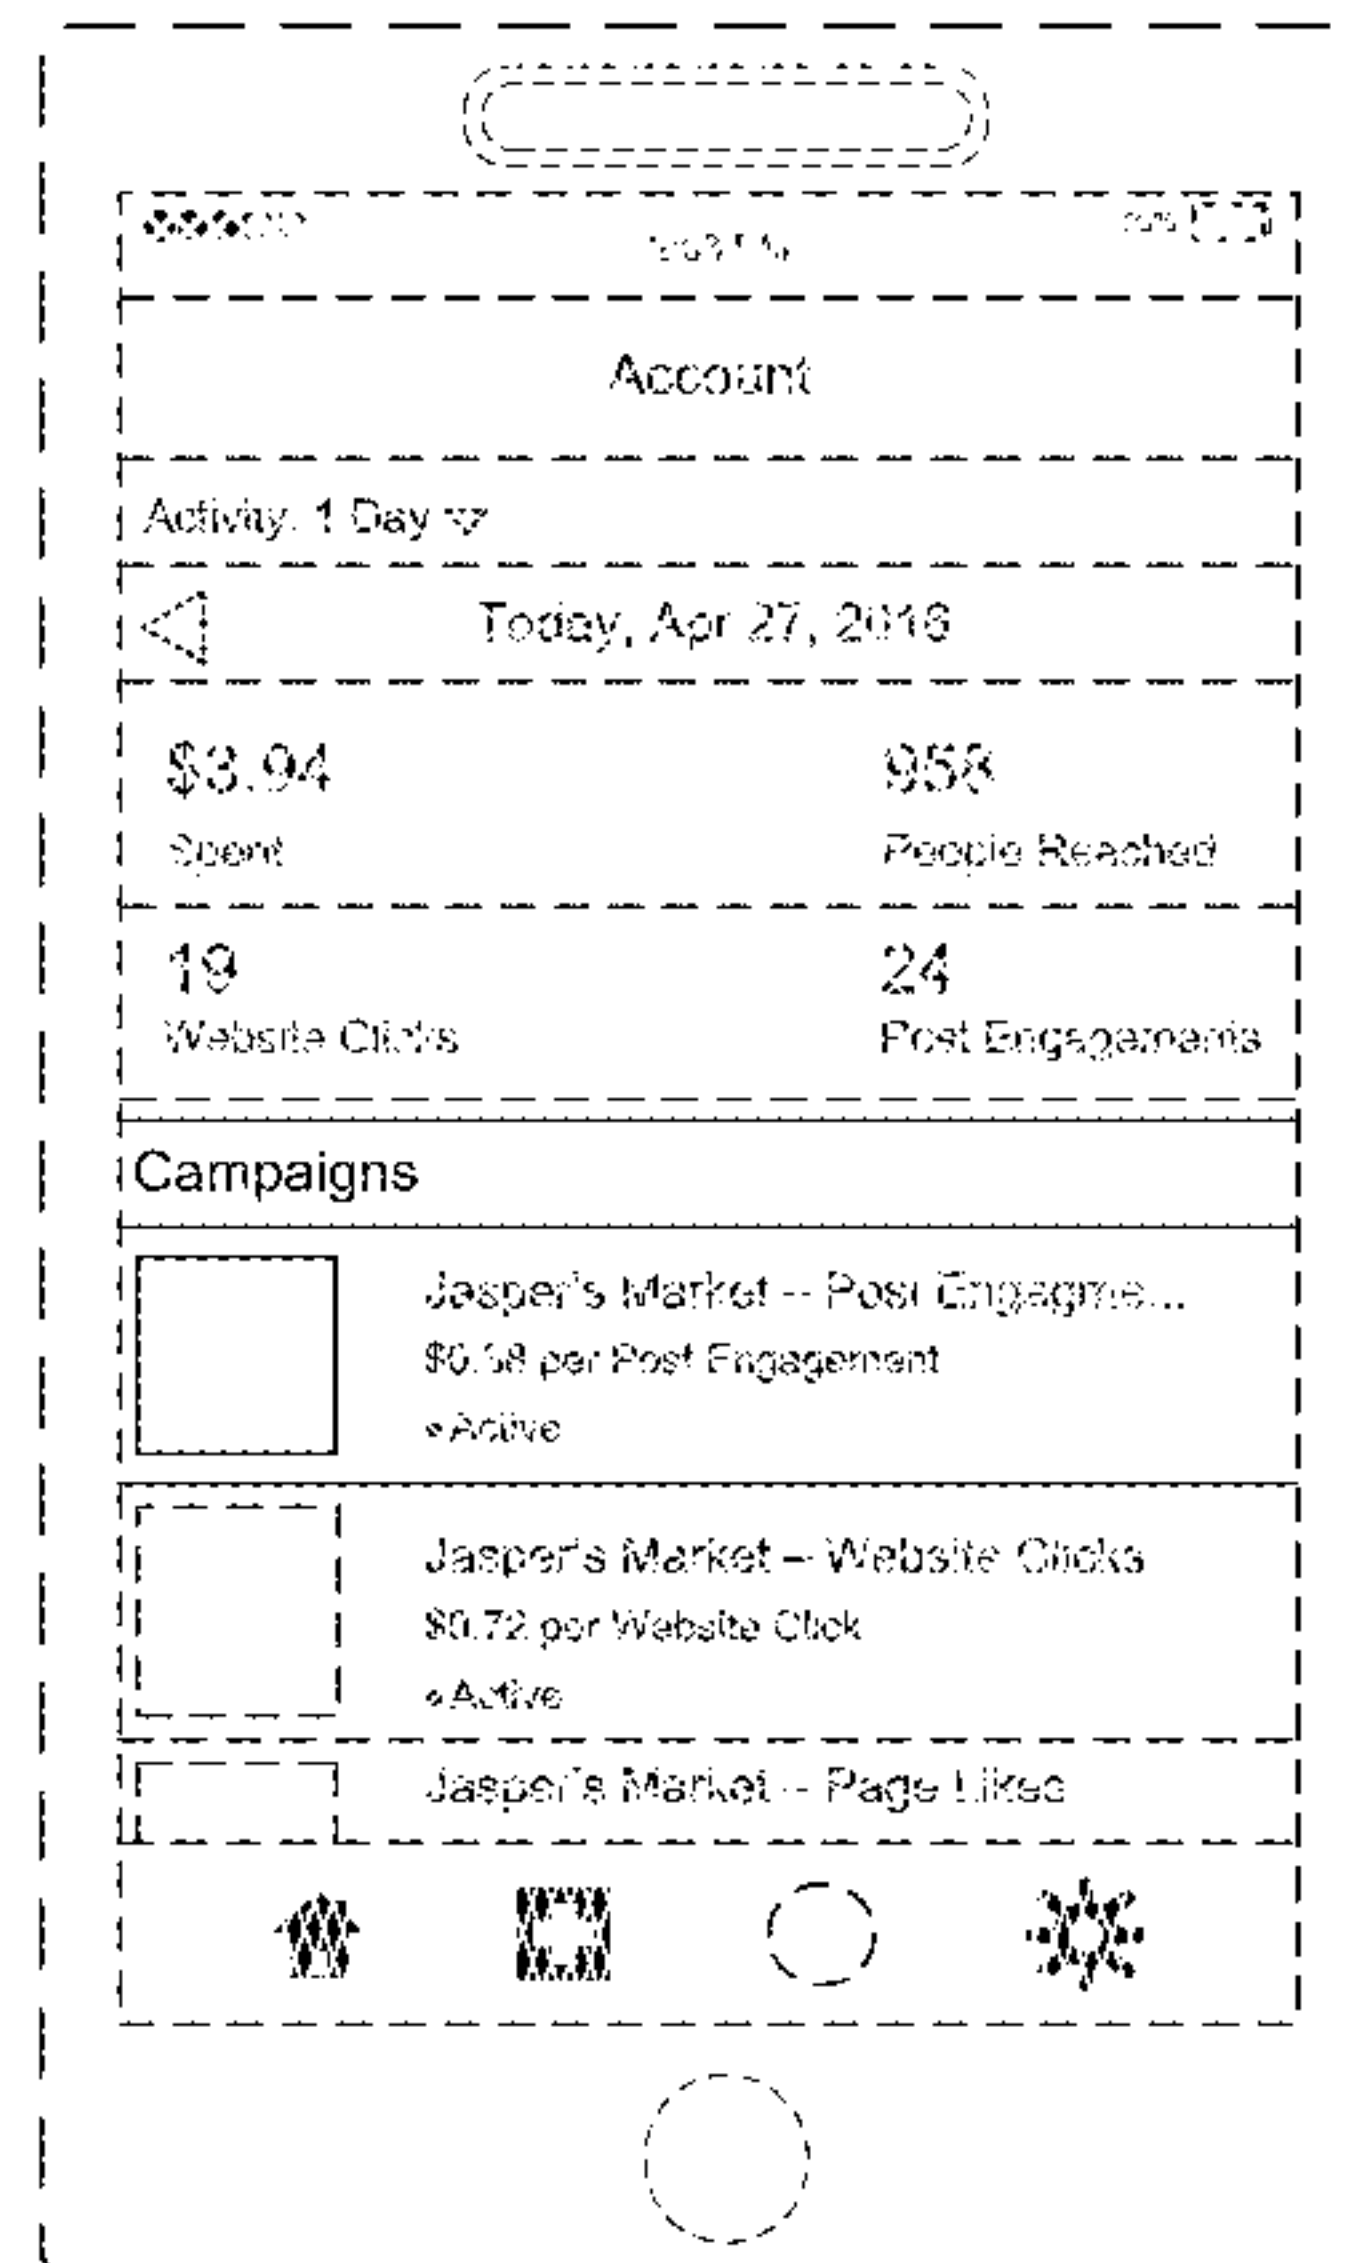

The appearance of the graphical user interface sequentially transitions between the images shown in FIGS. 1-3. The process or period in which one image transitions to another image forms no part of the claimed design.
