(57) **CLAIM**

The ornamental design for a fluid applicator, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of our ornamental design for a fluid applicator.

FIG. 2 is a top view of our design.

FIG. 3 is a left side plan view of our design.

FIG. 4 is a right side plan view of our design.

FIG. 5 is a front view of our design; and,

FIG. 6 is a back view of our design.

The applicator is open at the distal end straight through up to the proximal end. The rectangular pocket holds a porous media (shown in broken lines) through which a fluid is dispensed. The pocket with the radii acts as an offset guide for the porous media.

The broken lines in the drawings represent environmental structure only and form no part of the claimed design.
