(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawings will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a display screen with a with transitional graphical user interface showing a first image in a sequence in accordance with a first embodiment;

FIG. 2 is a second image thereof; and

FIG. 3 is a third image thereof.

FIG. 4 is a front view of a display screen with transitional graphical user interface showing a first image in a sequence in accordance with a second embodiment;

FIG. 5 is a second image thereof; and,

FIG. 6 is a third image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 through 3 in the first embodiments, and FIGS. 4 through 6 in the second embodiment. The process or period in which one image transitions to another image forms no part of the claimed design. The rectangular broken-line perimeter illustrates a display screen and forms no part of the claimed design.
