(57) **CLAIM**

The ornamental design for a clamp for surgical support table, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a clamp for surgical support table in the environment of clamping a strap to the rail of the surgical support table;

FIG. 2 is a perspective, bottom view the clamp for surgical support table of the present invention;

FIG. 3 is a front view of the clamp for surgical support table of the present invention;

FIG. 4 is a back view the clamp for surgical support table of the present invention;

FIG. 5 is a side view of the clamp for surgical support table of the present invention;

FIG. 6 is a side view of the clamp for surgical support table of the present invention;

FIG. 7 is a top view of the clamp for surgical support table of the present invention;

FIG. 8 is a bottom view of the clamp for surgical support table of the present invention;

FIG. 9 is a side, perspective view of the clamp for surgical support table in the environment of operably connecting the clamp and jaw lever in the open position to the rail of the surgical support table of the present invention; and,

FIG. 10 is a side, perspective view of the clamp for surgical support table in the environment of operably connecting the clamp and jaw lever in the closed position to the rail of the surgical support table of the present invention.

The broken lines for a rail of a surgical support and/or operating room table, the surgical support and/or operating room table, and a patient positioning pad including straps of the patient positioning pad shown attached around the rail of the support table showing of FIG. 1 is for the purpose of illustrating the environmental structure and forms no part of the claimed design. The broken lines in FIGS. 1-10 for the knob and swivel screw form no part of the present invention and are unclaimed. The broken lines in FIGS. 9-10 for the rail of a surgical support and/or operating room table form no part of the present invention and are unclaimed.

1 Claim, 9 Drawing Sheets
