(57) **CLAIM**

The ornamental design for a network access point mounting plate, as shown and described.

FIG. 1 is a perspective view of a network access point mounting plate showing our design, with the network access point mounting plate being in a first configuration in which adjustable brackets of the network access point mounting plate are adjusted to a minimum spacing.

FIG. 2 is a bottom plan view of the network access point mounting plate showing our design with the network access point mounting plate being in the first configuration.

FIG. 3 is a top plan view of the network access point mounting plate showing our design with the network access point mounting plate being in the first configuration.

FIG. 4 is a left side profile view of the network access point mounting plate showing our design with the network access point mounting plate being in the first configuration.

FIG. 5 is a right side profile view of the network access point mounting plate showing our design with the network access point mounting plate being in the first configuration.

FIG. 6 is a front profile view of the network access point mounting plate showing our design with the network access point mounting plate being in the first configuration.

FIG. 7 is a back profile view of the network access point mounting plate showing our design with the network access point mounting plate being in the first configuration.

FIG. 8 is a perspective view of the network access point mounting plate showing our design, with the network access point mounting plate being in a second configuration in which the adjustable brackets of the network access point mounting plate are adjusted to a maximum spacing; and,

FIG. 9 is a back profile view of the network access point mounting plate showing our design with the network access point mounting plate being in the second configuration.

The details shown in broken lines illustrate features that form no part of the claimed design.
