(57) **CLAIM**

The ornamental design for an anticlimber for locomotives,
as shown and described.

DESCRIPTION

1. Anticlimber for locomotives

1.1 : Perspective

1.2 : Front

1.3 : Back

1.4 : Top

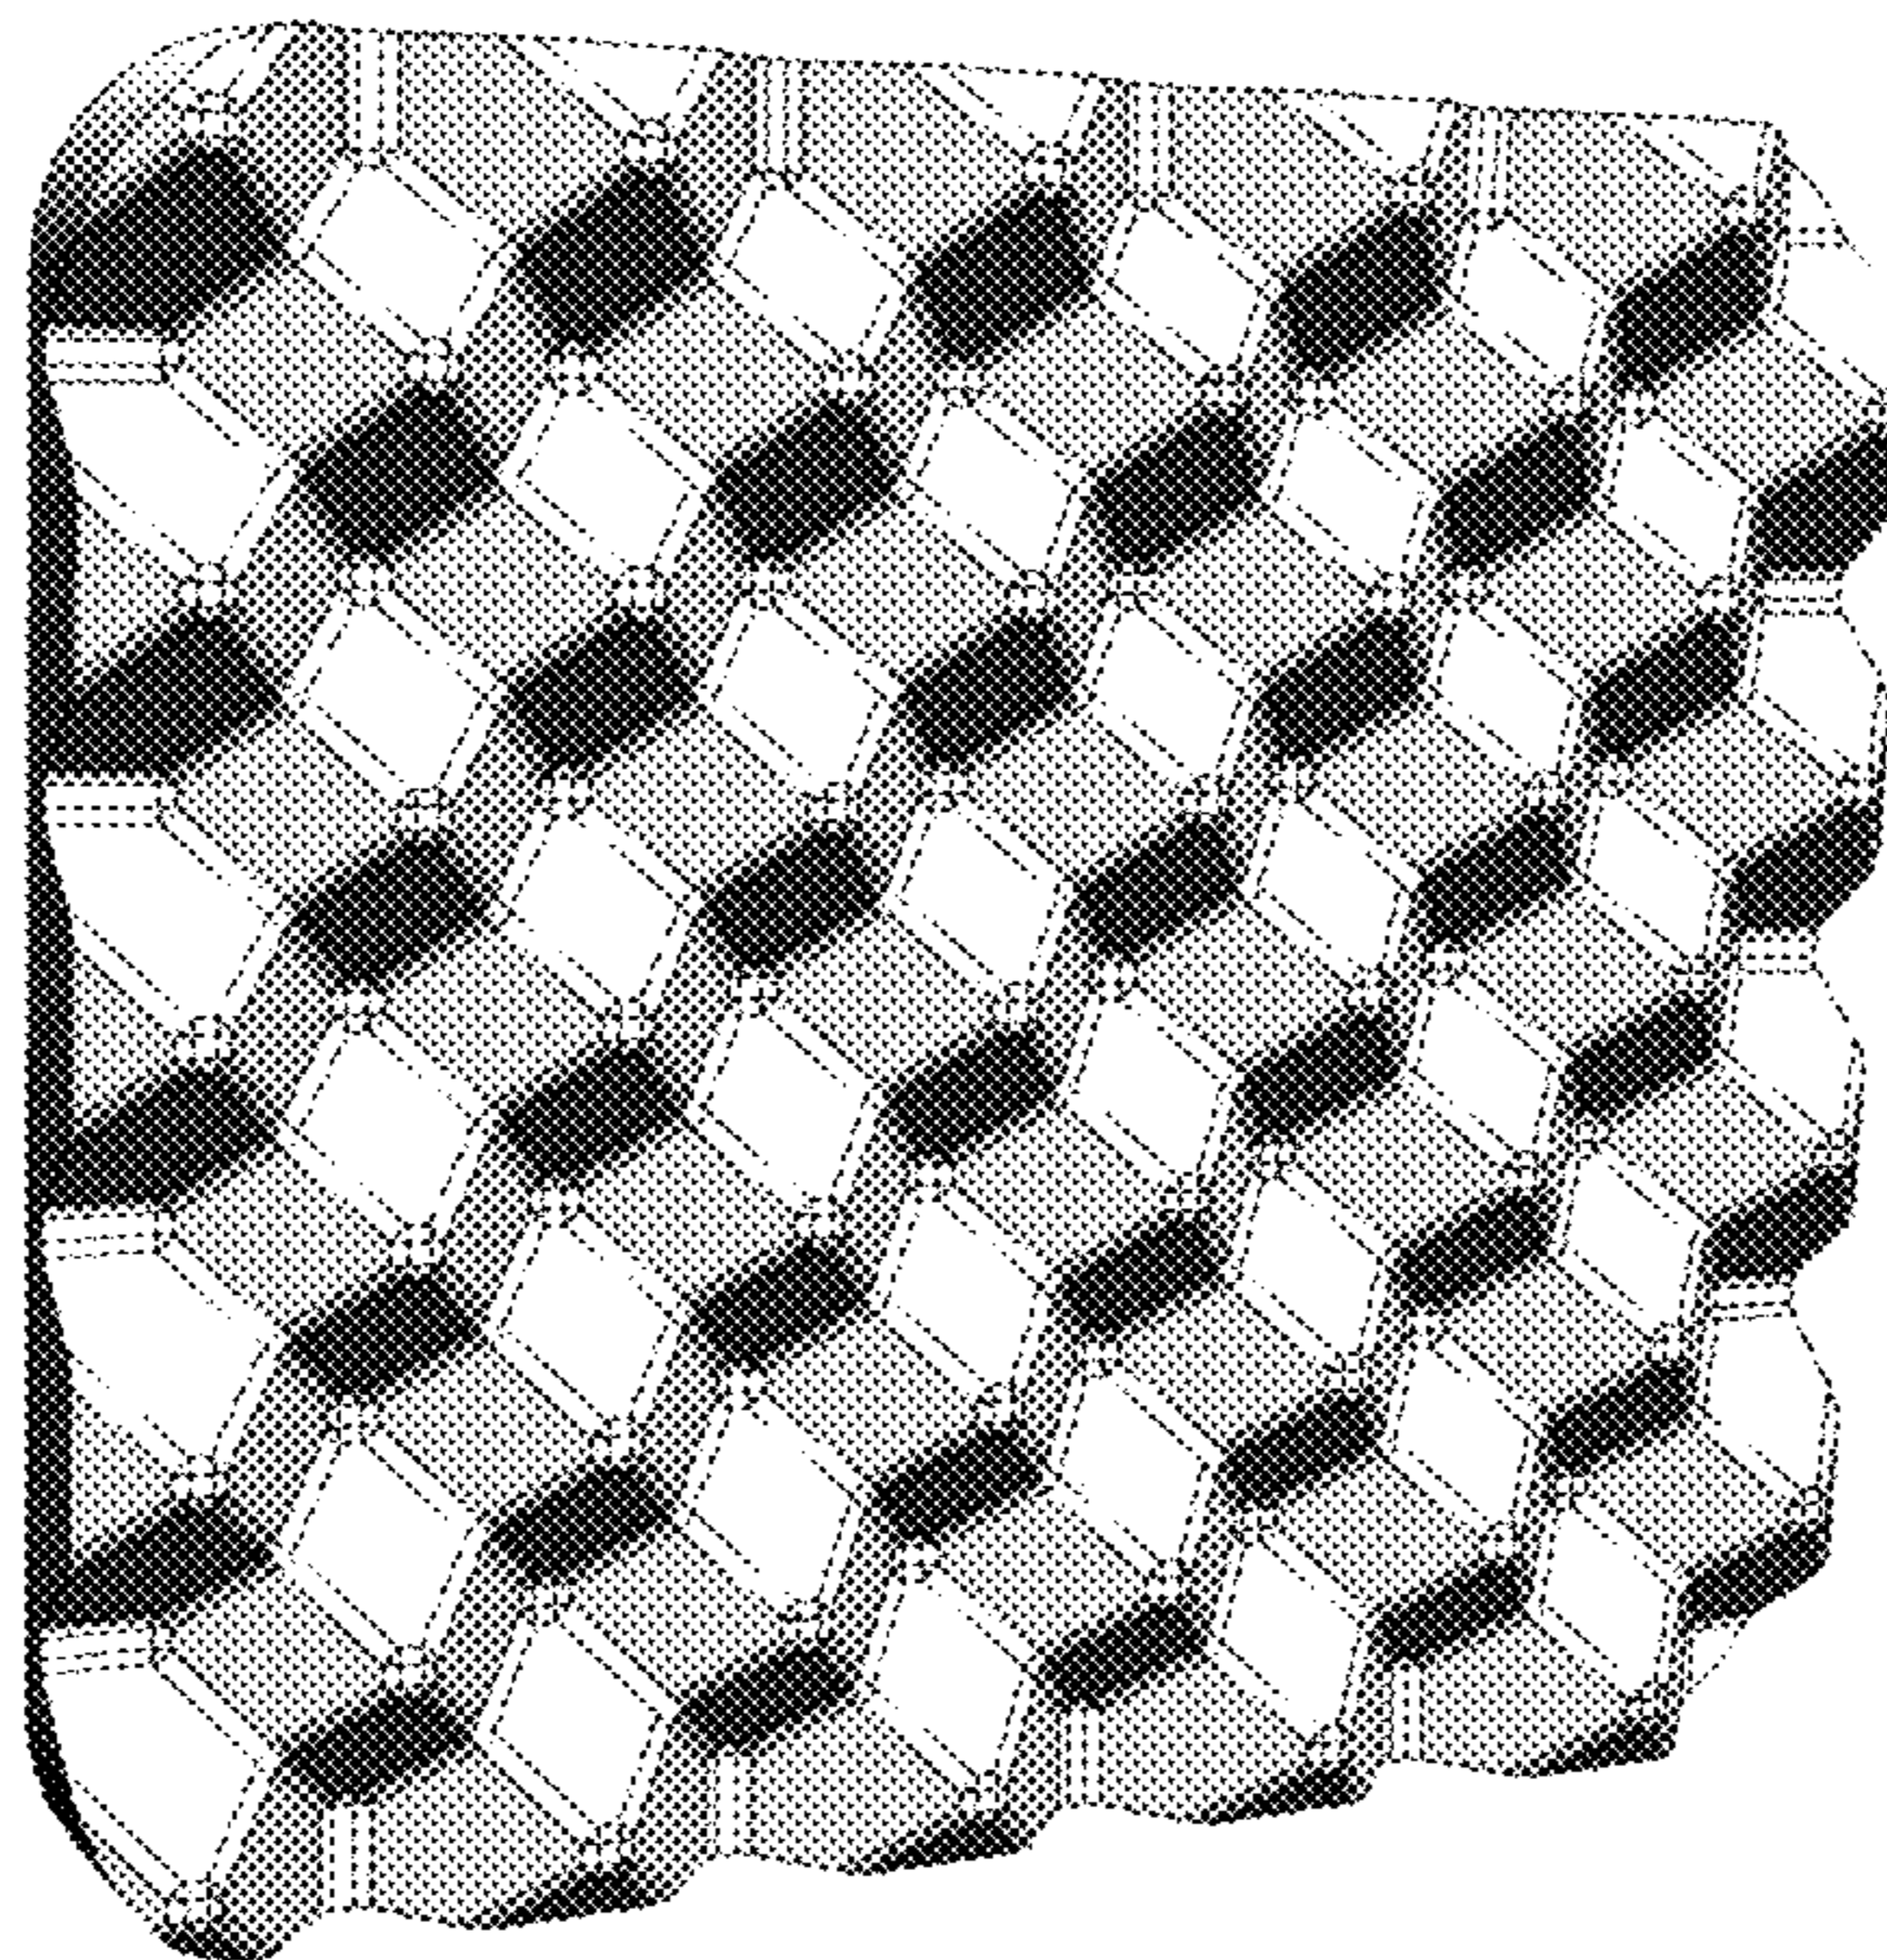

1.5 : Bottom

1.6 : Left

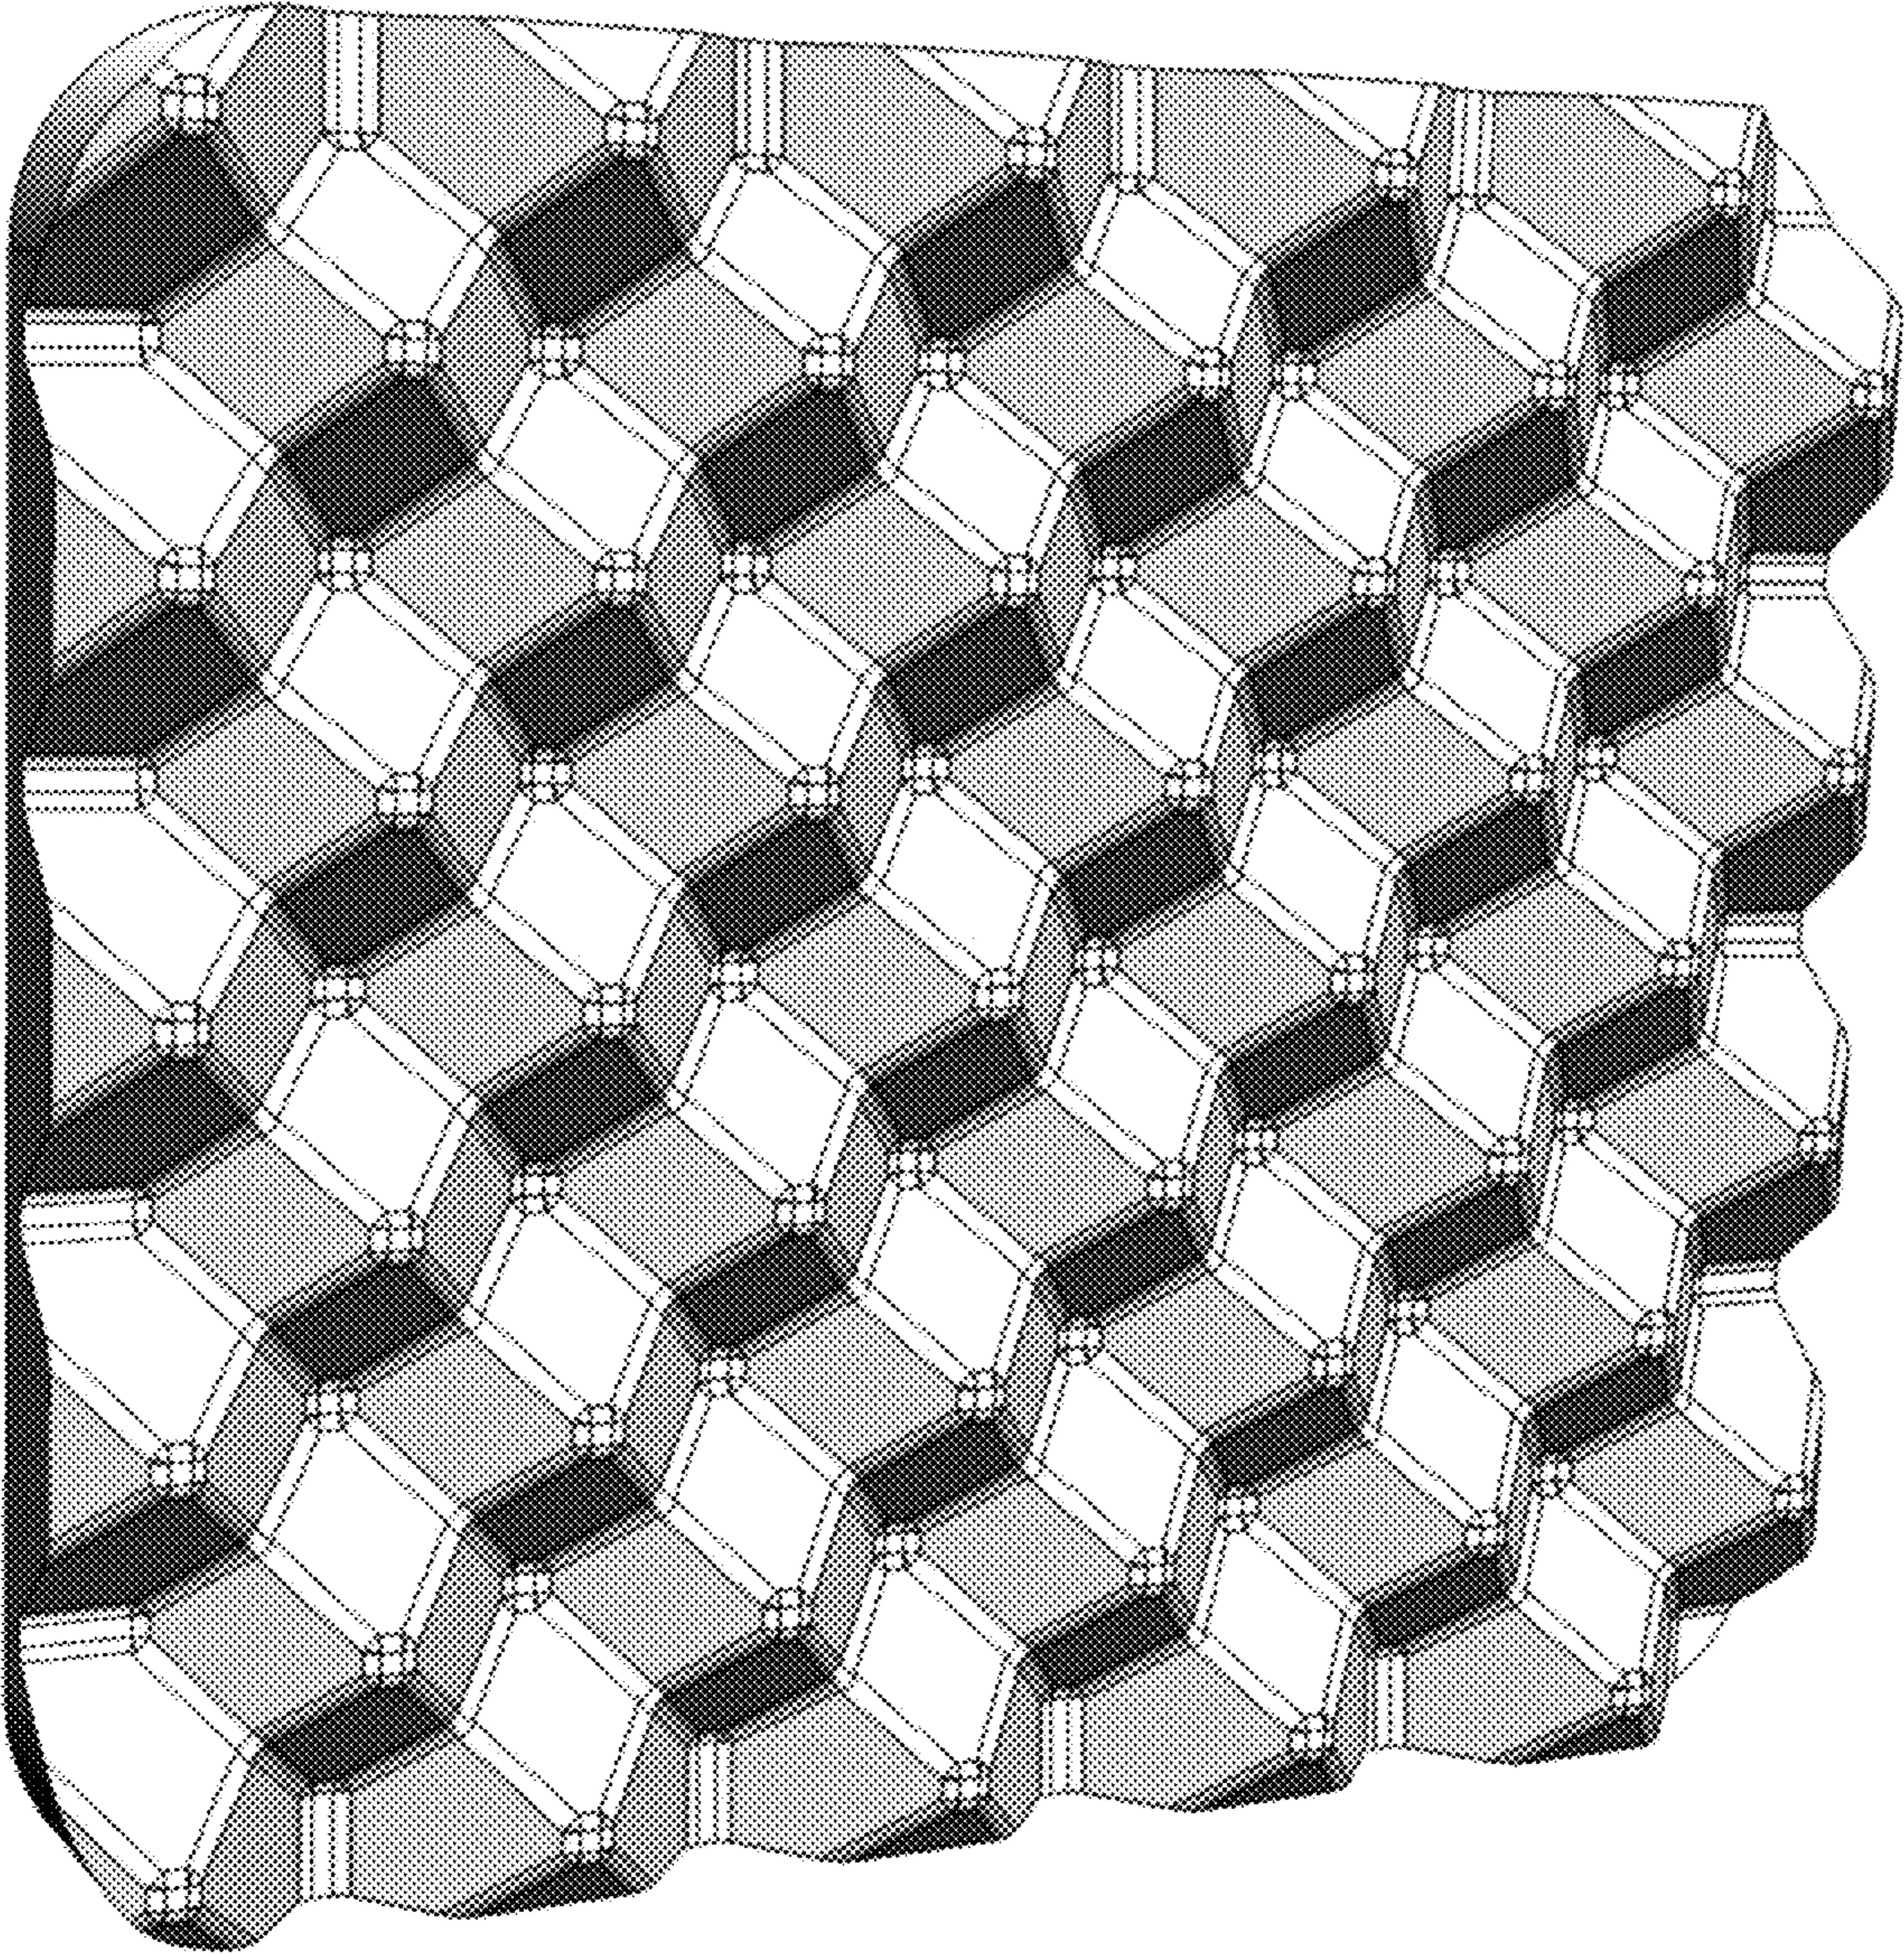

1.7 : Right

The design shows convex projections and concave recesses from the midplane; the projections and recesses alternate regularly along two directions which form an angle so that a regular three-dimensional pattern is developed; the concave and the convex shapes correspond to each other; such a pattern in its full extent generates (depending on illumination and angle of view) continuously changing optical sensations by the light and shadow effects; no protection is claimed for the back view 1.3 indicated by dotted lines.
