(57) **CLAIM**

The ornamental design for combination charging case and battery, as shown and described.

DESCRIPTION

FIG. 1 is a front isometric view of a combination charging case and battery of our new design, showing the battery element removed from the case element;

FIG. 2 is a front elevation view of the combination charging case and battery;

FIG. 3 is a bottom view of the case element of the combination charging case and battery, shown in isolation for ease of illustration;

FIG. 4 is a bottom view of the combination charging case and battery, showing the battery element within the case element;

FIG. 5 is a right side view of the combination charging case and battery, wherein the left side view is a mirror image;

FIG. 6 is a top view of the case element of the combination charging case and battery, shown in isolation for ease of illustration;

FIG. 7 is a top view of the combination charging case and battery, showing the battery element within the case element;

FIG. 8 is a rear elevation view of the combination charging case and battery;

FIG. 9 is a front isometric view of the battery element of the combination charging case and battery, shown in isolation for ease of illustration;

FIG. 10 is a front elevation view of the battery element of the combination charging case and battery, shown in isolation for ease of illustration;

FIG. 11 is a right side view of the battery element of the combination charging case and battery, shown in isolation for ease of illustration, wherein the left side view is a mirror image;

FIG. 12 is a bottom view of the battery element of the combination charging case and battery, shown in isolation for ease of illustration; and,

FIG. 13 is a top view of the battery element of the combination charging case and battery, shown in isolation for ease of illustration.

The broken lines in the drawings are for the purpose of illustrating portions of the combination charging case and battery that form no part of the claimed design.
