(57) **CLAIM**

The ornamental design for a device having a graphical user interface having an animated icon, as shown and described.

DESCRIPTION

A portion of the disclosure of this patent document contains material to which a claim for copyright and trademark is

made. The copyright and trademark owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the Patent and Trademark Office patent file or records, but reserves all other copyright and trademark rights whatsoever.

FIG. 1 is a front view of an embodiment of the device having a graphical user interface having an animated icon. The animated icon is illustrated in a first state within the graphical user interface;

FIG. 2 is a front view of the embodiment of the device having the graphical user interface having the animated icon. The animated icon is illustrated in a second state within the graphical user interface;

FIG. 3 is a front view of the embodiment of the device having the graphical user interface having the animated icon. The animated icon is illustrated in a third state within the graphical user interface;

FIG. 4 is a front view of the embodiment of the device having the graphical user interface having the animated icon. The animated icon is illustrated in a fourth state within the graphical user interface;

FIG. 5 is a front view of the embodiment of the device having the graphical user interface having the animated icon. The animated icon is illustrated in a fifth state within the graphical user interface;

FIG. 6 is a front view of the embodiment of the device having the graphical user interface having the animated icon. The animated icon is illustrated in a sixth state within the graphical user interface;

FIG. 7 is a front view of the embodiment of the device having the graphical user interface having the animated icon. The animated icon is illustrated in a seventh state within the graphical user interface; and,

FIG. 8 is a front view of the embodiment of the device having the graphical user interface having the animated icon. The animated icon is illustrated in an eighth state within the graphical user interface.

The subject matter in this patent includes a process or period during which an image changes into another image. Specifically, the appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-8. This process or period in which one image transitions into another, in each of the above described transitions, forms no part of the claimed design.
