(57) **CLAIM**

The ornamental design for a display screen with graphical user interface for activating drug delivery and communicating drug delivery information, as shown and described.

DESCRIPTION

A portion of the disclosure of this patent document may contain material to which a claim for copyright is made. The copyright owner has no objection to the reproduction of the patent document or the patent disclosure, as it appears in the U.S. Patent Office records, but reserves all other copyright rights.

The FIGURE is a front view of a display screen with graphical user interface for activating drug delivery and communicating drug delivery information.

The broken line of the display screen and the broken lines showing certain words, numbers, and features in the drawing(s) are for illustrative and environmental purposes only and form no part of the claimed invention.
